Finley's Interactive Cadaveric Dissection Guide 2010-11-15 excerpt from the anatomy of the horse a dissection guide to professor turner the author is under deep obligation for revision of the chapters on the brain the eye and the ear and for esteemed suggestions regarding other points about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Clemente's Anatomy Dissector 2010 grant's dissector walks students step by step through dissection procedures in the anatomy lab each chapter is consistently organized beginning with a brief study of surface anatomy followed by concise coverage of osteology presenting important foundational structures that will aid in localization of soft tissue structures each unit begins with a dissection overview a guide to the procedures to be accomplished during the session this is followed by dissection instructions with a logical sequence and numbered steps for the dissection each dissection concludes with a dissection review that presents a numbered list of tasks illustrating the important features of the dissection and encouraging the synthesis of information

A.D.A.M. Interactive Anatomy Dissection Manual 1999 as its title indicates this is a book for use in a practical comparative anatomy course it is intended for a somewhat unusual class of student and consequently its contents outlook and method of treatment are unlike those of the standard texts in this subject as stated in the preface it is assumed that the student has already done a course in elementary zoology including the usual vertebrate types and has also examined in more detail a mammal unless this mammal were man a number of comparisons in the book would be missed to obtain full benefit from it the student should obviously have taken the preliminary medical studies including a fair amount of human anatomy this is not meant to imply that the student of advanced zoology cannot get many useful hints and fresh points of view from its pages he undoubtedly can the types treated in a series of regional dissections are the lamprey the dogfish squalus nebulosus the lizard and the dog as it is intended for assistance in dissection information regarding osteology and the details of the central nervous system have been purposely omitted and conversely the muscles are treated somewhat more fully than is customary

Human Anatomy 2011-12 this full color dissection manual is intended to provide

an introduction to the anatomy of the mink for biology zoology nursing or preprofessional students who are taking a laboratory course in anatomy and physiology or basic vertebrate anatomy

Atlas and Dissection Guide to Comparative Anatomy 2011-08 a dissection guide atlas to the fetal pig 3rd ed by david g smith and michael p schenk is designed to provide students with a comprehensive introduction to the anatomy of the fetal pig this full color dissection guide and atlas gives the student carefully worded directions for learning basic mammalian anatomy through the use of a fetal pig specimen

Atlas and Dissection Guide for Comparative Anatomy 2006-02-13 this full color dissection manual is intended to provide an introduction to the anatomy of the mink for biology zoology nursing or preprofessional students who are taking a laboratory course in anatomy and physiology or basic vertebrate anatomy features multiple images of the muscle skeletal and organ systems provide a complete picture of the layers of mink anatomy detailed instructions allow students to efficiently and accurately perform all of the dissections superior quality completely labeled full color photographs and illustrations offer excellent visual references the text is clearly written and dissection instructions are set apart in boxes to aid the students in the lab informative tables summarize key information and student objectives establish the purpose of each chapter and lab the dissection guide is loose leaf and three hole drilled for convenience in the laboratory because prepared mink skeletons are not always available the cat skeleton is utilized in the skeletal system chapter along with pictures of mink structures as appropriate
