Guide for Plant Appraisal

2014

hormone action in plant development a critical appraisal documents the proceedings of the tenth long Ashton symposium september 1986 the symposium was convened to assess the evidence for and against the view that plant hormones are endogenous regulators of plant development the meeting also aimed to focus on and assess promising strategies for future research the symposium opened with the Douglas Wills lecture given by professor Carl Leopold in many respects progress in research on animal hormones seems greater than in the plant sciences and there may well be merit in following progress in animal hormone research as suggested by professor Leopold the symposium was comprised of four sessions the introductory session considered the coordinating role of hormones in plant growth and development and focused on hormone action at the molecular level including their binding to receptors and their control of gene expression the next two sessions embraced contributions on the experimental manipulation of development by genetic notably by biochemical mutants chemical for example with gibberellin biosynthesis inhibitors and environmental including drought stress means all these approaches consolidated the central importance of hormones in plant growth in the final session three speakers suggested some promising avenues for future research into the physiology biochemistry and molecular biology of plant hormones

Manual for Plant Appraisers

1986

invasive alien species are a major threat to biodiversity and ecosystems throughout the world in India a country with three of the world's most important biodiversity hotspots the invasion of alien plants means risking a national ecological disaster with major social and economic consequences currently there is insufficient information about invasive alien plants their distribution rate of spread and adaptability to new environments this book reveals existing and potential invaders evaluates the level of risk they pose to native species and suggests steps to manage spread and limit d

The Professional Amenity Plant Appraisal Handbook

2013-10-22

the overall aim of this volume is to review critically the current state of and future prospects for developments in viral taxonomy

Hormone Action in Plant Development – A Critical Appraisal

1959

heavy metal pollution is a serious threat to living organisms industrial development has aggravated multifaceted problems in the environment requiring a comprehensive solution appraisal of metal loids in the ecosystem addresses this need and provides a basic introduction of different heavy metals presented in a consistent and comprehensive manner each chapter highlights the background level occurrence speciation bioavailability uptake detoxification mechanisms and management of each metal in polluted soils it provides the latest up to date information about different aspects of as hg si cu co ni mn cd cr etc in single source this book provides scientists and researchers with the most current source of information on the topic written by a global and diverse group of experts appraisal of metal loids in the ecosystem also covers the many field applications associated with phytoremediation and extraction and provides guidance on decision making when selecting advanced techniques proposes strategies to mitigate metalloid toxicity and pollution in soils covers various phytoremediation technique for appraisal of metalloids includes case studies involving remediation of heavy metal contaminated soils using advanced technologies

An Appraisal of OBE-SEC Estimates of Plant and Equipment Expenditures, 1947-1958

1959

whole life appraisal entails a review not just of the capital costs of a project but also the running and maintenance costs and is increasingly being required by clients seeking maximum value for money this new book provides an introduction to the subject discusses issues such as investment appraisal and life expectancy of components and shows by means of case studies how to carry out a whole life appraisal

An Appraisal of OBE-SEC Estimates of Plant and Equipment Expenditure, 1947-1958

2011

one of the most important issues in developing sustainable management strategies and incorporating ecodesigns in production manufacturing and operations management is the assessment of the sustainability of business

operations and organizations overall environmental performance the book presents the results of recent studies on sustainability assessment it provides a solid reference for researchers in academia and industrial practitioners on the state of the art in sustainability appraisal including the development and application of sustainability indices quantitative methods models and frameworks for the evaluation of current and future welfare outcomes recommendations on data collection and processing for the evaluation of organizations environmental performance and eco efficiency approaches leading to business process re engineering

Invasive Alien Plants An Ecological Appraisal for the Indian Subcontinent

1974

the eib performs economic appraisals of the projects it considers for investment thereby it ensures that projects add sufficient value to society to merit support beyond considerations of financial profitability to investors the economic appraisal also addresses the wider value generated by the project to society this comprises benefits and costs to project final users the taxpayer and third parties allowing for all applicable market failures such as environmental externalities since the publication of the first edition of this document in 2013 the eib has been transformed into the eu climate bank the way it values carbon emissions has been updated as have various other elements of economic appraisal in keeping with developments in the specialist literature policy and practice this second edition of the document gives the reader an updated view of how economic appraisal is currently conducted at the bank it also mentions the areas on which the eib is currently working to ensure that it is at the forefront of economic appraisal practice

Water Resources Appraisal for Hydroelectric Licensing

2018-01-18

the book is a pioneering attempt to see exactly what difference economic valuation of environmental effects would have made to six actual on going development projects if it had been done at the time of appraisal it combines theoretical rigour with applied economic skills presented with robust common sense james winpenny overseas development institute this book is a practical and readable guide to valuing the environment and the implications for public investment and policy useful for students as well as professional economists policy makers engineers environmental and social planners it describes how the environment can be valued and how these valuation concepts can be applied to investment decisions the book provides first a general introduction to the key issues and concepts considering the nature and magnitude of environmental problems the cost benefit method of evaluation and detailed methods for valuing the environment it then analyses in detail six case studies based on actual or

proposed major investment projects by the uk overseas development administration or the world bank these include water quality in china the supply of electricity in bangladesh slum improvements in india mass transit in nigeria forest conservation in kenya and soil quality in bolivia thus the book is expected to be of special interest to professionals and students in developing countries although much of the material has general application in developed as well as in developing countries

A Critical Appraisal of Viral Taxonomy
