designed for undergraduates an introduction to high performance scientific computing assumes a basic knowledge of numerical computation and proficiency in fortran or c programming and can be used in any science computer science applied mathematics or engineering department or by practicing scientists and engineers especially those associated with one of the national laboratories or supercomputer centers this text evolved from a new curriculum in scientific computing that was developed to teach undergraduate science and engineering majors how to use high performance computing systems supercomputers in scientific and engineering applications designed for undergraduates an introduction to high performance scientific computing assumes a basic knowledge of numerical computation and proficiency in fortran or c programming and can be used in any science computer science applied mathematics or engineering department or by practicing scientists and engineers especially those associated with one of the national laboratories or supercomputer centers the authors begin with a survey of scientific computing and then provide a review of background numerical analysis ieee arithmetic unix fortran and tools elements of matlab idl avs next full coverage is given to scientific visualization and to the architectures scientific workstations and vector and parallel supercomputers and performance evaluation needed to solve large scale problems the concluding section on applications includes three problems molecular dynamics advection and computerized tomography that illustrate the challenge of solving problems on a variety of computer architectures as well as the suitability of a particular architecture to solving a particular problem finally since this can only be a hands on course with extensive programming and experimentation with a variety of architectures and programming paradigms the authors have provided a laboratory manual and supporting software via anonymous ftp scientific and engineering computation series this user s guide takes you through the steps on how to use both the pred databank popmap software it also gives a detailed description of the pred bank data set the population resources environment development databank pred databank version 2 1 presents data series dealing with various aspects of population the labour force economic growth agriculture natural resource use their trends from 1961 to 1990 the popmap retrieval system popmap version 3 01 which accompanies the database makes it possible to generate thematic maps of pred bank variables to manipulate data save selected data in a choice of data formats scientific protocols for fire investigation provides comprehensive coverage from historical developmental current and practical perspectives the author uniquely qualified with years of experience in both on site investigations and lab analyses provides a resource that is unparalleled in depth and focus the book is distinctive in that it not the series of volumes to which this book belongs honors contributors who have made a major impact in computational fluid dynamics this fourth volume in the series is dedicated to david caughey on the occasion of his 60th birthday the first volume was published in 1994 and was dedicated to prof antony jameson the second dedicated to earl murman was published in 1998 the third volume was dedicated to robert maccormack in 2002 written by leading researchers from academia government laboratories and industry the contributions in this volume present descriptions of

the latest developments in techniques for numerical analysis of fluid flow problems as well as applications to important problems in industry human and animal vision systems have been driven by the pressures of evolution to become capable of perceiving and reacting to their environments as close to instantaneously as possible casting such a goal of reactive vision into the framework of existing technology necessitates an artificial system capable of operating continuously selecting and integrating information from an environment within stringent time delays the yap vision as process project embarked upon the study and development of techniques with this aim in mind since its conception in 1989 the project has successfully moved into its second phase yap ii using the integrated system developed in its predecessor as a basis during the first phase of the work the vision as a process paradigm was realised through the construction of flexible stereo heads and controllable stereo mounts integrated in a skeleton system sa v a demonstrating continuous real time operation it is the work of this fundamental period in the v ap story that this book aptly documents through its achievements the consortium has contributed to building a strong scientific base for the future development of continuously operating machine vision systems and has always underlined the importance of not just solving problems of purely theoretical interest but of tackling real world scenarios indeed the project members should now be well poised to contribute and take advantage of industrial applications such as navigation and process control and already the commercialisation of controllable heads is underway this book focuses on topics in the entire spectrum of fire safety science targeting research in fires explosions combustion science heat transfer fluid dynamics risk analysis structural engineering and other subjects the book contributes to a gain in advanced scientific knowledge and presents or advances new ideas in all topics in fire safety science two decades ago the 1st asia oceania symposium on fire science and technology was held in hefei china since then the asia oceania symposia have grown in size and quality this book reflecting that growth helps readers to understand fire safety technology design and methodology in diverse areas including historical buildings photovoltaic panels batteries and electric vehicles the boost graph library bgl is the first c library to apply the principles of generic programming to the construction of the advanced data structures and algorithms used in graph computations problems in such diverse areas as internet packet routing molecular biology scientific computing and telephone network design can be solved by using graph theory this book presents an in depth description of the bgl and provides working examples designed to illustrate the application of bgl to these real world problems written by the bgl developers the boost graph library user guide and reference manual gives you all the information you need to take advantage of this powerful new library part i is a complete user guide that begins by introducing graph concepts terminology and generic graph algorithms this guide also takes the reader on a tour through the major features of the bgl all motivated with example problems part ii is a comprehensive reference manual that provides complete documentation of all bgl concepts algorithms and classes readers will find coverage of graph terminology and concepts generic programming techniques in c shortest path algorithms for internet routing network planning problems using the minimum spanning tree algorithms bgl algorithms with implicitly defined graphs bgl interfaces to other graph libraries bgl concepts and algorithms bgl classes graph auxiliary and adaptor groundbreaking in its scope this book offers the key to unlocking the power of the bgl for the c programmer looking to extend the reach of generic programming beyond the standard template library covering a period of about 25 years during which time frequency has undergone

