in this new book julie cross examines the intricacies of textual humor in contemporary junior literature using the tools of literary criticism and humor theory cross investigates the dialectical paradoxes of humor and debunks the common belief in oppositional binaries of simple versus complex humor the varied combinations of so called high and low forms of humor within junior texts for young readers who are at such a crucial stage of their reading and social development provide a valuable commentary upon the culture and values of contemporary western society making the book of considerable interest to scholars of both children s literature and childhood studies cross explores the ways in which the changing content forms and functions of the many varied combinations of humor in junior texts including the lemony snickett series reveal societal attitudes towards young children and childhood the new compounds of seemingly paradoxical high and low forms of humor in texts for developing readers from the 1960s onwards reflect and contribute to contemporary society s hesitant and uneven acceptance of the emergent paradigm of children s rights abilities participation and empowerment cross identifies four types of potentially subversive transgressive humor which have emerged since the 1960s which coupled with the three main theories of humor relief superiority and incongruity theories enables a long overdue charting of developments in humor within junior texts cross also argues that the gradual increase in the compounding of the simple and the complex provide opportunities for young readers to play with ambiguous complicated ideas helping them embrace the complexities and contradictions of contemporary life

as the first part of the title indicates my interest in looking at intertextuality and transformation still maintains a prominent place throughout this book as well if we believe that no text is an island then we will understand that the relationships between and within texts across the years become a fascinating place for academic inquiry i included the word boundaries into the title because we never get tired of voicing our opinions about texts which traverse relegated boundaries such as genre or medium not only am i interested in discussing what these changes across boundaries mean socially historically and culturally but also what they mean geographically which accounts for the second part of my title i am very excited that this book will be placing even more emphasis on children s literature in an international scene than my first book did in the sense that i have added more scholars on an international level i hesitate to list the nationalities of all of the contributors here because quite a few have themselves crossed international boundaries in different ways by either studying abroad or finding permanent residency in foreign countries nevertheless the writers have lived extensively in or identify as being from australia canada england finland germany greece iceland ireland israel norway spain sweden turkey the united states of america and wales introduction

friendship has always been a universal category of human relationships and an influential motif in literature but it is rarely discussed as a theme in its own right in her study of how friendship gives direction and shape to new ideas and novel strategies of plot character formation and style in the british novel from the 1760s to the 1830s katrin berndt argues that friendship functions as a literary expression of philosophical values in a genre that explores the psychology and the interactions of the individual in modern society in the literary historical period in which the novel became established as a modern genre friend characters were omnipresent reflecting enlightenment philosophy s definition of friendship as a bond that civilized public and private interactions and was considered essential for the attainment of happiness berndt s analyses of genre defining novels by frances brooke mary shelley sarah scott helen maria williams charlotte lennox walter scott jane austen and maria edgeworth show that the significance of friendship and the increasing variety of novelistic forms and topics represent an overlooked dynamic in the novel s literary history contributing to our understanding of the complex interplay of philosophical socio cultural and literary discourses that shaped british fiction in the later hanoverian decades berndt s book demonstrates that novels have conceived the modern individual not in opposition to but in interaction with society continuing enlightenment debates about how to share the lives and the experiences of others
