Dual Process Theory 2.0 2017-11-09

dual process theory 2.0 provides a comprehensive overview of the new directions in which dual process research is heading human thinking is often characterized as an interplay between intuition and deliberation and this two headed dual process view of human thinking has been very influential in the cognitive sciences and popular media however despite the popularity of the dual process framework it faces multiple challenges recent advances indicate that there is a strong need to re think some of the fundamental assumptions of the original dual process model with chapters written by leading scholars who have been actively involved in the development of an upgraded dual process theory 2.0 this edited volume presents an accessible overview of the latest empirical findings and theoretical ideas with cutting edge insights on the interaction between intuition and deliberation dual process theory 2.0 should be of interest to psychologists philosophers and economists who are using dual process models

A Unified Theory of Polarity Sensitivity 2021

this book examines polarity sensitivity a ubiquitous phenomenon involving expressions such as anybody nobody ever never somebody and their counterparts in other languages with particular focus on arabic these expressions belong to different classes such as negative and positive polarity negative concord and negative indefinites which led to examining their syntax and semantics separately in this book ahmad alqassas pursues unified approach that relies on examining the interaction between the various types of polarity sensitivity treating this interaction is fundamental for scrutinizing their licensing conditions alqassas draws on data from standard arabic and the major regional dialects represented by jordanian egyptian moroccan and qatari the book provides a new perspective on the syntax semantic interface and develops a unified syntactic analysis for polarity sensitivity through the micro comparative approach alqassas explains the distributional contrasts with a minimal set of universal syntactic operations such as merge move and agree and fine grained inventory of negative formal features for polarity items and their licensors the features are simple invisibles that paint a complex landscape of polarity the results suggest that syntactic computation of arabic polarity externally merged in left periphery is subservient to the conceptual intentional interface alqassas argues for last resort insertion of covert negation operators in the cp layer to interpret non strict ncis which is an extra mechanism that serves the semantic interface but adds to the complexity of

syntactic computation likewise head npis in the left periphery require licensing by operators higher than the tense phrase adding more constraints on the syntactic licensing

Classics and Media Theory 2020-04-09

introducing a largely neglected area of existing interactions between greco roman antiquity and media theory this volume addresses the question of why interactions in this area matter and how they might be developed further it aims not only to promote awareness of the presence of the classics in media theory but also to encourage more media attentiveness among scholars of greece and rome by bringing together an international team of scholars with interdisciplinary expertise in areas ranging from classical literature and classical reception studies to art history media theory and media history film studies philosophy and cultural studies the volume as a whole engages with numerous aspects of classical greece and rome revolving around issues of philosophy cultural history literature aesthetics and epistemology each chapter provides its own definition of what constitutes mediality and how it operates constructs different genealogies of the concept of the medium and engages with emergent fields within media studies that range from cultural techniques to media archaeology diagrammatology and intermediality by seeking to foreground the persistency of greco roman paradigms across the different strands of media theory the volume persuasively calls for a closer consideration of the conceptual underpinnings of the cultural practices around the transformation of ancient greece and rome into classics

Aravind Rao's Law Guide 2020-06-15

aravind rao s law guide for ts and ap lawcet is an academic book to crack ts and ap law entrance exam our endeavours to make this book for the readers from various educational backgrounds we have made the contents of this books relevant from the exam point of view and has been updated as per the current exam pattern and this book covers various topics for the exam

Algorithmic Decision Theory 2015-08-27

this book constitutes the thoroughly refereed conference proceedings of the 4th international conference on algorithmic decision theory adt 2015 held in september 2015 in lexington usa the 32 full papers presented were carefully selected from 76 submissions the papers are organized in

topical sections such as preferences manipulation learning and other issues utility and decision theory argumentation bribery and control social choice allocation and other problems doctoral consortium

Positioning the Academic Library within the University 2021-05-13

academic libraries are facing uncertain times the international higher education environment is very volatile and academic libraries and librarians can play a major role in helping to strategically position their parent institution within it in doing so there needs to be clarity as to what the position of the academic library is with regard to the role and function it has within the university and how library leadership can have pan institutional influence and impact there are several ways in which the academic library can position itself and this collection demonstrates many of these strategic alignment with the university and its mission is a fundamental part of successful positioning as is being flexible adaptable and responsive to changing needs requirements and expectations developments in research support and scholarly communications as well as super convergences with other academic support departments are examples of such responsiveness these topics along with other emerging themes such as library functions and institutional partnerships and collaborations are all discussed in the book and provide the reader with a rich variety of reflections and case studies on how academic libraries from across the globe have addressed their position within their institution this book was originally published as a special issue of the journal new review of academic librarianship