significant developments this book is principally addressed to researchers and engineers interested in non stationary signal analysis and processing it is written by recognized experts in the field the idea of a right to privacy which arose in reaction to the rapid rise of newspapers instant photography and the paparazzi of the 19th century has evolved into a constitutional right in much of the developed world it is enshrined in hong kong through articles 28 29 30 and 39 of the basic law hong kong stands proud as the first jurisdiction in asia to enact legislation to safeguard personal data in the form of the personal data privacy ordinance cap 486 the ordinance which came into force in 1996 at its centre are the six data protection principles based on the 1980 oecd guidelines the office of the privacy commissioner for personal data was created under this legislation to provide oversight and ensure compliance the octopus scandal in mid 2010 eventually led to substantial changes being made to the ordinance that were enacted in 2012 and 2013 the main amendments being the direct marketing provisions and the provision of legal assistance and representation to aggrieved persons in this digital age the ordinance is proving to be the main safeguard of our privacy rights the data protection principles seek to create broad common principles based on fairness that apply to the public and private sectors the passage of twenty years since the enactment of the ordinance has given rise to a substantial body of case law and administrative decisions on these principles and the other provisions of the ordinance the new amendments have already been the subject of judicial scrutiny this publication which replaces its predecessor has the dual aim of becoming a practitioner s guide on the important subject of personal data privacy containing as it does a detailed exposition of the principles and provisions in the ordinance and a comprehensive source of reference materials and of enabling the privacy commissioner to discharge his major duty to promote awareness and understanding of the ordinance the second edition includes not only a full discussion of these principles but also summaries of all the seminal cases and administrative appeals board rulings in this area as well as a comprehensive list of all the pertinent cases graph partitioning is a theoretical subject with applications in many areas principally numerical analysis programs mapping onto parallel architectures image segmentation vlsi design during the last 40 years the literature has strongly increased and big improvements have been made this book brings together the knowledge accumulated during many years to extract both theoretical foundations of graph partitioning and its main applications this volume contains translations of papers that originally appeared in the japanese journal sugaku the papers range over a variety of topics in probability theory statistics and applications this volume is suitable for graduate students and research mathematicians interested in probability and statistics the author develops a homology theory for smale spaces which include the basics sets for an axiom a diffeomorphism it is based on two ingredients the first is an improved version of bowen s result that every such system is the image of a shift of finite type under a finite to one factor map the second is krieger s dimension group invariant for shifts of finite type he proves a lefschetz formula which relates the number of periodic points of the system for a given period to trace data from the action of the dynamics on the homology groups the existence of such a theory was proposed by bowen in the 1970s many industries have begun to recognize the potential support that unmanned aerial vehicles uavs offer and this is no less true for the commercial sector current research on this field is narrowly focused on technological development to improve the functionality of delivery and endurance of the drone delivery in logistics as well as on regulatory challenges posed by such operations there is a need for further attention to be

