this book is about conflict resolution through mediation from a psychological perspective although written in part from the point of view of litigation the objective is to demonstrate how an appreciation of the psychological aspects of conflict and an understanding of the emotional strategies people adopt in dispute situations can assist both lawyers and non lawyers in resolving conflicts the book consists of three sections a theoretical analysis of conflict and conflict resolution a practical legal and experiential explanation of mediation and thirdly a series of mock mediations comprehensively analysed from the viewpoint of the mediator and the parties providing tips and guidance on the dilemmas and pitfalls that mediators encounter the book is based on three fundamental tenets that conflict is ever present and cannot be eliminated but can be worked with that the attitude and stance of the mediator towards the dispute can be of significance to the outcome and above all that the use of psychotherapeutic tools can facilitate a paradigm shift in the parties approach to conflict the authors demonstrate how the mediator can move parties in dispute from a position of intransigent adversity to a working alliance and thereby achieve a good enough resolution

this book examines the use of third party mediation as a conflict resolution method in an attempt to explain why some but not all conflicts are mediated this work argues that diverse conflict structures are inherently different in their susceptibility to mediation attempts by offering a systematic method for measuring the transformability of conflict structures this book contributes to our understanding of the sufficient and necessary conditions for mediation in addition the study offers an analytical framework for the examination of mediation as a trilateral rational bargaining process although the general concept of mediation as a three person game is not new most studies focus on either the disputants perspectives or the mediator s perspective in contrast this study integrates the perspectives of all three parties the framework links the different stages involved in the whole process of mediation from the onset of mediation through the mediation strategies used to the outcome rather than focusing on one particular aspect the book applies the framework to two case studies the conflict between israel and egypt and the conflict between india and pakistan and provides new insights into these conflicts from a mediation perspective in general the model developed here provides a framework for systematically assessing conflicts and the options available to those involved in the mediation process this book will be of much interest to students of conflict resolution mediation war and conflict studies asian politics middle eastern politics and ir in general

in the contemporary discipline of conflict resolution adjudication and alternative dispute resolution adr are often seen as antagonistic trends this important book contends that on the contrary it is the bringing together of these trends that holds the most promise for an effective system of international justice with great insight and passion built firmly on a vast knowledge of the field lars kirchhoff exposes the contemporary structural barriers to effective conflict resolution defining where adjudication ends and adr and particularly the recent development of mediated third party intervention from an art to a veritable science must come into play the work starts by defining the challenges potentials and shortcomings of different approaches to conflict resolution in an interdependent world where the multiplicity of actors topics and interests involved even in seemingly bilateral conflict situations is clearly manifest and goes on to define useful models and connect the various elements relevant for the resolution of conflicts in a transparent way in the course of its investigation the book accomplishes the following illustrates the various departure points and perspectives scholars of conflict resolution have taken as the basis for their work discusses who should become involved in conflicts as a third party and by which techniques this should occur systematically conveys the nature and consequences of intervention through mediation focusing on the method s critical challenges and clarifies the

particular model of international mediation under development through un initiatives in approaching these intertwined topics the author draws concrete conclusions for the realms of international law and related disciplines as well as for the organizational context of the united nations he explores such diverse scenarios as conflicts between states conflicts involving international organizations and in accordance with the changing parameters of international law even conflicts involving individuals clarifying which constellations can be tackled by international mediation and which conflicts should be dealt with by other forms of diplomacy or adjudication it is the conviction of many intermediaries and scholars that the considerable potential inherent in resolving conflicts peacefully is rarely put into practice although some of the reasons for this phenomenon are beyond the influence of scholarly debate in many instances the reasons for failure of peaceful resolution processes are more structural or systemic in nature it is the great virtue of this book that it establishes enough clarity in an unclear and complex field to make concrete and workable recommendations in these instances and for that reason it will be of immeasurable value and benefit to all scholars policymakers and activists dedicated to the pursuit of peace
