Facilities Management

2013-04-15

this text provides an overview of the interdisciplinary nature of facilities management it discusses the framework within which facilities managers should operate and the key requirements of their task

Management, a Bibliography for NASA Managers

1984

while there continues to be refinement in defining and assessing sustainable management there remains the urgent need for policies that create the conditions that support sustainability and can halt or slow destructive practices already underway carol colfer and her contributors maintain that standardized solutions to forest problems from afar have failed to address both human and environmental needs such approaches they argue often neglect the knowledge that local stakeholders have accumulated over generations as forest managers and do not address issues involving the diversity and well being of groups within communities the contributors note that these problems persist despite clear evidence that equity and social relationships including gender roles are important factors in the ways that communities adapt to change and manage forest resources overall the equitable forest offers an alternative to traditional externally organized strategies for forest management termed adaptive collaborative management acm the approach tries to better acknowledge the diversity complexity and unpredictability of human and natural systems acm works to strengthen local institutions and use the knowledge and capacity of groups in local communities to enhance the health and well being of both forests and the people who live in and around them the equitable forest provides a detailed explanation of the descriptive analytical and methodological tools of acm along with accounts of early stages of its implementation in tropical regions of asia africa and latin america although the contributors make it clear that it is too soon to evaluate the efficacy of acm their work is supported by evidence that rural communities do make important contributions when involved in formal forest management that management strategies are most effective when flexible and tailored to local contexts and that efforts by outside governmental and nongovernmental organizations to support local management are feasible from the policymaking perspective and desirable for their impact on human economic and environmental well being

Management

1986

this ibm redpapertm publication introduces you to ibm cloud provisioning and management for z os the paper was written to coincide

with the announcement of ibm cloud provisioning and management for z os and the software is not yet generally available ga at the time of this writing as such any examples that are shown are subject to change at any time before the software is ga the goal of this paper is to provide you with an initial overview and more information to support the announcement you might be new to clouds or heard of many different variations of what a cloud might be therefore it is useful to begin with establishing an understanding of cloud computing concepts the paper describes the provisioning and management of z os middleware and explains how these aspects can be offered as a cloud service

Management: A Bibliography for NASA Managers

1992

the increasing demand of processing a higher number of applications and related data on computing platforms has resulted in reliance on multi many core chips as they facilitate parallel processing however there is a desire for these platforms to be energy efficient and reliable and they need to perform secure computations for the interest of the whole community this book provides perspectives on the aforementioned aspects from leading researchers in terms of state of the art contributions and upcoming trends

The Equitable Forest

2010-09-30

globally forest vegetation and soils are both major stores of terrestrial organic carbon and major contributors to the annual cycling of carbon between the atmosphere and the biosphere forests are also a renewable resource vital to the everyday existence of millions of people since they provide food shelter fuel raw materials and many other benefits the combined effects of an expanding global population and increasing consumption of resources however may be seriously endangering both the extent and future sustainability of the world s forests about thirty chapters cover four main themes the role of forests in the global carbon cycle effects of past present and future changes in forest land use the role of forest management products and biomass on carbon cycling and socio economic impacts

IBM Cloud Provisioning and Management for z/OS: An Introduction

2016-10-03

this guide provides an integrated structured process for managing risks in islamic banks it includes risk identification measurement and mitigation and compares risk management in conventional and islamic banks

Design Space Exploration and Resource Management of Multi/Many-Core Systems

2021-05-10

this title was first published in 2003 there has been increasing recognition around the world that wetlands are fragile ecosystems which require sensitive and sustainable management if they are to continue to provide their range of functions and benefits these functions and benefits which include contributions to food security and environmental regulation play a critical role in sustaining rural livelihoods in many developing countries drawing upon research carried out in the area this book identifies and discusses the importance of wetlands to local communities in south west ethiopia and in particular how indigenous wetland management practices contribute to sustainable wetland use as the basis of wetland management particular attention is paid to the role of indigenous knowledge systems and how knowledge of wetland functioning is acquired disseminated developed and applied by local communities in their wetland management strategies critically this community knowledge is examined in the context of scientific data specifically that obtained from a wetland hydrology monitoring programme thereby drawing attention to the strengths and weaknesses of both systems this has major implications not only for the ways in which wetlands and other natural resources are managed at the local level but also for the wider rural development strategies of governments and non governmental organizations