applied to operational and integration challenges associated with uavs unmanned aerial vehicles in civilian logistics and supply chain management is a collection of innovative research that investigates the opportunities and challenges for the use of uavs in logistics and supply chain management with a specific aim to focus on the multifaceted impact of drone delivery while highlighting topics including non military operations public management and safety culture this book is ideally designed for government administrators managers industry professionals researchers and students in this comprehensive and practical guide to the countryside passionate and hugely knowledgeable countryman alan titchmarsh explores the heritage of rural britain its landscapes and wildlife its traditions customs and crafts he ll look at the beauty of chalk downland offer a checklist of british butterflies and where to find them and show how to make moth traps and wildlife ponds he ll identify the best breeds of cattle for meat and milk explain how best to look after a pig and the secrets of a successful small holding from keeping chickens to dressing a stick from dry stone walling to creating a wild flower meadow the essence of country life and the best places to encounter it will be identified in this celebration of the british countryside and its delights skills and treasures lavishly illustrated beautifully produced and information packed the complete countryman will be an inspirational showcase for all that is best about rural britain and will reconnect us with its wonderful wise ways cissp study guide fourth edition provides the latest updates on cissp certification the most prestigious globally recognized vendor neutral exam for information security professionals in this new edition readers will learn about what s included in the newest version of the exam s common body of knowledge the eight domains are covered completely and as concisely as possible each domain has its own chapter including specially designed pedagogy to help readers pass the exam clearly stated exam objectives unique terms definitions exam warnings learning by example hands on exercises and chapter ending questions help readers fully comprehend the material provides the most complete and effective study guide to prepare you for passing the cissp exam contains only what you need to pass the test with no fluff eric conrad has prepared hundreds of professionals for passing the cissp exam through sans a popular and well known organization for information security professionals covers all of the new information in the common body of knowledge updated in may 2021 and also provides tiered end of chapter questions for a gradual learning curve and a complete self test appendix this coherently written book is the final report on the ipsen project on integrated software project support environments devoted to the integration of tools for the development and maintenance of large software systems the theoretical and application oriented findings of this comprehensive project are presented in the following chapters overview introduction classification and global approach the outside perspective tools environments their integration and user interface internal conceptual modeling graph grammar specifications realization derivation of efficient tools current and future work open problems conclusion summary evaluation and vision also included is a comprehensive bibliography listing more than 1300 entries and a detailed index the first part of this third volume focuses on the design of mechatronic components in particular the feed drives of machine tools used to generate highly dynamic drive movements engineering guides for the selection and design of important machine components the control technology of feed drives and the measuring systems required for position capture are presented another focus is on process and diagnostic equipment for manufacturing machines and systems the second part describes control concepts including programming methods for various applications of modern

production systems programmable logic controllers plc numerical controllers nc and robot controllers rc are part of these presentations in the context of automated manufacturing systems the various levels of the automation pyramid and the importance of control systems are also outlined finally the volume deals with the engineering of machines and plants the german machine tools and production systems compendium has been completely revised the previous five volume series has been condensed into three volumes in the new ninth edition with colored technical illustrations throughout this first english edition is a translation of the german ninth edition illustrating recent developments in the software design and graphics techniques used to visualize scientific concepts this study takes a broad view examining visualization architectures development methods and tools and visualization techniques and algorithms

