Equus 2007-04 peter shaffer enjoys a prominent position among contemporary british dramatists as a writer who combines intellectual power with a keen awareness of the physical possibilities of the theatre he is also a playwright of exceptional versatility and technical resource he made his début with five finger exercise 1958 a conventionally designed drama of middle class family life which left no doubt however of its author s mastery of plotting and fluency in dialogue this was followed by a light weight double bill the private eye and the public ear his third play the royal hunt of the sun 1964 the most ambitious conception of his career to date a historical tragedy centred on the spanish conquistador pizarro and the inca emperor atahualpa scored an immediate success both for the vigour of its ideas and for its spectacular presentation of mime and movement his next piece black comedy was an ingenious farce based on a reversal of light values the actors supposedly being plunged into a black out although perfectly visible to the audience since then peter shaffer has written an ideological conversation piece the battle of shrivings while his latest play equus 1973 might be described as a dramatic case history the

piece is concerned like his first with the torments of adolescence but is presented with a more clinical setting and technique john russell taylor notices an unusual degree of detachment in shaffer s work a tendency to analyse emotions without too far engaging himself in them as a dramatist but the essay also pays tribute to his steady development as a playwright and to his originality both as a man of the theatre and as a dramatic thinker john russell taylor has been film critic of the times and writes on the theatre films and television for a number of journals he is now teaching in the university of southern california his books include anger and after a guide to the new british drama 1962 cinema eye cinema ear 1964 the rise and fall of the well made play 1967 and the second wave british drama for the seventies 1971

□□□□□□□ 1985 this study traces key developments in theatre s engagement with mental health since the 1970s it introduces and applies the concept of the mental health play as accurate and timely in addressing the way mental distress and mental illness have been brought to the stage the study argues that the theatre is a central calibrator for reflecting developments and tensions in as well as attitudes towards mental health care and thus opens up a domain that still has stereotypes and myths attached to it theatre s representations of mental distress inform and shape cultural production and vice versa mental health plays are central in encouraging and fostering conversations about mental health and they thus intervene in ongoing debates due to its interdisciplinary approach this study contributes to and extends existing research in multiple fields including theatre and science performance studies and the medical humanities