Forest Ecosystems, Forest Management and the Global Carbon Cycle

2013-06-29

for reseach in all subjects and among different philisopical paradigms research methodologies form one of the key issues to rely on this volume brings a series of papers together which present different research methodologies as applied in supply chain management this comprises review oriented papers that look at what kind of methodologies have been applied as well as methodological papers discussing new developments needed to successfully conduct research in supply chain management the third group is made up of applications of the respective methodologies which serve as examples on how the different methodological approaches can be applied all papers have undergone a review process to ensure their quality therefore we hope that this book will serve as a valid source for current and future researchers in the field while the workshop on research methodologies in supply chain management took place at the supply chain management center carl von ossietzky univ sity in oldenburg germany it is based on a collaboration with the supply chain management group of the department of operations management at the cop hagen business school and the department of production management at the vienna university of economics and business administration we would like to thank all those who contributed to the workshop and this book

Risk Management for Islamic Banks

2013-02-19

the reform of public administration to adapt to the pressures and new requirements of an ever changing world has become a major global phenomenon this study has been produced by the international institute of administrative sciences and the european centre for development policy management

Indigenous Management of Wetlands: Experiences in Ethiopia

2018-02-06

management control and uncertainty recognizes that all control takes place under conditions of uncertainty it does now and it always has done in this edited collection the contributing authors examine different aspects of management control systems in the modern world whilst paying more explicit attention to the ubiquitous nature of uncertainty

Research Methodologies in Supply Chain Management

2006-01-16

much attention has been focused in recent years on the transformation of the economies of eastern and central europe and the former soviet union however a growing demand for policy advice technical assistance and expertise is also coming from asian reforming countries such as china mongolia vietnam laos and cambodia in addition business communities abroad are increasingly interested in exploring investment and marketing opportunities in these reforming countries such developments are too important to overlook or ignore the transformation of socialist economies towards market based systems entails an unusually wide range of problems studies of related topics are complicated by the speed of the changes and the lack of clear historical precedents although the structural features of asian reforming economies are in important ways different from those of the eastern european economies all socialist economies share similar fundamental conditions on the eve of economic reform which raise a similar set of reform issues this volume brings together a rich collection of expertise and information in an attempt to shed some light on the transitional process in asia the contributions are by no means exhaustive however they provide the reader and analyst with an excellent starting point to the problems and prospects which are specific to asian transforming economies

A Framework for Future Training in Marine and Coastal Protected Area Management

1998

this book generates a comprehensive overview of the recent advances in concepts technologies and applications that enable advanced business process management in various enterprises provided by publisher

Management of Public Service Reform

1998

this is an open access book the aim of 2022 6th international seminar on education management and social sciences isemss 2022 is to bring together innovative academics and industrial experts in the field of education management and social sciences to a common forum the primary goal of the conference is to promote research and developmental activities in education management and social sciences and another goal is to promote scientific information interchange between researchers developers students and practitioners working all around the world the conference will be held every year to make it an ideal platform for people to share views and experiences in education management and social sciences and related areas

Management Control and Uncertainty

2014-11-25

management of water demand in africa and the middle east current practices and future needs

Economic Management and Transition Towards a Market Economy

1996-10-04

in recent years there have been a number of catastrophic floods that have resulted in a tragic loss of life these natural disasters highlight the need to further understand the occurrence phenomena to improve forecasting techniques and to develop procedures and contingency plans to minimise the flood impact this volume contains contributions from the 3rd international conference on floods and flood management held in florence in november 1992 the volume is timely and provides an important overview for engineers scientists

managers and researchers of the latest developments in technology analysis and management

Business Enterprise, Process, and Technology Management: Models and Applications

2012-03-31

proceedings of a workshop on reef fishery management held october 7 10 1980 at st thomas virgin islands of the united states

