Oxford Handbook of Expedition and Wilderness Medicine 2023-07-21 fully revised for its third edition the oxford handbook of expedition and wilderness medicine continues to be the essential resource for all expedition medics and well informed travellers as well as nurses paramedics medical students and other expedition members travelling in remote wilderness areas of the world now containing more guidance about caving medicine the third edition includes revised and additional illustrations and essential maps of the spread of diseases clear and concise readers can rely on this handbook to provide the key knowledge and practical advice they need it enables efficient preparation and planning before the journey advises on camp logistics risk management and medical problems during the expedition as well as highlighting rare but important risks to those visiting remote areas focusing on preventative measures it also contains chapters dealing with crisis management emergency care and evacuation from challenging environments with guidance about the obligations of a clinician joining an expedition ethical approaches to such work and medicine in various extreme environments this edition will give you the confidence and skills you need to travel to any extreme or remote environment incorporating the combined knowledge and experience of a team of experienced clinicians and expeditioners this is a practical easy to use guide to all aspects of expedition and wilderness medicine

Annual Report of the Public Printer ... 1910 sea ice the latest edition of the gold standard in sea ice references in the newly revised second edition of sea ice physics and remote sensing a team of distinguished researchers delivers an in depth review of the features and structural properties of ice as well as the latest advances in geophysical sensors ice parameter retrieval techniques and

remote sensing data the book has been updated to reflect the latest scientific developments in macro and micro scale sea ice research for this edition the authors have included high quality photographs of thin sections from cores of various ice types as well as a comprehensive account of all major field expeditions that have systematically surveyed sea ice and its properties readers will also find a thorough introduction to ice physics and physical processes including ice morphology and age based structural features practical discussions of radiometric and radar scattering observations from sea ice including radar backscatter and microwave emission the latest techniques for the retrieval of sea ice parameters from space borne and airborne sensor data new chapters on sea ice thermal microwave emissions and on the impact of climate change on polar sea ice perfect for academic researchers working on sea ice the cryosphere and climatology sea ice physics and remote sensing will also benefit meteorologists marine operators and high latitude construction engineers

Sea Ice 2023-05-16 while several recent studies have suggested that the gospel of luke recommends generous almsgiving or a relatively benign sharing ethic that mimics existing redistributive measures in early roman palestine this book argues that a much more subversive reading of the gospel s wealth and possessions traditions is defensible

International Indian Ocean Expedition, USC & GS Ship Pioneer, 1964 2021-03-26 this book is the result of several years of expedition into the development of metropolitan foodclusters the author s fascination for the agricultural landscapes in and around metropolises led him to the conclusion that improving the efficiency of agriculture is the most effective way to safeguard the quality of such landscapes the wasteful modes of production developed in the past 150 years have led to a serious decline in both the surface area and the quality of the highly valued landscapes closing the loops within the agricultural production system and increasing their productivity is therefore the best remedy to arrest this decline after analysing the development of agriculture against the background of the urbanisation process in today s network society the focus shifts to research by design on agroparks these are spatial clusters of agofunctions and the related economic activities agroparks bring together high productivity plant based and animal based production and processing along industrial lines combined with the input of high levels of knowledge and technology the cycles of water minerals and gases are skillfully closed and the use of fossil energy is minimised particularly by the processing of various flows of waste products and by products an agropark may therefore be seen as the application of industrial ecology in the agrosector the scientific aim of this book is to find answers to the questions of whether agroparks contribute to sustainable development in metropolises how an agropark is developed and how it must be designed under examination are seven designs for agroparks which were created from 2002 onwards in the netherlands china and india

Indonesian Geographical Expedition, Bali, 2007 1908 igneous oceanic crust is one of the largest potential habitats for life on earth and microbial activity supported by rock water microbe reactions in this environment can impact global biogeochemical cycles however our understanding of the microbiology of this system especially the subsurface deep biosphere component of it has traditionally been limited by sample availability and quality over the past decade several major international programs such as the center for dark energy biosphere investigations the current international ocean discovery program and its predecessor integrated ocean drilling program and the deep carbon observatory have focused on advancing our understanding of life in this cryptic yet globally relevant biosphere additionally many field and laboratory research programs are examining hydrothermal vent systems a seafloor expression of seawater that has been thermally and chemically altered in subseafloor crust and the microbial communities supported by these mineral rich fluids the frontiers in microbiology 3 september 2017 recent advances in geomicrobiology of the ocean crust papers in this special issue bring together recent discoveries of microbial presence diversity and activity in these dynamic ocean environments cumulatively the articles in this special issue serve as a tribute to the late dr katrina j edwards who was a pioneer and profound champion of studying microbes that rust the crust this special issue volume serves as a foundation for the continued exploration of the subsurface ocean crust deep biosphere

The American Catalogue 2012-04-16 light scattering by densely packed inhomogeneous media is a particularly challenging optics problem in most cases only approximate methods are used for the calculations however in the case where only a small number of macroscopic scattering particles are in contact clusters or aggregates it is possible to obtain exact results solving maxwell s equations simulations are possible however only for a relatively small number of particles especially if their sizes are larger than the wavelength of incident light the first review chapter in part of this volume prepared by yasuhiko okada presents modern numerical techniques used for the simulation of optical characteristics of densely packed groups of spherical particles in this case mie theory cannot provide accurate results because particles are located in the near field of each other and strongly interact as a matter of fact maxwell s equations must be solved not for each particle separately but for the ensemble as a whole in this case the author describes techniques for the generation of shapes of aggregates the orientation averaging is performed by a numerical integration with respect to euler angles the numerical aspects of various techniques such as the t matrix method discrete dipole approximation the nite difference time domain method effective medium theory and generalized multi particle mie solution are presented recent advances in numerical techniques such as the grouping and adding method and also numerical orientation averaging using a monte carlo method are discussed in great depth
