security smarts for the self guided it professional protect wireless networks against all real world hacks by learning how hackers operate wireless network security a beginner s guide discusses the many attack vectors that target wireless networks and clients and explains how to identify and prevent them actual cases of attacks against wep wpa and wireless clients and their defenses are included this practical resource reveals how intruders exploit vulnerabilities and gain access to wireless networks you ll learn how to securely deploy wpa2 wireless networks including wpa2 enterprise using digital certificates for authentication the book provides techniques for dealing with wireless guest access and rogue access points next generation wireless networking technologies such as lightweight access points and cloud based wireless solutions are also discussed templates checklists and examples give you the hands on help you need to get started right away wireless network security a beginner s guide features lingo common security terms defined

so that you're in the know on the job imho frank and relevant opinions based on the author's years of industry experience in actual practice exceptions to the rules of security explained in real world contexts your plan customizable checklists you can use on the job now into action tips on how why and when to apply new skills and techniques at work this is an excellent introduction to wireless security and their security implications the technologies and tools are clearly presented with copious illustrations and the level of presentation will accommodate the wireless security neophyte while not boring a mid level expert to tears if the reader invests the time and resources in building a lab to follow along with the text s he will develop a solid basic understanding of what wireless security is and how it can be implemented in practice this is definitely a recommended read for its intended audience richard austin ieeecipher ieeecomputer society s tc on security and privacy e109 july 23 2012

## **Security and the Networked Society**

2012-05-06

one of the most significant and important advancements in information and communication technology over the past 20 years is the introduction and expansion

of the internet now almost universally available the internet brings us email global voice and video communications research repositories reference libraries and almost unlimited opportunities for daily activities bridging geographical distances in unprecedented ways the internet has impacted all aspects of our daily lives from facilitating the running of businesses the attainment of services and keeping in touch with friends and family accessible at any time and for many of us from our mobile phones the internet has opened up a world of knowledge and communication platforms that we cannot now imagine living without this book explores the concept that the internet has become a second action space for individuals coexisting with traditional and obvious real space the internet serves as a novel spatial platform and action space to its subscribers all over the world kellerman expertly discusses this notion and examines the practical integration of cyberspace with real space part i examines the internet as a platform for action and presents its relations with physical space concerning a range of uses and applications which were traditionally performed in physical space only it discusses the idea that the internet has become a second space and explores theoretical perspectives surrounding this notion the internet has undeniably made humankind more efficient and connected part ii explores the internet as an action space for human life considering basic human needs curiosity identity and social relations it further considers instances whereby use and application of the internet cannot be

fully performed in real space mainly regarding people's presentation of identity part iii explores daily actions over the internet such as work shopping banking and social interactions kellerman also briefly touches on the darker aspects that the expansion of the internet has made possible including its role in fraud and other crimes the concluding chapter discusses people living across the two spaces and identifies potential future developments the internet as second actions space will appeal to students across the social sciences in particular those studying geography sociology media studies internet studies business and related disciplines

the fascinating inside story of how the android operating system came to be in 2004 android was two people who wanted to build camera software but couldn't get investors interested today android is a large team at google delivering an operating system including camera software to over 3 billion devices worldwide this is the inside story told by the people who made it happen androids the team that built the android operating system is a first hand chronological account of how the startup

began how the team came together and how they all built an operating system from the kernel level to its applications and everything in between it describes the tenuous beginnings of this ambitious project as a tiny startup then as a small acquisition by google that took on an industry with strong entrenched competition author chet haase joined the android team at google in may 2010 and later recorded conversations with team members to preserve the early days of android s history leading to the launch of 1 0 this engaging and accessible book captures the developers stories in their own voices to answer the question how did android succeed

if you read technology news you ll notice it s not just a story of amazing new product introductions or even that plus copycat product introductions all the usual aspects of business are there fierce competition new contenders old survivors great ideas but business failures mediocre ideas that somehow seem to succeed and prosper as a reporter commentator and blogger on mobile technology i ve collected what happened in the industry in 2013 and make predictions on what will and won t

happen in 2014 you can read what did happen in the mobile technology in 2013 often i deliver a comment with the news item and usually there is a link to the web page of the original announcement this way you can dive into any detail level you desire read my news feed for the overview or follow the related web link to the longer article history is moving so fast now that it is all recorded electronically but i m surprised no one else has collected it and presented it for consideration here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed it s often overlooked that the technology industry is an industry by that i mean its main concerns are profit and growth as consumers we love the new products and unique abilities we are gaining from technology but it is a business akin to any other trying to seduce us to pry money out of our wallets so i cover the horse race aspect of the business who s up who s down is that changing is that likely to change the longer implications of what the technology industry is doing are vast and social we are moving to an always on always connected society where we can communicate with someone instantly and find an answer to any question quickly the entire database of human knowledge is now available in the palm of your hand whenever you desire it everything is there the good the bad right and wrong hate and love music and noise we are obsessed with technology not in and of itself but as a means to an end technology is the means to satisfy our curiosity or even our desire for self

expression we are taking photos machine gun style with our smartphones and choose the few to share as humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible bill gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years he gave some boring answer about moore s law but the real answer is that computers are in their teenage years they are growing and growing they will not always do so so too the technology industry is in a state of rapid change i see the shift to smaller devices as a new paradigm smashing some businesses and growing others into giants their stories are here in the news in short here are predictions for what won t and will happen in 2014 for the mobile technology industry breakdowns of marketshare figures on the horse race aspect of the business chapters on apple samsung google microsoft nokia blackberry amazon yahoo news about social media giants facebook twitter google linkedin foursquare snapchat and the carriers themselves verizon at t sprint andt mobile you can also review my 2013 mobile predictions and see my track record on predictions finally there are some essays on how all this mobile tech is figuring into our lives i ve divided the news into the subjects it covers but also put in the appendix all the news as it came out in chronological ordering you can read the firehose of events in the appendix or just read about one topic at a time in the earlier chapters table of contents preface introduction chapter 1 2014 predictions

chapter 2 mobile marketshare chapter 3 apple chapter 4 samsung chapter 5 google  
chapter 6 microsoft chapter 7 nokia chapter 8 blackberry chapter 9 amazon chapter  
10 social media chapter 11 yahoo chapter 12 carriers chapter 13 2013 predictions  
chapter 14 essays appendix
