Dhaka University Journal of Business Studies *1937*

the book brings together diverse views from around the world and provides a comprehensive overview of academic integrity and how to create the ethical academy at the same time the handbook does not shy away from some of the vigorous debates in the field such as the causes of academic integrity breaches there has been an explosion of interest in academic integrity in the last 20 30 years new technologies that have made it easier than ever for students to cut and paste coupled with global media scandals of high profile researchers behaving badly have resulted in the perception that plagiarism is on the rise this in combination with the massification and commercialisation of higher education has resulted in a burgeoning interest in the importance of academic integrity how to safeguard it and how to address breaches appropriately what may have seemed like a relatively easy topic to address students copying sources without attribution has in fact turned out to be a complex

interdisciplinary field of research requiring contributions from linguists psychologists social scientists anthropologists teaching and learning specialists mathematicians accountants medical doctors lawyers and philosophers to name just a few because of this broad interest and input this handbook serves as the single authoritative reference work which brings together the vast growing interdisciplinary and at times contradictory body of literature for both established researchers practitioners and those new to the field this handbook provides a one stop shop as well as a launching pad for new explorations and discussions

Energy Research Abstracts 2011

this book provides a comprehensive assessment of the latest developments in services research focusing on composing and coordinating services xml security and service oriented architecture and presenting new and emerging research in the services discipline provided by publisher

Scientific Canadian Mechanics' Magazine and Patent Office Record 2016

this book constitutes the thoroughly refereed proceedings of the fourth international symposium on data driven process discovery and analysis held in riva del milan italy in november 2014 the five revised full papers were carefully selected from 21 submissions following the event authors were given the opportunity to improve their papers with the insights they gained from the symposium during this edition the presentations and discussions frequently focused on the implementation of process mining algorithms in contexts where the analytical process is fed by data streams the selected papers underline the most relevant challenges identified and propose novel solutions and approaches for their solution

The Canadian Patent Office Record and Register of Copyrights and Trade Marks 2008-06-27
