excerpt from papers on psycho analysis the papers here collected have already appeared in print for the most part in psychological journals that do not circulate widely among the medical profession they constitute a selection of the authors contributions made during the past few years on the subject of psycho analysis and are now issued in a more accessible form in the hope of arousing further interest in this overneglected and important branch of scientific investigation being under no illusions as to any intrinsic importance of the papers apart from the subject to which they relate or therefore as to their documentary value the author has not hesitated to alter considerably their original form by modifications and additions wherever this has seemed desirable they have been grouped under five headings according to the particular topic with which they deal but otherwise are printed in the order of their publication having regard to the difference in the familiarity with french and german respectively in this country the author has left the quotations from the former language in the original and has appended translations to those from the latter a certain amount of repetition is unavoidable in a book thus constructed but this presents advantages as well as disadvantages a new thought has usually to be expressed more than once before the full import of it is appreciated a more serious defect against which those unfamiliar with the subject should especially be warned is the extensive incompleteness of the book as an exposition of the freudian theory about the publisher forgotten books publishes hundreds

excerpt from papers on psycho analysis the subject of psycho analysis which may be defined as the study of unconscious mentation was thus gradually extended as one field after another opened up and with increasing knowledge it became more and more possible to trace the indirect operations of the unconscious even where at first sight their existence was hardly or not at all suspected or to put the matter in another way it has become more and more possible to detect the contribution made by the unconscious to various modes of mental activity that have hitherto been thought to be purely conscious in both appearance and origin having regard to the primitive nature of the unconscious one about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at

## **Shadow and Self 1990**

george h mead 1863 1931 is a central founding figure of modern sociology comparable to karl marx and max weber mead s early work prior to his posthumous publications that appeared after 1932 is believed to be a series of articles contemporary scholarship defines as disconnected a previously unknown never published set of galleys for a book of essays by mead written between 1892 and 1910 unites these articles into a logical perspective essays in social psychology mead s first book clearly locates him within a significantly different tradition and network than documented in his posthumous volumes the discovery of this work is a major scholarly event instead of being abstract and unemotional as some scholars argue mead s early scholarship focuses on the significance of emotions instincts and childhood as well as political issues underlying political problems in chicago during these early years he was involved with the emerging laboratory schools at the university of chicago which was then the center of progressive education these early topics interpretations and scholarly networks are dramatically different in these writings from those of mead as a mature scholar they demonstrate that he was clearly making a transition from psychology to social psychology at a time when the latter was in its infancy mary jo deegan a world renowned meadian scholar has comprehensively edited this volume footnoting now obscure references and authors her introduction explains how this previously lost manuscript affects contemporary meadian scholarship and how it reflects the city and times in which he lived unlike the posthumous volumes assembled from lecture notes essays in social psychology is the only book actually written by mead and challenges most current scholarship on him the selections are highly readable surprisingly timely yet historically significant psychologists sociologists and educators will find it immensely important
