rational rock salt phase engineering of nickel rich layered *Oct 24 2021*

□□□ 2024□5□15□ ni rich layered cathodes promise high energy density yet suffer from dramatic rate and capacity decay on cycling which is originated from chemo mechanical failures with fast growth of electrical and ionic insulating rock salt phase on the surface apart from general approaches of applying inert coating lay

programmable singlet oxygen battery for automated *Sep 22 2021*

□□□ 2024□5□16□ the efficacy of photodynamic therapy is hindered by the hypoxic environment in tumors and limited light penetration depth the singlet oxygen battery sob has emerged as a promising solution enabling oxygen and light independent 1o2 release however conventional sob systems typically exhibit an always on 1o2

engineering giant arup named as target of 25 million *Aug 22 2021*

□□□ 5 □□ an engineering giant behind apple s hq and the sydney opera house lost 25 million when scammers tricked an employee with a deepfake of a senior exec alexandra bacon may 17 2024 3 14 am pdt

chlorogenic acid linoleic acid fortified wheat resistant *Jul 21 2021*

□□□ 2024□5□13□ this study aimed to investigate alterations in gut microbiota and metabolites mediated by wheat resistant starch and its repair of gut barrier dysfunction induced by a high fat diet hfd structural data revealed that chlorogenic acid ca linoleic acid la functioned through noncovalent interactions to form a more
