Carefully sequenced pedagogy guides students through the steps of writing simple compound and complex sentences. Discusses the emphasis that protestant clergymen placed on the physician's vocation, the focus that catholic moralists put on specific dilemmas faced in daily medical practice, and the loss of unchallenged authority experienced by doctors after world war ii when practitioners became valued for their technical competence rather than their personal integrity. Imber shows how the clergy gradually lost their impact in defining the physician's moral character and how vocal critics of medicine contributed to a decline in patient confidence. The author argues that as modern medicine becomes defined by specialization, rapid medical advance, profit driven industry, and ever more anxious patients, the future for a renewed trust in doctors will be confronted by even greater challenges. Foreword by Jane Goodall. A former student and colleague of Jane Goodall shares stories of chimps and their heroes and takes readers on a journey to save man's closest relative. Unbeknownst to much of the public, chimps are in trouble. Censuses show them to be extinct in four African countries and nearly so in ten others. A large percentage of the remaining populations live in unprotected, increasingly fragmented forests. When Nancy Merrick learned these startling facts in 2009, she decided it was past time to discover the extent to which chimpanzees are at risk across Africa and what can be done. Merrick had begun working with primates in 1972 as a young field assistant in Jane Goodall's famous Gombe Camp. Like the rest of the world at the time, she was swept up in the excitement of discovering the remarkable world of chimpanzees, their ability to fashion tools, their dazzling intelligence, and their complex relationships and societies. From that moment on, her human-centered worldview shifted, and she became a devoted advocate for our closest genetic relatives. When Merrick returns to Africa decades later, she's alarmed by how much has changed. Human activity such as agriculture and logging has encroached on natural habitats throughout equatorial Africa, endangering chimpanzees, gorillas, and bonobos. In an effort to understand what we can do to save great apes, Merrick connects with primatologists and conservationists who are trying to protect the last great forests. Visits to some of Africa's parks, sanctuaries, and expanding agricultural areas reveal the urgency of the problems and the inspiration of the

people leading the search for solutions along the way merrick demonstrates that the best hope for chimps and other great apes lies in connecting conservation to humanitarian efforts ensuring a healthy future for animals and humans alike among chimpanzees is at once an inspiring chronicle of merrick s personal search to learn how chimps are faring across africa and in captivity a crucial eyewitness account of a very critical period in their existence and a rousing call for us to join the efforts to be a voice for the chimpanzees before it s too late offers a modern and different perspective includes updated content to reflect latest research findings each chapter ending has references to related material on the web this brief guide can supplement any political science course and provides valuable information about conducting research on the internet

foreword by jane goodall a former student and colleague of jane goodall shares stories of chimps and their heroes and takes readers on a journey to save man s closest relative unbeknownst to much of the public chimps are in trouble censuses show them to be extinct in four african countries and nearly so in ten others a large percentage of the remaining populations live in unprotected increasingly fragmented forests when nancy merrick learned these startling facts in 2009 she decided it was past time to discover the extent to which chimpanzees are at risk across africa and what can be done merrick had begun working with primates in 1972 as a young field assistant in jane goodall s famous gombe camp like the rest of the world at the time she was swept up in the excitement of discovering the remarkable world of chimpanzees their ability to fashion tools their dazzling intelligence and their complex relationships and societies from that moment on her human centered worldview shifted and she became a devoted advocate for our closest genetic relatives when merrick returns to africa decades later she s alarmed by how much has changed human activity such as agriculture and logging has encroached on natural habitats throughout equatorial africa endangering chimpanzees gorillas and bonobos in an effort to understand what we can do to save great apes merrick connects with primatologists and conservationists who are trying to protect the last great forests visits to some of africa s parks sanctuaries and expanding agricultural areas reveal the urgency of the problems and the inspiration of the people leading the search for solutions along the way merrick demonstrates that the best hope for chimps and other great apes lies in connecting conservation to humanitarian efforts ensuring a healthy future for animals and humans alike among chimpanzees is at once an inspiring chronicle of merrick s personal search to learn how chimps are faring across africa and in captivity a crucial eyewitness account of a very critical period in their existence and a rousing call for us to

join the efforts to be a voice for the chimpanzees before it s too late
