institutions and their individual pathways to and exercise of power in top level functions as well as comparative analyses regarding the position and behaviour of women in relation to men based on these individual studies the volume draws overarching conclusions about women s leadership in the eu regarding positional leadership women continue to be underrepresented in leadership positions they more often hold less prestigious portfolios in such positions and manifold structural hurdles hamper their access to power furthermore huge variations exist across eu institutions with the intergovernmental bodies being the hardest to access regarding behavioural leadership women acting in powerful eu positions generally perform excellently they successfully exercise a combined leadership style that integrates attributes of leadership considered to be masculine and feminine this is not to argue that women per se are the better leaders yet more often than men they are exposed to stronger selection processes and their prevalent practice of a combined leadership style tends to best meet the requirements of modern democratic systems and particularly those of the highly fragmented eu

in this book we considered new territory for educational leadership by looking to music for lessons and inspiration that may inform the next generation of schools leaders each chapter focuses on an artist or group whose work serves to refine extend and challenge our thinking in regards to educational leadership you will find a vast array of musical forms of expression analyzed and described by an equally diverse collection of educational leadership scholars and practitioners there may be some who question the academic appropriateness or relevance of a text such as this one our response is that part of our ongoing mission should be to break ourselves out of academic silos and forge meaningful connections between seemingly disparate disciplines furthermore educational leadership stands to gain more by drawing from the arts and specifically musical influences finally music is an obvious part of most of our lives why not explore the ways in which it impacts us on an academic level and not just a personal level in sum we ask that as you read the chapters of this book you reflect on your own musical tastes and favorite artists

Maturing Leadership 2020-04-03

whenever leadership emerges within a group there will be resistance to that leadership discontent may manifest in a number of ways and action will always be determined by factors such as resource numbers time space and the legitimacy of the resistance what then turns discontent into mutiny mutiny is often associated with the occasional mis leadership of the masses by politically inspired hotheads or a spontaneous and unusually romantic gesture of defiance against a uniquely overbearing military superior in reality it is seldom either and usually has far more mundane origins not in the absolute poverty of the subordinates but in the relative poverty of the relationships between leaders and the led in a military situation the roots of mutiny lie in the leadership skills of a small number of leaders and what transforms that into a constructive dialogue or a catastrophic disaster depends on how the leaders of both sides mobilise their supporters and their networks using contemporary leadership theory to cast a critical light on an array of mutinies throughout history this book suggests we consider mutiny as a permanent possibility that is further encouraged or discouraged in some contexts from mutinies in ancient roman and greek armies to those that toppled the

german and russian states and forced governments to face their own disastrous policies and changed them forever this book covers an array of cases across land sea and air that still pose a threat to military establishments today the critical theoretical line also puts into sharp relief the assumption that oftentimes people have little choice in how they respond to circumstances not of their own making if mutineers could choose to resist what they saw as tyranny then so can we

Leadership in Organizations 1999

leadership is an increasingly relevant area of research especially for social scientists leadership in rural areas of developing societies has acquired more importance in the era of globalization political leadership is a concept central to understanding political

processes and outcomes yet its definition is elusive many disciplines have contributed to the study of leadership including political theory history psychology and management studies political leadership has made a comeback it was studied intensively not only by political scientists but also by political sociologists and psychologists sovietologists political anthropologists and by scholars in comparative and development studies from the 1940s to the 1970s thereafter the field lost its way with the rise of structuralism neo institutionalism and rational choice approaches to the study of politics government and governance understanding and measuring political leadership is a complex business though we all have ideals of what makes a good leader they are often complex contradictory and more than a little partisan the world is full of aspiring political leaders but sadly very few live up to the leadership ideals in fact many political leaders seem to severely lack some of the most important leadership qualities such as integrity and accountability it is no coincidence that for many people the word e politician e has such negative connotations however history and present day shows us that there are still a few who come close to the leadership ideals and who are good examples of an effective political leader in this book quality of leadership which

played a dynamic role in the political has
