semantics dynamic logic e type theories and choice function approaches which was one of the main issues the konstanz project were concerned with all of these frameworks are couched in the tradition of montague grammar even though they extend the classical formalism in different directions the developments emerged from the modern discussion of problems for the representation of cross sentential anaphoric relations involving pronouns and the interpretation of definite and indefinite noun phrases after a decade of controversy these approaches are merging together enriching each other s formal mechanisms rather than expressing opposition thus the articles in this volume concentrate on fundamental semantic questions and also extend the current formalisms in order to capture more data the roots of this book lie in the workshop reference and anaphoric relations which was held at the university of konstanz in june 1996 five main issues were discussed i the stoic and scholastic treatment of reference and anaphora ii quan tification and scope iii anaphoric reference iv the representation of indefinite nps with choice functions and v the relation between linguistic expressions their rep resentations and their meanings

inspired by the work of professor michael taggart this collection of essays from across the common law world is concerned with two separate but related themes first to what extent and by what means should review on substantive grounds such as unreasonableness be expanded and intensified jowell elliott and varuhas all agree with taggart that proportionality should not sweep the rainbow but propose different schemes for organising and conceptualising substantive review groves and weeks and hoexter evaluate the state of substantive review in australia and south africa respectively the second theme concerns the broader canadian sense of substantive review including the illegality grounds and whether deference should extend to these grounds cane and aronson consider the relevance and impact of different constitutional and doctrinal settings wilberg and daly address questions concerning when and how deference is to operate once it is accepted as appropriate in principle rights based review is discussed in a separate third part because it raises

both of the above questions geiringer sales and walters examine the choices to be made in settling the approach in this area each focusing on a different dichotomy taggart s work is notable for treating these various aspects of substantive review as parts of a broader whole and for his search for an appropriate balance between judicial scrutiny and administrative autonomy across this entire area by bringing together essays on all these topics this volume seeks to build on that approach

get acquainted with cypher in a guided manner quickly and learn how to query the graph databases with efficient and performant queries key features work with cypher syntax and semantics while building graph traversal queries get up and running with advanced cypher concepts like list maps optional match master best practices in writing effective queries leveraging

data modeling and patterns book descriptionwhile it is easy to learn and understand the cypher declarative language for querying graph databases it can be very difficult to master it as graph databases are becoming more mainstream there is a dearth of content and guidance for developers to leverage database capabilities fully this book fills the information gap by describing graph traversal patterns in a simple and readable way this book provides a guided tour of cypher from understanding the syntax building a graph data model and loading the data into graphs to building queries and profiling the queries for best performance it introduces apoc utilities that can augment cypher queries to build complex queries you ll also be introduced to visualization tools such as bloom to get the most out of the graph when presenting the results to the end users after having worked through this book you ll have become a seasoned cypher query developer with a good understanding of the query language and how to use it for the best performance what you will learn write cypher queries from basic to advanced level map the source data to the graph data model in an iterative fashion load the data into a graph using load csv apoc and client drivers map the business questions to graph queries effectively identify query performance issues and fix them extend capabilities of cypher using apoc utilities work with graph visualization tools like bloom and browser who this book is for this book is targeted at database administrator database developers graph database developers and graph database architects this book will also help someone migrate

from a dba role to a graph data engineer or data scientist if you are working with graph databases and need to learn cypher or are a basic cypher developer who wants to get better at data modeling and tuning queries to build performant cypher queries then this is the book for you

language and neoliberalism examines the ways in which neoliberalism or the ideology of market rule finds expression in language in this groundbreaking original study holborow shows at once the misleading character of ideological meaning and the underlying social reality from which that meaning emerges in universities it is now the norm to use terms like entrepreneurial and business partnerships how have these terms become a core component of education and gained such force markets have become metaphorically a power in their own right they now tell governments how to act and warn them against too much public spending post crash the capitalist market continues to be crisis prone and in that context the neoliberal ideology remains contested free of jargon and assuming no specialist knowledge this book will strike a chord internationally by showing how neoliberal ideology has literally gone global in language drawing on vološinov and bakhtin williams and gramsci and introducing concepts from marxist political economy

language and neoliberalism is essential reading for all interested in the intersection of linguistics applied linguistics and politics
