Life Orientation Gr12 T/g 2003-12 leadership is a subject that has gained impressive visibility in the past two decades the number of books monographs and articles as well as seminars devoted to the development of one s leadership skills has been almost exponential growth this study is an attempt to forge a full orb ed theology of christian leadership grounded in the teaching of scripture what emerges from tracing the theme of leadership through the biblical record is a servanthood pattern one that is wholly distinct from prevailing secular models our exposition begins with the biblical language of the servant the term of choice for those great leaders used of god to further his saving purposes in the world eleven old testament and five new testament

leaders are profiled the portrait of jesus christ focuses on three motifs that governed his training of the twelve for kingdom ministry the pauline letters are mined for those convictions that governed paul s practice of leadership both of his mission team and of the faith communities that emerged from that mission the treatment of each leader from joseph to paul begins with a series of preliminary questions and concludes with a mini profile that correlates the biblical data with these questions the final chapter offers a summary profile of the servant leader one whose character motives and agenda align with the divine purposes though designed as a textbook for upper level college and seminary courses on leadership the book s readable format is ideal for churches and parachurch organizations in their leadership training programs the author s prayer is that this work will serve as a catalyst to call god s people back to scripture and thereby raise up a whole new generation of authentic servant leaders

Making Choices Life Orientation 2009 educational practice today often fails to make the crucial distinction between learning as an accumulation of information and learning as a dialogical interaction that elicits one's personal response to the material learning through dialogue offers an alternative approach to teaching and learning which utilizes martin buber's dialogical principles turning toward addressing affirmatively listening attentively and responding responsibly the book first presents buber's educational theory and method and second presents specific examples of how buber's dialogical philosophy can be applied in the classroom rather than imposing one's own views this approach enables teachers and students to develop course content in uniquely appropriate ways if you are a teacher a student an educator at any level or anyone interested in furthering his or her ability to engage more meaningfully with the educational process this book will challenge you with fresh perspectives

Life Orientation Gr 5 T/g 2012 this edited collection challenges the urban centric nature of much feminist work on gender and education the context for the book is the radical reconfiguration of rural areas that has occurred in recent decades as a result of globalisation from a range of diverse national contexts including kenya and south africa australia and canada and the united states and pakistan authors explore the intersections between masculinity femininity and rurality in education in recognition of the heterogeneity of categories such as rural girl and rural boy they attend to

how educational exclusions can be magnified by differences in relation to social locations such as class race or sexuality similar critical insights are brought to bear as authors examine what it means to be a male or female teacher in rural environments contributors draw on data ranging from contemporary feature films to historical materials along with detailed ethnographic work and participatory approaches to produce a compelling narrative of the need to understand education as experienced by those who are not part of the urban majority this book was originally published as a special issue of gender and education
