this book is a source book for the art educator for the

teaching of art appreciation at all levels this book is more

than an introduction to the psychology of art appreciation it

puts into perspective the research carried out within the

area and offers a new understanding of the relationship

between art and viewer a number of studies within the

psycho physical cognitive psychoanalytic and existential

phenomenological schools of thought are presented in order

to demonstrate how their views on the appreciation of

visual art vary five different types of art appreciation

ranging from a spontaneous preference for a work of art to

a blissful experience of transcendence are identified and

described dominic mciver lopes articulates and defends a

buck passing theory of art namely that a work of art is

nothing but a work in one of the arts having traced

philosophical interest in theories of art to a reaction to

certain puzzle cases of avant garde art he argues that none

of the theories that have dominated philosophy since the

1960s adequately copes with these works whereas these

theories have reached a dialectical impasse wherein they

reiterate and cannot resolve disagreement over the puzzle

cases the buck passing theory illuminates the radical

provocations of avant garde art in addition when

supplemented by a systematic framework for crafting

theories of the individual arts the buck passing theory

grounds our empirical inquiries into the arts as well as our

practices of appreciation and art criticism lopes seeks to

model the diverse strategies employed by humanists and

social and behavioural scientists who study the different

arts he gives the specificity of each art form a central role in

our appreciative endeavours and yet he stresses the

continuity of the arts with similar non art activities such as

fashion design sports and games cuisine nature

etc