Race, Gender, and Image Repair Theory 2018-11-08

race gender and image restoration theory how digital media change the landscape explores themes that are relevant to the socio political landscape of twenty first century america including race and gender representation social media and traditional media framing and image restoration management

Information Security Theory and Practice 2016-09-19

this volume constitutes the refereed proceedings of the 10th ifip wg 11 2 international conference on information security theory and practices

wistp 2016 held in heraklion crete greece in september 2016 the 13 revised full papers and 5 short papers presented together in this book were carefully reviewed and selected from 29 submissions wistp 2016 sought original submissions from academia and industry presenting novel research on all theoretical and practical aspects of security and privacy as well as experimental studies of fielded systems the application of security technology the implementation of systems and lessons learned the papers are organized in topical sections on authentication and key management secure hardware systems attacks to software and network systems and access control and data protection

Dishonest Behavior: From Theory to Practice

2016-11-17

the rapidly growing field of behavioral ethics shows that dishonest acts are highly prevalent in all walks of life from corruption among politicians through flagrant cases of doping in sports to everyday slips and misdemeanors of ordinary people who nevertheless perceive themselves as highly moral when considered cumulatively these seemingly innocuous and ordinary unethical behaviors cause considerable societal damage and add up to billions of dollars annually research in behavioral ethics has made tremendous advances in characterizing many contextual and social factors that promote or hinder dishonesty these findings have prompted the development of interventions to curb dishonesty and to help individuals become more committed to ethical standards the current e book includes studies that test and advance current theory and deepen our understanding of the cognitive and physiological processes underlying dishonest behavior discuss possible implications of findings in behavioral ethics research for real life situations document dishonest behavior in the field and or directly examines interventions to reduce it

Technologies of Speculation 2020-07-28

an inquiry into what we can know in an age of surveillance and algorithms knitting together contemporary technologies of datafication to reveal a broader underlying shift in what counts as knowledge technologies of speculation reframes today s major moral and political controversies around algorithms and artificial intelligence how many times we toss and turn in our sleep our voluminous social media activity and location data our average resting heart rate and body temperature new technologies of state and self surveillance promise to re enlighten the black boxes of our bodies and minds but sun ha hong suggests that

the burden to know and to digest this information at alarming rates is stripping away the liberal subject that knows for themselves and risks undermining the pursuit of a rational public what we choose to track and what kind of data is extracted from us shapes a society in which my own experience and sensation is increasingly overruled by data driven systems from the rapidly growing quantified self community to large scale dragnet data collection in the name of counter terrorism and drone warfare hong argues that data s promise of objective truth results in new cultures of speculation in his analysis of the snowden affair hong demonstrates an entirely new way of thinking through what we could know and the political and philosophical stakes of the belief that data equates to knowledge when we simply cannot process all the data at our fingertips he argues we look past the inconvenient and the complicated to favor the comprehensible in the process racial stereotypes and other longstanding prejudices re enter our newest technologies by the back door hong reveals the moral and philosophical equations embedded into the algorithmic eye that now follows us all

Routledge Handbook of Physical Education Pedagogies 2016-08-05

the first fully comprehensive review of theory research and practice in physical education to be published in over a decade this handbook represents an essential evidence based guide for all students researchers and practitioners working in pe showcasing the latest research and theoretical work it offers important insights into effective curriculum management student learning teaching and teacher development across a variety of learning environments this handbook not only examines the methods influences and contexts of physical education in schools but also discusses the implications for professional practice it includes both the traditional and the transformative spanning physical education pedagogies from the local to the international it also explores key questions and analysis techniques used in pe research illuminating the links between theory and practice its nine sections cover a wide range of topics including curriculum theory development policy and reform transformative pedagogies and adapted physical activity educating teachers and analysing teaching the role of student and teacher cognition achievement motivation offering an unprecedented wealth of material the routledge handbook of physical education pedagogies is an essential reference for any undergraduate or postgraduate degree programme in physical education or sports coaching and any teacher training course with a physical education element

