## **Criminal Justice and Criminology Research Methods**

2014-03-12

criminal justice and criminology research methods third edition is an accessible and engaging text that offers balanced coverage of a full range of contemporary research methods filled with gritty criminal justice and criminology examples including policing corrections evaluation research forensics feminist studies juvenile justice crime theory and criminal justice theory this new edition demonstrates how research is relevant to the field and what tools are needed to actually conduct that research kraska brent and neuman write in a pedagogically friendly style yet without sacrificing rigor offering balanced coverage of qualitative quantitative and mixed methods with its exploration of the thinking behind science and its cutting edge content the text goes beyond the nuts and bolts to teach students how to competently critique as well as create research based knowledge this book is suitable for undergraduate and early graduate students in us and global criminology criminal justice and justice studies programs as well as for senior scholars concerned with incorporating the latest mixed methods approaches into their research

## **Research Methods in Psychology**

1996

the second edition of paul g nestor and russell k schutt s successful and unique research methods in psychology investigating human behavior draws from substantive research stories to illustrate how research is presented while systematically unifying the entire research process within a conceptual framework this accessible text examines engaging research studies and examples considering research ethics throughout this is a great text that

emphasizes the important concepts within research methods the resources are excellent they incorporate up to date research and technology and introduce the student to empirical articles and the information is presented in a way that challenges the student to apply the material maria pacella kent state university the text is comprehensive it covers a wide variety of information without being overwhelming this is a very good textbook for an introductory course in research methods i like that its focus is on psychological research specifically angela m heads prairie view a m university

## **Rice Research in Asia**

2005-09-05

in order to achieve economic efficiency research organizations have established rigorous quantitative methods for priority setting one such organization the rockefeller foundation has drawn on this report to help determine the research goals it should emphasize in its funding a review of the problem of priority setting is presented followed by a discussion of approaches that have been used previously several chapters demonstrate how a number of areas of plant science research have contributed to gains in rice productivity and also assess the current challenges of genetic improvement and pest control the economic framework for priority setting and previous methods are reviewed followed by a series of country case studies which provide more practical applications

## **Review of the HIVNET 012 Perinatal HIV Prevention Study**

2008

mother to child transmission of hiv 1 afflicts hundreds of thousands of children every year especially in parts of the world such as sub saharan africa where hiv infection is prevalent and resources are limited this tragic reality has spurred researchers to search for an effective safe and inexpensive treatment that could reduce the risk of perinatal hiv transmission the hivnet 012 trial was designed to provide preliminary information on the comparative safety and efficacy of two relatively simple and inexpensive short courses of oral antiretroviral treatment likely to be feasible in resource limited settings the resulting report identified some problems with procedures and documentation but concluded that these issues did not compromise the results of the study however these issues have led to public scrutiny and continued controversy review of the hivnet 012 perinatal hiv prevention study critically and objectively evaluates the study s design and conduct and assesses the impact of the initial procedural issues on the validity of the overall findings and conclusions of the trial

## **A Podiatrist's Guide to Using Research**

2001

introduction what this book can do for you what it is all about a good answer needs a good question the truth is out there separating the wheat from the chaff the what and why of research don t lose it use it what difference does it make doing it at work what it was all about

## **Ethical and Policy Issues in International Research: Commissioned papers and staff analysis**

## Doing Research in Psychological Therapies

2001-05-31

the book considers issues relating to accountability in social research by juxtaposing seven ways of approaching the issues and by moving toward the development of a particular approach to the earning of trust on the part of researchers a conception of the practice and assessment of discursive accountability is presented as an option for consideration the book grapples with the issue of accountability in social research by considering the extent to which and ways in which it is addressed in a number of different positions regarding the practice of social science the focus of the book is on reviewing discourses around the practice of professional inquiry with a view to highlighting differing arguments around the question of what it might mean to assess researchers accountabilities the book is structured around considering in detail various views on accountability in relation to one another a comprehensive comparison of arguments is presented in the first two chapters of the book the debate that is set up in the first two chapters forms the background to the elaboration and development in chapter 3 of constructivist argumentation in relation to the question of how accounts as set forth by researchers should be treated by colleagues participants and other audiences the continuing debate about the status to be afforded to constructions developed by researchers is tackled in this chapter constructivist thinking is then extended toward what is named in the book a trusting constructivist position this position focuses on ways in which trust earning and trust awarding in the context of social inquiry can proceed without researchers having to justify themselves as striving to gain access to knowledge as representation of reality through the development of the trusting constructivist position the book explores ways of creating trust through processes of social discourse an assessment of actual research projects in view of the debates set up in earlier chapters then takes place through these assessments readers can relate the details of the arguments developed in earlier chapters to their implications for judging the practice of accountable social inquiry

## Accountability in Social Research

2020-11-20

this book establishes constructivist interpretivist and linguistic approaches based on conventions about the nature of qualitative and text data the author s influence on text interpretation and the validity checks used to justify text interpretations vast quantities of text and qualitative data in organizations often go unexplored text analytics outlined in this book allow readers to understand the process of converting unstructured text data into meaningful data for analysis in order to measure employee opinions feedback and reviews through sentiment analysis to support fact based decision making the methods involve using nvivo and rapidminer software to perform lexical analysis categorization clustering pattern recognition tagging annotation memo creation information extraction association analysis and visualization the methodological approach in the book uses innovation theory as a sensitizing concept to lay the foundation for the analysis of research data suggesting approaches for empirical exploration of organizational learning knowledge management and innovation practices amongst geographically dispersed individuals and team members based on data obtained from a private educational

organization that has offices dispersed across asia through focus group discussions and interviews on these topics the author highlights the need for integrating organizational learning knowledge management and innovation to improve organizational performance exploring perspectives on collective relationships and networks organizational characteristics and structures and tacit and overt values which influence such innovation initiatives in the process the author puts forward a new theory which is built on three themes relationship and networks knowledge sharing mechanisms and the role of social cognitive schema that facilitate emergent learning knowledge management and innovation
