the southampton brokage books are the best source for english inland trade before modern times internal trade always matched overseas trade between 1430 and 1540 the brokage series records all departures through southampton's bargate the owner carter commodity quantity destination and date and many deliveries too twelve such years make up the database that illuminates southampton's trade with its extensive region at the time when the city was at its most important as the principal point of access to england for the exotic spices and dyestuffs imported by the genoese if southampton's international traffic was particularly important the town's commerce was representative also of the commonplace trade that occurred throughout england seventeen papers investigate southampton's interaction with salisbury london winchester and many other places long term trends and short term fluctuations the rise and decline of the italian trade the dominance

city choices argues that both economic concerns and political factors can be synthesized in a new framework in city policymaking this synthesis is based on a systematic empirical study of policymaking in two large cities using numerous governmental documents and conducting extensive interviews with local state and federal officials the author examines how the two cities have implemented both federal redistributive and development programs in education and housing the author uses three models in explaining city choices economic constraint clientele participation and institutional diversity and concludes by offering his political choice perspective which identifies specific sets of local political forces that are likely to alter the city's rational choices in development and redistributive issues

1931

affirmative action remains one of the most divisive issues in america remaining unsolved since the 1960s civil rights legislation though many works have attempted to solve the dilemma none have tried to identify the underlying causes of the

backlash against the policy in order to understand affirmative action s future one must understand its evolution its opposition and its application both in america and in other nations in a multi disciplinary approach this book examines affirmative action from comparative historical policy and sociological perspectives also included is a list of supreme court rulings on affirmative action

1875

offers an interdisciplinary approach to the engineering of functional materials for efficient solar cell technology written by a collection of experts in the field of solar cell technology this book focuses on the engineering of a variety of functional materials for improving photoanode efficiency of dye sensitized solar cells dssc the first two chapters describe operation principles of dssc charge transfer dynamics as well as challenges and solutions for improving dsscs the remaining chapters focus on interfacial engineering of functional materials at the photoanode surface to create greater output efficiency interfacial engineering in functional materials for dye sensitized solar cells begins by introducing readers to the history configuration components and working principles of dssc it then goes on to cover both nanoarchitectures and light scattering materials as photoanode function of compact blocking layer in the photoanode and of  $\text{TiCl}_4$  post treatment in the photoanode are examined at next next two chapters look at photoanode function of doped semiconductors and binary semiconductor metal oxides other chapters consider nanocomposites namely plasmonic nanocomposites carbon nanotube based nanocomposites graphene based nanocomposites and graphite carbon nitride based nanocomposites as photoanodes the book provides comprehensive coverage of the fundamentals through the applications of dssc encompasses topics on various functional materials for dssc technology focuses on the novel design and application of materials in dssc to develop more efficient renewable energy sources is useful for material scientists engineers physicists and chemists interested in functional materials for the design of efficient solar cells interfacial engineering in functional materials for dye sensitized solar cells will be of great benefit to graduate students researchers and engineers who work in the multi disciplinary areas of material science engineering physics and chemistry