Becoming a Multicultural Educator 2023-07-17

becoming a multicultural educator developing awareness gaining skills and taking action focuses on the development and application of research based curriculum instruction and assessment strategies for multicultural education in pk 12 classrooms this text answers the growing need to prepare teachers to work with diverse populations of students in a way that is not just theoretical but readily applicable award winning authors william a howe and penelope l lisi balance theory and research via numerous exercises reflective experiences and lesson plans designed to heighten readers cultural awareness knowledge base and skill set the fully updated fourth edition is packed with new activities and exercises to illustrate concepts along with new topics case studies and interviews additional sections tackle current topics in multicultural education including the disparate effects of covid the black lives matter movement and the benefits of classroom diversity with the support of this practical and highly readable book readers will be prepared to teach in culturally responsive ways develop a critical understanding of culture and its powerful influence on teaching and learning and feel empowered to confront and address timely issues this title is accompanied by a complete teaching and learning package contact your sage representative to request a demo learning platform courseware sage vantage is an intuitive learning platform that integrates quality sage textbook content with assignable multimedia activities and auto graded assessments to drive student engagement and ensure accountability unparalleled in its ease of use and built for dynamic teaching and learning vantage offers customizable lms integration and best in class support it s a learning platform you and your students will actually love learn more assignable video with assessment assignable video available in sage vantage is tied to learning objectives and curated exclusively for this text to bring concepts to life watch a sample video now lms cartridge import this title s instructor resources into your school s learning management system lms and save time don t use an lms you can still access all of the same online resources for this title via the password protected instructor resource site learn more

The Mandela Effect 2019-11-04

are we living in another reality how would you feel if one day you awoke and discovered many things were different from the past you thought you knew author research experimenter jp moss takes you through the world of the mandela effect and asks the question are we being moved through parallel realities

Explorations in Critical Studies of Advertising 2021-11-26

this volume provides a thoughtful and wide ranging exploration of approaches to the critical study of advertising current and impending practices of advertising have in many ways exceeded the grasp of traditional modes of critique due at least in part to their being formulated in very different historical conditions to begin to address this lag this edited collection explores through critical discussion and application a variety of critical approaches to advertising authors address a variety of concrete examples in their chapters drawing on existing research while presenting new findings where relevant in order to maintain the relevance of this collection past this particular historical moment however chapters do not simply report on empirical work but develop a theoretical argument

Handbook of Research on Mixed Methods Research in Information Science 2021-12-02

mixed methods research is becoming prevalent in many fields yet little has been done to elevate mixed methods research in information science a comprehensive picture of information science and its problems is needed to further understand and address the issues associated with it as well as how mixed methods research can be adapted and used the handbook of research on mixed methods research in information science discusses the quality of mixed methods studies and methodological transparency sampling in mixed methods research and the application of theory in mixed methods research throughout various contexts covering topics such as the issues and potential directions for further research in mixed methods this comprehensive major reference work is ideal for researchers policymakers academicians librarians practitioners instructors and students

Re/Formation and Identity 2018-07-05

this innovative book applies contemporary and emergent theories of identity formation to timely questions of identity re formation and development in immigrant families across diverse ethnicities and age

groups researchers from across the globe examine the ways in which immigrants from africa asia europe and latin america dynamically adjust adapt and resist aspects of their identities in their host countries as a form of resilience the book provides a multidisciplinary approach to studying the multidimensional complexities of identity development and immigration and offers critical insights on the experiences of immigrant families key areas of coverage include factors that affect identity formation readjustment and maintenance including individual differences and social environments influences of intersecting immigrant ecologies such as family community and complex multidimensions of culture on identity development current identity theories and their effectiveness at addressing issues of ethnicity culture and immigration research challenges to studying various forms of identity re formation and identity the intersectionality of development culture and immigration is an essential resource for researchers professors and graduate students as well as clinicians professionals and policymakers in the fields of developmental social and cross cultural psychology parenting and family studies social work and all interrelated disciplines

Modern Discrete Mathematics and Analysis

2019-10-11

a variety of modern research in analysis and discrete mathematics is provided in this book along with applications in cryptographic methods and information security in order to explore new techniques methods and problems for further investigation distinguished researchers and scientists in analysis and discrete mathematics present their research graduate students scientists and engineers interested in a broad spectrum of current theories methods and applications in interdisciplinary fields will find this book invaluable

If Einstein Ran the Schools 2017-11-01

many world class thinkers and creators have been concerned about the state of education in the united states discover their thoughts on how children really learn and what teachers must do to optimally tap children s latent abilities during the last three decades education reformers have pushed standardized testing and policies like no child left behind and common core to improve test scores and proficiency in basic skills however during this period that author thomas armstrong calls the miseducation of america a number of troubling trends have surfaced including a decrease in creative thinking scores among children in kindergarten through third grade rather than focus on what s wrong

with the education system that has produced these outcomes armstrong lays out what creative thinkers know about how children should be educated in an extended thought experiment he asks what would happen if we turned the reins of educational policy over not to the politicians and educational bureaucrats but to eminent thinkers and creators like albert einstein pablo picasso martin luther king jr rachel carson doris lessing jane goodall and other seminal culture builders what might they say about the best way to educate a child if einstein ran the schools suggests that the answers to this intriguing question should guide future efforts to reform our nation s schools

