political cultural economic and others are actualized the second major theme of the book concentrates on the position of women in thailand it begins with the explanation of the attitudes which the buddha himself held towards the women examines the status of women in early buddhist societies and of those women who chose to renounce the world and join the buddhist order to seek personal salvation as well as the role of the lay women in a buddhist society at that time the book then focuses on the position of women in the thai society through various stages of its history and culminates in the discussion of the legal position of women today and the attempts to improve their status however in treating the latter subject the study is descriptive rather than prescriptive leaving it to the thai women themselves to decide which remedies to pursue to improve their position
