today we are used to clear divisions between science and the arts but early modern thinkers had no such distinctions with knowledge being a truly interdisciplinary pursuit each chapter of this collection presents a case study from a different area of knowledge

after the flying saucers came is a comprehensive account of the stories the people and the strange events that went into making the fascination with ufos and aliens a worldwide phenomenon among believers skeptics and the simply curious it traces how an odd sighting of flying saucers by an american pilot in 1947 inspired governments the media scientists writers and the general public to consider the possibility that extraterrestrials were visiting earth aimed at students of history this volume originally published in 1928 examines the issues of impartiality and objectivity in the study of history it also discusses the skills necessary for any would be historian including the knowledge of foreign languages the use of sources and note taking