User's Guide for SeedCalc 1996

designed for undergraduates an introduction to high performance scientific computing assumes a basic knowledge of numerical computation and proficiency in fortran or c programming and can be used in any science computer science applied mathematics or engineering department or by practicing scientists and engineers especially those associated with one of the national laboratories or supercomputer centers this text evolved from a new curriculum in scientific computing that was developed to teach undergraduate science and engineering majors how to use high performance computing systems supercomputers in scientific and engineering applications designed for undergraduates an introduction to high performance scientific computing assumes a basic knowledge of numerical computation and proficiency in fortran or c programming and can be used in any science computer science applied mathematics or engineering department or by practicing scientists and engineers especially those associated with one of the national laboratories or supercomputer centers the authors begin with a survey of scientific computing and then provide a review of background numerical analysis ieee arithmetic unix fortran and tools elements of matlab idl avs next full coverage is given to scientific visualization and to the architectures scientific workstations and vector and parallel supercomputers and performance evaluation needed to solve large scale problems the concluding section on applications includes three problems molecular dynamics advection and computerized tomography that illustrate the challenge of solving problems on a variety of computer architectures as well as the suitability of a particular architecture to solving a particular problem finally since this can only be a hands on course with extensive programming and experimentation with a variety of architectures and programming paradigms the authors have provided a laboratory manual and supporting software via anonymous ftp scientific and engineering computation series

An Introduction to High-performance Scientific Computing 1996

this user s guide takes you through the steps on how to use both the pred databank popmap software it also gives a detailed description of the pred bank data set the population resources environment development databank pred databank version 2 1 presents data series dealing with various aspects of population the labour force economic growth agriculture natural resource use their trends from 1961 to 1990 the popmap retrieval system popmap version 3 01 which accompanies the database makes it possible to generate thematic maps of pred bank variables to manipulate data save selected data in a choice of data formats

Student User Guide for Word 97, College Keyboarding 1997-08-12

scientific protocols for fire investigation provides comprehensive coverage from historical developmental current and practical perspectives the author uniquely qualified with years of

experience in both on site investigations and lab analyses provides a resource that is unparalleled in depth and focus the book is distinctive in that it not

User's Guide to the Population, Resources, Environment and Development Databank (PRED Bank, Version 2.1) 1998

the series of volumes to which this book belongs honors contributors who have made a major impact in computational fluid dynamics this fourth volume in the series is dedicated to david caughey on the occasion of his 60th birthday the first volume was published in 1994 and was dedicated to prof antony jameson the second dedicated to earl murman was published in 1998 the third volume was dedicated to robert maccormack in 2002 written by leading researchers from academia government laboratories and industry the contributions in this volume present descriptions of the latest developments in techniques for numerical analysis of fluid flow problems as well as applications to important problems in industry

User's Guide for the Solar Backscattered Ultraviolet (SBUV) and the Total Ozone Mapping Spectrometer (TOMS) RUT-S and RUT-T Data Sets 1983

human and animal vision systems have been driven by the pressures of evolution to become capable of perceiving and reacting to their environments as close to instantaneously as possible casting such a goal of reactive vision into the framework of existing technology necessitates an artificial system capable of operating continuously selecting and integrating information from an environment within stringent time delays the yap vision as process project embarked upon the study and development of techniques with this aim in mind since its conception in 1989 the project has successfully moved into its second phase yap ii using the integrated system developed in its predecessor as a basis during the first phase of the work the vision as a process paradigm was realised through the construction of flexible stereo heads and controllable stereo mounts integrated in a skeleton system sa v a demonstrating continuous real time operation it is the work of this fundamental period in the v ap story that this book aptly documents through its achievements the consortium has contributed to building a strong scientific base for the future development of continuously operating machine vision systems and has always underlined the importance of not just solving problems of purely theoretical interest but of tackling real world scenarios indeed the project members should now be well poised to contribute and take advantage of industrial applications such as navigation and process control and already the commercialisation of controllable heads is underway

Scientific Protocols for Fire Investigation 2006-01-26

this book focuses on topics in the entire spectrum of fire safety science targeting research in fires explosions combustion science heat transfer fluid dynamics risk analysis structural engineering and other subjects the book contributes to a gain in advanced scientific knowledge and presents or advances new ideas in all topics in fire safety science two decades ago the 1st asia oceania symposium on fire science and technology was held in hefei china since then the asia oceania symposia have grown in size and quality this book reflecting that growth helps readers to understand fire safety technology design and methodology in diverse areas including historical buildings photovoltaic panels batteries and electric vehicles

