The Dialogue in English Literature 1970 this book is a longitudinal study of a 10 year experimental teacher education program follow up studies and writing continued for 6 years after the program closed this case study describes a search for effective and socially just practices within a long term reform initiative intended to prepare teachers for urban schools the program was run through a professional development school a collaboration between a university program and a diverse group of practicing teachers and the book was written collaboratively by many of the participants faculty mentor teachers doctoral students and teacher candidates graduates there are few longitudinal studies of teacher education programs especially ones that focus on what was learned and told by those who did the learning the narratives here are rich diverse and multivocal they capture the complexity of a reform initiative conducted within a democratic context it's difficult messy and as varied as is democracy itself the program was framed by a sociocultural perspective and the focus was on learning through difference dialogue across difference which is more than just talk was both the method for doing research and the means for learning the program described here began in the ferment of teacher education reform in the early 1990s responding to the critics of the mid 1980s and this account of it is finished at a time when teacher education is again under attack from a different direction criticized earlier for being too progressive teacher education is now seen as too conservative the longitudinal results of this program show high retention rates and ground the argument that quality teacher preparation programs for teaching in urban schools may well be cost effective as well as provide increased student learning this is counter to the current move to shorten teacher preparation programs at a time of low teacher retention in our under resourced urban schools the book does not advocate a model for teacher education but it aims to provide principles for practice that include school university collaboration democratic dialogue across differences and inquiry as a way to guide reform
