riveting horror series forty days have passed since the world died billions of corpses walk the earth everything is disintegrating a group of eleven men and women have survived against the odds on an almost daily basis they attack the dead with brutal ferocity tearing through them with utter contempt somewhere nearby out of sight and out of earshot is another group that has adopted a completely different survival strategy where the others have used brutality and strength these people have demonstrated subtlety planning and tactics a series of horrific events force the two groups together backed into a corner and surrounded by hundreds of thousands of corpses they all know that their final battle with the dead is about to begin this book will be required reading for any serious pound scholar but also for those who work in the area of modernist poetry many of the book's contributors and its editor are affiliated with the ezra pound society which will provide a built in audience and mechanism for promoting the work although the book will be of interest to any library containing a copy of pound's cantos it will also be attractive to individual scholars who may not want to wade through the considerable scholarship but are looking for entry into specific cantos the infrathin was marcel duchamp's name for the thinnest shade of difference that between say the report of a gunshot and the appearance of the bullet hole on its target or between two objects in a series made from the same mold in this book the esteemed literary critic marjorie perloff shows how such differences occur at the level of words and argues that it is this infrathin space this micropoetics of language that separates poetry from prose perloff treats the relationship between duchamp and gertrude stein ranges over concrete objectivist and black mountain poetry and gives stunning readings of poets from eliot yeats and pound to samuel beckett john ashbery and rae armantrout poetry perloff shows us exists in the play of the infrathin and it is the poet's role to create unexpected relationships verbal visual and sonic from the finest nuances of language this volume examines the life of the remarkable woman susan moody and her travels to iran in the early 20th century during seismic changes in the world dr susan i moody's travels to iran 1909 1934 courageous odyssey captures a fleeting moment of arresting change and shimmering possibility exploring the fading values of the 19th century and the emergent understandings of the 20th century the author shows how one individual navigated such challenging times this book explores the industrial revolution the rise of the women's movement advances in medicine and healthcare and the start of a new religion the baha i faith of which moody became a devoted member susan moody was a pathbreaking artist and educator who became a physician later in life she made the bold decision to leave the united states and travel to iran in 1909 to serve women who effectively had no access to medical care in examining dr susan moody's story this volume seeks to reflect on our own changing moment and the ever present possibilities of improvement and advancement by tracing her own courageous odyssey we are invited to more deeply understand our own this book will be of value to students and scholars alike interested in women's and gender history and social and cultural history it may certainly be said that nothing can be assumed about shakespeare on the one hand the elizabethan poet seems to be thriving with more editions productions studies and translations appearing every year on the other hand in a time of global crisis and decolonization the question of why shakespeare is relevant at all is now more pertinent than ever shakespeare in succession approaches the question of relevance by positioning shakespeare as a participant as well as an object of adaptive translation a labour that has always mediated between the foreign and the domestic between the past and the present between the arcane and the urgent the volume situates shakespeare on a continuum of transfers that can be understood from cultural spatial temporal or linguistic points of view by studying how the text of shakespeare is transformed into other languages and examining shakespeare himself as a kind of translator of previous times older stories and prior theatrical and linguistic systems contending with the poet's contemporary fate shakespeare in succession asks how shakespeare's work can be offered to the multicultural present in which we live and how we might relate our position to that of the iconic writer modernists and the theatre is the first study to examine how theories of modernism intersect with those of the theatre within the works philosophies and literary lives of six key modernist writers drawing on a wealth of unfamiliar archive material and fresh readings of neglected documents james moran reveals how these literary figures interacted with the theatre through playwriting by engaging in philosophical debates and participating in theatrical performances chapters assess w b yeats's very earliest playwriting ezra pound's onstage acting the interconnections between james joyce's and d h lawrence's sense of drama eliot's thinking about theatre in dublin and the feminist politics of virginia woolf's small scale theatrical experiments while these writers valued coterie production and often made hostile comments about drama this volume highlights the paradoxical

fact that despite their harsh words the theatrically large scale also attracted each of these writers the theatre event of restricted production offered modernists a satisfying mode of sharing their work amongst the like minded and the book discloses a set of unfamiliar events of this sort that allowed these writers to act as agents of legitimation in granting cultural value the book explores their engagements with popular drama as well as the long forgotten acting performances in which each of these writers personally participated moran uncovers how the playhouse became a key geographical space where the high modernists could explore a tension that fascinated them and which motivated much of their wider thinking and literary work london s burning a great fire has swept through the heart of the city destroying everything in its path the living the dead and the undead alike and yet protected by the impenetrable walls of the tower of london a handful of people have somehow survived now they must strike out if they want to stay alive they re going to have to risk everything to get out of this hellish place then risk it all again to reach ledsey cross a fabled safe haven hundreds of miles away every step will be fraught with danger there will be no shortcuts and no easy options to stand any chance of a future the group will have to trek through the harshest of winters across a land ruled by the undead the final book in a standalone trilogy set in the nightmare world of david moody s international best selling autumn novels the original epic british zombie saga praise for david moody and the autumn series a head spinning thrill ride a cautionary tale about the most salient emotion of the 21st century hater will haunt you long after you read the last page guillermo del toro director of pan s labyrinth the shape of water on hater david moody s autumn dawn breathes new life into my favourite undead series craig dilouie author of episode thirteen autumn dawn is an instant classic of the zombie genre the sci fi and fantasy reviewer autumn inferno is an absolute blast from beginning to end 10 10 games brrraaains a head banging life with autumn inferno moody has once again demonstrated his undeniable ability to revolutionise the zombie as a staple of the horror genre reframing the humble shambling corpse as a genuinely terrifying opponent the scifi and fantasy book review traces the lyricism and musicality in pound s early verse through to his radical modernist style the first book in a new series spanning worlds and ages a war is raging between gods and demons with an unstoppable interdimensional terror the bleed destroying everything it touches from ancient alien civilisations through to modern day london through to deep space and beyond nothing and no one is safe the bleed wants flesh it wants to destroy life it wants to be worshipped london next week the bleed strains at the edges of reality and god has come to help earth make a stand against the demons from beyond but it s going to come down to one frightened kid to save the entire planet from a blood soaked fate the moon sometime in the future a covert mission to colonize the moon is earth s last chance the mission is going well until the brand new technology used to operate the colony begins failing mysteriously will the survivors of earth s civil war be caught up in a larger conflict they couldn t ever know anything about another world another time the gods of this world left to fight the bleed the war raged on the horizon at the very edge of this reality one morning there are screams at the shore and the red tide arrives the war against the monsters of the bleed is no longer forgotten history it s happening now