User's Guide for the Solar Backscattered Ultraviolet (SBUV) and the Total Ozone Mapping Spectrometer (TOMS) RUT-S and RUT-T Data Sets 1983

the boost graph library bgl is the first c library to apply the principles of generic programming to the construction of the advanced data structures and algorithms used in graph computations problems in such diverse areas as internet packet routing molecular biology scientific computing and telephone network design can be solved by using graph theory this book presents an in depth description of the bgl and provides working examples designed to illustrate the application of bgl to these real world problems written by the bgl developers the boost graph library user guide and reference manual gives you all the information you need to take advantage of this powerful new library part i is a complete user guide that begins by introducing graph concepts terminology and generic graph algorithms this guide also takes the reader on a tour through the major features of the bgl all motivated with example problems part ii is a comprehensive reference manual that provides complete documentation of all bgl concepts algorithms and classes readers will find coverage of graph terminology and concepts generic programming techniques in c shortest path algorithms for internet routing network planning problems using the minimum spanning tree algorithms bgl algorithms with implicitly defined graphs bgl interfaces to other graph libraries bgl concepts and algorithms bgl classes graph auxiliary and adaptor groundbreaking in its scope this book offers the key to unlocking the power of the bgl for the c programmer looking to extend the reach of generic programming beyond the standard template library

Solar Backscattered Ultraviolet Radiometer, Version 2 (SBUV/2) 1990

covering a period of about 25 years during which time frequency has undergone significant developments this book is principally addressed to researchers and engineers interested in non stationary signal analysis and processing it is written by recognized experts in the field

Refinery Energy Profile 1979

the idea of a right to privacy which arose in reaction to the rapid rise of newspapers instant photography and the paparazzi of the 19th century has evolved into a constitutional right in much of the developed world it is enshrined in hong kong through articles 28 29 30 and 39 of the basic law hong kong stands proud as the first jurisdiction in asia to enact legislation to safeguard personal data in the form of the personal data privacy ordinance cap 486 the ordinance which came into force in 1996 at its centre are the six data protection principles based on the 1980 oecd guidelines the office of the privacy commissioner for personal data was created under this legislation to provide oversight and ensure compliance the octopus scandal in mid 2010 eventually led to substantial changes being made to the ordinance that were enacted in 2012 and 2013 the main amendments being the direct marketing provisions and the provision of legal assistance and representation to aggrieved persons in this digital age the ordinance is proving to be the main safeguard of our privacy rights the data protection principles seek to create broad common principles based on fairness that apply to the public and private sectors the passage of twenty years since the enactment of the ordinance has given rise to a substantial body of case law and administrative decisions on these principles and the other provisions of the ordinance the new amendments have already been the subject of judicial scrutiny this publication which replaces its predecessor has the dual aim of becoming a practitioner s guide on the important subject of personal data privacy containing as it does a detailed exposition of the principles and provisions in the ordinance and a comprehensive source of reference materials and of enabling the privacy commissioner to discharge his major duty to promote awareness and understanding of the ordinance the second edition includes not only a full discussion of these principles but also summaries of all the seminal cases and administrative appeals board rulings in this area as well as a comprehensive list of all the pertinent cases

RISC Systems and Applications 1996

graph partitioning is a theoretical subject with applications in many areas principally numerical analysis programs mapping onto parallel architectures image segmentation vlsi design during the last 40 years the literature has strongly increased and big improvements have been made this book brings together the knowledge accumulated during many years to extract both theoretical foundations of graph partitioning and its main applications

Advanced Microprocessors 1996

this volume contains translations of papers that originally appeared in the japanese journal sugaku the papers range over a variety of topics in probability theory statistics and applications this volume is suitable for graduate students and research mathematicians interested in probability and statistics

Frontiers of Computational Fluid Dynamics 2006 2005

the author develops a homology theory for small spaces which include the basic sets for an axiom a diffeomorphism it is based on two ingredients the first is an improved version of bowen's result that every such system is the image of a shift of finite type under a finite to one factor map the second is krieger's dimension group invariant for shifts of finite type he proves a lefschetz formula which relates the number of periodic points of the system for a given period to trace data from the action of the dynamics on the homology groups the existence of such a theory was proposed by bowen in the 1970s