Solid Waste Management and the Paper Industry

1979

maintenance safety risk management and life cycle performance of bridges contains lectures and papers presented at the ninth international conference on bridge maintenance safety and management iabmas 2018 held in melbourne australia 9 13 july 2018 this volume consists of a book of extended abstracts and a usb card containing the full papers of 393 contributions presented at iabmas 2018 including the t y lin lecture 10 keynote lectures and 382 technical papers from 40 countries the contributions presented at iabmas 2018 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of bridge maintenance safety risk management and life cycle performance major topics include new design methods bridge codes heavy vehicle and load models bridge management systems prediction of future traffic models service life prediction residual service life sustainability and life cycle assessments maintenance strategies bridge diagnostics health monitoring non destructive testing field testing safety and serviceability assessment and evaluation damage identification deterioration modelling repair and retrofitting strategies bridge reliability fatigue and corrosion extreme loads advanced experimental simulations and advanced computer simulations among others this volume provides both an up to date overview of the field of bridge engineering and significant contributions to the process of more rational decision making on bridge maintenance safety risk management and life cycle performance of bridges for the purpose of enhancing the welfare of society the editors hope that these proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems including students researchers and engineers from all areas of bridge engineering

Proceedings of the 2022 6th International Seminar on Education, Management

and Social Sciences (ISEMSS 2022)

Maintenance, Safety, Risk, Management and Life-Cycle Performance of Bridges

2018-07-04

water reuse management is one of the challenges all water scarce countries have to deal with in the coming decades the present book highlights non conventional solutions within the field of wastewater treatment and reuse predominantly for professionals and decision makers it focuses on technologies which are reliable sustainable low cost and suitable for rural and sub urban areas in addition particularly innovative on site concepts are presented

Water Management in Africa and the Middle East

1996

volume 2 of this 4 volume set tackles the problems presented by diseases in vegetable crops that can reduce yield and quality the effective management of plant diseases involves a detailed study of the disease symptoms causal agents disease cycles and epidemiology written by nationally known scientists in their respective fields the chapters incorporate the experience and knowledge of the authors the chapters provide an introduction along with plant disease symptoms causal organisms disease cycles epidemiology and effective management solutions for diseases of economically important vegetables some of the vegetables addressed include brinjal or eggplant chili cole crops such as broccoli brussels sprouts cabbage cauliflower collards kale and kohlrabi cucurbits gourds garlic green peas potatoes and more the volumes provide an abundance of information for understanding and managing plant diseases with emphasis on diagnostic techniques the collection includes volume 1 fruit crops volume 2 vegetable crops volume 3 ornamental plants and spice crops volume 4 important plantation crops medicinal crops and mushrooms

Workshop on Land Protection and Management

1982

this book takes a new and critical look at the underlying factors that affect the management of water resources and its content is guided by three important visions with the theory vision the existing knowledge system for iwrms is reorganized in order to supplement new theories related to our society and science we then introduce two distinctive case studies on how to achieve sustainable water management based on the social implementation vision one study is carried out by the research institute for humanity and nature on indonesia s bali island where there is a long history of educational and inspirational local level water management systems with multistakeholder participation a further study is based on the harmony between science and society vision and the ritsumeikan global innovation research organization ritsumeikan university proposes innovative water recycling system for the sustainable development of chongming island an eco island that belongs to china these two studies highlight science with society a new perspective on science that could promisingly lead to more sustainable futures this book offers a valuable reference guide for all stakeholders and scholars active in water resources management

Strategic Information Technology and Portfolio Management

2009-03-31

students trying to navigate the strategy jungle may lose sight of the fact that strategic management is about creating value in an

organization understanding strategic management is a core part of all business qualifications and this textbook brings a new and easy to follow understanding of this vital business function in addition to walking the student through the basics of the subject the authors provide an array of analytical tools to help facilitate a thorough understanding of strategic management the book addresses thoroughly the impact of financial markets on a firm s strategic capabilities as well as looking at other challenging environmental factors aided by an array of student friendly features such as learning objectives strategic management in practice case studies and review questions in each chapter strategic management will help students to excel in their strategic management classes and better prepare them for the real business world a comprehensive companion website containing a wealth of supplementary materials for students and lecturers alike is available at routledge.com/cw/fitzroy

