Final Report and Working Papers 1976 this book is the first to connect global labor history and the history of human rights by focusing on democratic labor oppositions in Spain and Poland between 1960 and 1990 it shows how workers in authoritarian regimes addressed repression and whether they developed a language of rights in the light of a globally dynamic human rights discourse the study argues that the democratic labor oppositions in Spain and Poland were both variants of emancipatory and democracy oriented social movements with global interconnections that emerged in the 1960s it reveals that the demands for free and independent trade unions which in both countries became a flashpoint in the fight for broader democratic demands was not always discussed in rights terms but rather presented as an inevitable necessity at the same time these labor movements and their intellectual allies morally delegitimized state repression against workers and thereby employed the concepts of democracy participation solidarity progress and eventually rights integrating the history of two European semi peripheral societies into a broader narrative this book is relevant for readers interested in global labor history human rights history and the history of democratization in Europe in the late twentieth century

Lloyd's Register of American Yachts 1994-10-31 interdisciplinary in nature the book crosses thematic as well as genre boundaries in a style regarded as transversal the poetical essays that comprise the story are full of both literary and philosophical allusions yet also devoid of theoretical terms or references and therefore read like fiction that may be the reason why the work became a non fiction bestseller in Spain shortly after its original publication

Computerworld 2020-04-01 a place in politics is a thorough reinterpretation of the politics and political culture of the Brazilian state of São Paulo between the 1890s and the 1930s the world's foremost coffee producing region from the outset of this period and home to more than six million people by 1930 São Paulo was an economic and demographic giant in an era marked by political conflict and dramatic social and cultural change in Brazil nowhere were the conflicts as intense or changes more dramatic than in São Paulo the southeastern state was the site of the country's most important political developments from the contested presidential campaign of 1909 10 to the massive military revolt of 1924 drawing on a wide array of source materials James P. Woodard analyzes these events and the republican political culture that informed them Woodard's fine grained political history proceeds chronologically from the final years of the nineteenth century when São Paulo's leaders enjoyed political preeminence within the federal system codified by the constitution of 1891 through the mass mobilization of 1931 32 in which São Paulo's people marched rioted and eventually took up arms against the national government in what was to be Brazil's last great regionalist revolt in taking to the streets in the name of their state constitutionalism and the civilization that they identified with both the people of São Paulo were at once expressing their allegiance to elements of a regionally distinct political culture and converging on a broader more participatory public sphere that had arisen amid the political conflicts of the preceding decades

Southey's Poetical Works 1976 the early works of paul auster convey the loneliness of the individual fully committed to the work of writing as if he were confined within the book that dominates his life all through auster s poetry essays and fiction the work of writing is an actual physical effort an effective construction as if the words aligned in the poem text were stones to place in a row when building a wall or some other structure in stone this book studies the symbolism of the genetic substance of the world re built through the work of writing inside the walls of the room closed in space and time though open to an unlimited mental expansion paul auster s work is an aesthetic literary self reflection about the mission of writing the writer character is like an inexperienced god whose hands may originate either cosmos or chaos life or death hence auster s recurring meditation on the work and the power of writing at the same time an autobiography and a self criticism the stones the wall and the room the words the page and the book are the ontological structure of the imaginary cosmos generated in paul auster s mind like a real world born of the magma of words lost in another interior world