Vision as Process 1994-12-19

many industries have begun to recognize the potential support that unmanned aerial vehicles uavs offer and this is no less true for the commercial sector current research on this field is narrowly focused on technological development to improve the functionality of delivery and endurance of the drone delivery in logistics as well as on regulatory challenges posed by such operations there is a need for further attention to be applied to operational and integration challenges associated with uavs unmanned aerial vehicles in civilian logistics and supply chain management is a collection of innovative research that investigates the opportunities and challenges for the use of uavs in logistics and supply chain management with a specific aim to focus on the multifaceted impact of drone delivery while highlighting topics including non military operations public management and safety culture this book is ideally designed for government administrators managers industry professionals researchers and students

Index of Specifications and Standards 1993

in this comprehensive and practical guide to the countryside passionate and hugely knowledgeable countryman alan titchmarsh explores the heritage of rural britain its landscapes and wildlife its traditions customs and crafts he'll look at the beauty of chalk downland offer a checklist of british butterflies and where to find them and show how to make moth traps and wildlife ponds he'll identify the best breeds of cattle for meat and milk explain how best to look after a pig and the secrets of a successful small holding from keeping chickens to dressing a stick from dry stone walling to creating a wild flower meadow the essence of country life and the best places to encounter it will be identified in this celebration of the british countryside and its delights skills and treasures lavishly illustrated beautifully produced and information packed the complete countryman will be an inspirational showcase for all that is best about rural britain and will reconnect us with its wonderful wise ways

Fire Science and Technology 2015 2016-10-04

cissp study guide fourth edition provides the latest updates on cissp certification the most prestigious globally recognized vendor neutral exam for information security professionals in this new edition readers will learn about what's included in the newest version of the exam's

common body of knowledge the eight domains are covered completely and as concisely as possible each domain has its own chapter including specially designed pedagogy to help readers pass the exam clearly stated exam objectives unique terms definitions exam warnings learning by example hands on exercises and chapter ending questions help readers fully comprehend the material provides the most complete and effective study guide to prepare you for passing the cissp exam contains only what you need to pass the test with no fluff eric conrad has prepared hundreds of professionals for passing the cissp exam through sans a popular and well known organization for information security professionals covers all of the new information in the common body of knowledge updated in may 2021 and also provides tiered end of chapter questions for a gradual learning curve and a complete self test appendix

Boost Graph Library 2001-12-20

this coherently written book is the final report on the ipsen project on integrated software project support environments devoted to the integration of tools for the development and maintenance of large software systems the theoretical and application oriented findings of this comprehensive project are presented in the following chapters overview introduction classification and global approach the outside perspective tools environments their integration and user interface internal conceptual modeling graph grammar specifications realization derivation of efficient tools current and future work open problems conclusion summary evaluation and vision also included is a comprehensive bibliography listing more than 1300 entries and a detailed index

Time-Frequency Analysis 2013-03-01

the first part of this third volume focuses on the design of mechatronic components in particular the feed drives of machine tools used to generate highly dynamic drive movements engineering guides for the selection and design of important machine components the control technology of feed drives and the measuring systems required for position capture are presented another focus is on process and diagnostic equipment for manufacturing machines and systems the second part describes control concepts including programming methods for various applications of modern production systems programmable logic controllers plc numerical controllers nc and robot controllers rc are part of these presentations in the context of automated manufacturing systems the various levels of the automation pyramid and the importance of control systems are also outlined finally the volume deals with the engineering of machines and plants the german machine tools and production systems compendium has been completely revised the previous five volume series has been condensed into three volumes in the new ninth edition with colored technical illustrations throughout this first english edition is a translation of the german ninth edition

Personal Data (Privacy) Law in Hong Kong A Practical Guide on Compliance (Second Edition) 2013-01-24

illustrating recent developments in the software design and graphics techniques used to visualize scientific concepts this study takes a broad view examining visualization architectures development methods and tools and visualization techniques and algorithms
