1851

a comprehensive treatise with detailed analysis of every aspect of copyright law from registration to licensing to infringement and litigation written by paul goldstein professor of law at stanford university and of counsel to morrison foerster includes explanations of applicable copyright law to the music publishing motion picture commercial art and software industries also covers international copyright law as well as the intersection of copyright law with bankruptcy antitrust law and lanham

act doctrines that fill in the gaps in traditional copyright protection

## **Personal History of King Charles the Second**

1848

the royal society of canada s mandate is to elect to its membership leading scholars in the arts humanities social sciences and sciences lending its seal of excellence to those who advance artistic and intellectual knowledge in canada duncan campbell scott one of the architects of the indian residential school system in canada served as the society s president and dominated its activities many other members historically overwhelmingly white men helped shape knowledge systems rooted in colonialism that have proven catastrophic for indigenous communities written primarily by current royal society of canada members these essays explore the historical contribution of the rsc and of canadian scholars to the production of ideas and policies that shored up white settler privilege underpinning the disastrous interaction between indigenous peoples and white settlers historical essays focus on the period from the rsc s founding in 1882 to the mid twentieth century later chapters bring the discussion to the present documenting the first steps taken to change damaging patterns and challenging the society and canadian scholars to make substantial strides toward a better future the highly educated in canadian society were not just bystanders they deployed their knowledge and skills to abet colonialism this volume dives deep into the rsc s history to learn why academia has more often been an aid to colonialism than a force against it royally wronged poses difficult questions about what is required for individual academics fields of study and the rsc to move meaningfully toward reconciliation

**Reliquiae antiquae Scotiae, illustrative of civil and ecclesiastical affairs [ed.] from orig. MSS. [by G.R. Kinloch].**

1848

reprint of the original first published in 1871 the publishing house anapiposi publishes historical books as reprints due to their age these books may have missing pages or inferior quality our aim is to preserve these books and make them available to the public so that they do not get lost

**Reliquiae Antiquae Scotiae**

1991-07

effect of high pressure technologies on enzyme science and applications provides a deep practical discussion of high pressure processing hpp and high pressure homogenization hph technologies and biochemical approaches applied across research and industry with applications ranging from food to pharmaceuticals and commercial enzyme production early chapters discuss foundational aspects of hpp and hph approaches the science of enzyme modification and basic aspects of enzyme activity stability and structure as studied in biochemical processes later chapters consider the effect of hpp and hph technologies and their mechanisms of controlling enzyme modification to improve enzyme performance for chosen applications special attention is paid to the application of hpp and hph technologies and enzyme modifications in food processing microbial enzyme modification drug discovery and production of other

commercial enzymes as well as the challenges of undesirable enzyme inactivation the final chapter discusses future directions of the field and technologies and expanded applications offers a broad overview of hpp and hph approaches and technologies applied in enzyme modification introduces fundamental aspects of enzyme activity stability and structure as studied in biochemical processes and applications discusses applications of hpp and hph based enzyme modifications in food processing microbial enzyme modification drug discovery and production of other commercial enzymes includes chapter contributions from international leaders in the field across research and industry

why did large numbers of scots leave a temperate climate to live permanently in parts of the world where greater temperature extreme was the norm the long nineteenth century was a period consistently cooler than now and scotland remains the coldest of the british nations nineteenth century meteorologists turned to environmental determinism to explain the persistence of agricultural shortage and to identify the atmospheric conditions that exacerbated the incidence of death and disease in the towns in these cases the logic of emigration and the benefits of an alternative climate were compelling emigration agents portrayed their favoured climate in order to pull migrants in their direction the climate reasons pressures and incentives that resulted in the movement of people have been neither straightforward nor uniform there are known structural features that contextualize the migration experience chief among them being economic and demographic factors by building on the work of historical climatologists and the availability of long run climate data for the first time the emigration history of scotland is examined through the lens of the nation s climate in significant per capita numbers the scots left the cold country behind yet the homeland remained an unbreakable connection for the diaspora