Air Quality Management

1995-01-01

numerous clothing industries face highly dynamic environments and growth in this environment depends upon both external and internal factors external factors are represented by aggressive competition and volatile product demand internally the industry must face an increasingly shorter life cycle of the product and the need to innovate both product and organizational development the competitive advantage of the industry lies in its ability to design a value creating system based on the management of both external and internal relationships the successful management of these relationships relies not only on successful customer relationship management but also on effective product supply and demand upkeep management and inter intra organizational relationships in the textile and apparel industry provides emerging research exploring relevant theoretical frameworks and the latest empirical research underlining the complexity of management applications within the textile industry featuring coverage on a broad range of topics such as consumer relationships cultural identity and organizational culture this book is ideally designed for researchers academicians professionals and students working in various disciplines including management industrial organization organizational behavior human resource management decision science design science and information and communication moreover the book will provide insights and support executives and managers of the textile and apparel industry concerned with the ethic design contamination and the management relationships with workers customers suppliers the community and organizational development

Water Pollution Management

1995

droughts have formed an inseparable part of south asian history and culture with tragic consequences for a region that houses the greatest number of the world s poor however this volume challenges the popular conception of drought which is presented as an absolute shortage scarcity with respect to an implicit understanding of the sufficiency of water it highlights the fact that while

available water supplies may be a given quantum droughts are differentially experienced politically inspired and socially constituted it emphasises that the relative water scarcity needs to be appreciated and argues that water scarcity means different things for diverse constituencies of water users policy prescriptions based on definitional premises will be flawed as a misrepresentation of drought as merely water scarcity serves a political agenda the editors and contributors of this volume critically evaluate the concept of drought the way it is defined its origin derivation and the purposes interests it serves this book is broadly divided into three major sections the thematic section country overviews and case studies through these it attempts to understand the concept of drought map diversity in drought situations across south asia identify responses to drought outline viable options for more integrated approaches to drought policies and mitigation strategies initiate a process of dialogue on a more comprehensive public policy for drought management comprehensive thought provoking informative and featuring new research data this collection will provide policy makers and professionals with the opportunity to discuss and debate policies for sustainable livelihood support systems and drought management it would also be an invaluable source of information for students and teachers working in the fields of water and natural resource management environmental planning agricultural economics rural development public policy and public administration

Efficient Management of Wastewater

2008-01-12

the incursion of information and communication technologies ict in health care entails evident benefits at the levels of security and efficiency that improve not only the quality of life of the patients but also the quality of the work of the health care professionals and the costs of national health care systems leaving research approaches aside the analysis of ict in health care shows an evolution from the initial interest in representing and storing health care data i.e. electronic health care records to the current interest of having remote access to electronic health care systems as for example hl7 initiatives or telemedicine this sometimes imperceptible evolution can be interpreted as a new step of the progress path of health care informatics whose next emerging milestone is the convergence of current solutions with formal methods for health care knowledge management in this sense k4care is a european project aiming at contributing to this progress path it is centered on the idea that health care knowledge represented in a formal way may favor the treatment of home care patients in modern societies the project highlights several aspects that are considered relevant to the evolution of medical informatics health care knowledge production health care knowledge integration update and adaptation and health care intelligent systems

Upper Columbia River Basin Ecosystem Based Lands Management Plan [ID,WY,UT,MT,NV]

1997

this book constitutes the refereed proceedings of ten international workshops held in innsbruck austria in conjunction with the 13th international conference on business process management bpm 2015 in september 2015 the seven workshops comprised adaptive case management and other non workflow approaches to bpm adaptivecm 2015 business process intelligence bpi 2015 social and human aspects of business process management bpms2 2015 data and artifact centric bpm dab 2015 decision mining and modeling for business processes demimop 2015 process engineering iwpe 2015 and theory and applications of process visualization taproviz 2015 the 42 revised papers presented were carefully reviewed and selected from 104 submissions in addition four short papers and one keynote from taproviz are also included in this book

Encyclopaedia of Energy Resource Management

2000

water is critical to all human activities but access to this crucial resource is increasingly limited by competition and the effects of climate change in agriculture water management is key to ensuring good and sustained crop yields maintaining soil health and safeguarding the long term viability of the land water management is especially challenging on smallholder farms in resource poor areas which tend to be primarily rainfed and thus highly dependent on unreliable rainfall patterns sustainable practices can help farmers promote the development of soils plants and field surfaces to allow maximum retention of water between rains and encourage the efficient use of each drop of water applied as irrigation especially useful for farmers groups agricultural extension workers ngos students and researchers working with farmers in dryland areas this comprehensive yet concise book is a practical and accessible resource for anyone interested in sustainable water management