Technology Enhanced Innovative Assessment

2018-10-19

assessment innovation tied to technology is greatly needed in a wide variety of assessment applications this book adopts an interdisciplinary perspective to learn from advances in developing technology enhanced innovative assessments from multiple fields the book chapters address the development of virtual assessments including game based assessment simulation based assessment and narrative based assessment as well as how simulation and game based assessments serve both formative and summative purposes further chapters address the critical challenge of integrating assessment directly into the learning process so that teacher effectiveness and student learning can be enhanced two chapters specifically address the psychometric challenges related to innovative items one chapter talks about evaluating the psychometric properties of innovative items while the other chapter presents a new psychometric model for calibrating innovative items embedded in multiple contexts in addition validity issues are addressed related to technology enhanced innovative assessment it is hoped that the book provides readers with rich and useful information about the development of several types of virtual assessments from multiple perspectives the authors include experts from industry where innovative items have been used for many years and experts from research institutes and universities who have done pioneering work related to developing innovative items with formative applications to facilitate learning in addition expert advice has been provided on validating such work

Individuation, Process, and Scientific Practices

2017-08-23

what things count as individuals and how do we individuate them it is a

classic philosophical question often tackled from the perspective of analytic metaphysics this volume proposes that there is another channel by which to approach individuation from that of scientific practices from this perspective the question then becomes how do scientists individuate things and therefore count them as individuals this volume collects the work of philosophers of science to engage with this central philosophical conundrum from a new angle highlighting the crucial topic of experimental individuation and building upon recent pioneering work in the philosophy of science an introductory chapter foregrounds the problem of individuation arguing it should be considered prior to the topic of individuality the following chapters address individuation and individuality from a variety of perspectives with prominent themes being the importance of experimentation individuation as a process and pluralism in individuation s criteria contributions examine individuation in a wide range of sciences including stem cell biology particle physics and community ecology other chapters examine the metaphysics of individuation its bearing on realism antirealism debates and interrogate epistemic aspects of individuation in scientific practice in exploring individuation from the philosophy of biology physics and other scientific subjects this volume ultimately argues for the possibility of several criteria of individuation upending the tenets of traditional metaphysics it provides insights for philosophers of science but also for scientists interested in the conceptual foundations of their work

Challenging the politics of early intervention

2018-04-05

a vital interrogation of the internationally accepted policy and practice consensus that intervention to shape parenting in the early years is the way to prevent disadvantage given the divisive assumptions and essentialist ideas behind early years intervention in whose interests does it really serve this book critically assesses assertions that the wrong type of parenting has biological and cultural effects stunting babies brain development and leading to a life of poverty and under achievement it shows how early intervention policies underpinned by interpretations of brain science perpetuate gendered classed and raced inequalities the exploration of future directions will be welcomed by those looking for a positive collectivist vision of the future that addresses the real underlying issues in the creation of disadvantage

Handbook of Parallel Constraint Reasoning

2019-07-09

this is the first book presenting a broad overview of parallelism in constraint based reasoning formalisms in recent years an increasing number of contributions have been made on scaling constraint reasoning thanks to parallel architectures the goal in this book is to overview these achievements in a concise way assuming the reader is familiar with the classical sequential background it presents work demonstrating the use of multiple resources from single machine multi core and gpu based computations to very large scale distributed execution platforms up to 80 000 processing units the contributions in the book cover the most important and recent contributions in parallel propositional satisfiability sat maximum satisfiability maxsat quantified boolean formulas qbf satisfiability modulo theory smt theorem proving tp answer set programming asp mixed integer linear programming milp constraint programming cp stochastic local search sls optimal path finding with a model checking for linear time temporal logic mc ltl binary decision diagrams bdd and model based diagnosis mbd the book is suitable for researchers graduate students advanced undergraduates and practitioners who wish to learn about the state of the art in parallel constraint reasoning

Global Competitiveness: Business Transformation in the Digital Era

2017-05-03

the proceedings of the economics and business competitiveness international conference ebcicon provides a selection of papers either research results or literature reviews on business transformation in the digital era nine major subject areas comprising accounting and governance customer relations entrepreneurship environmental issues finance and investment human capital industrial revolution 4 0 international issues and operations and supply chain management are presented in the proceedings these papers will provide new insights into the knowledge and practice of business and economics in the digital era therefore parties involved in business and economics such as academics practitioners business leaders and others will be interested in the contents of the proceedings

Data Analytics in Digital Humanities 2018-08-23

this book covers computationally innovative methods and technologies including data collection and elicitation data processing data analysis data visualizations and data presentation it explores how digital humanists have harnessed the hypersociality and social technologies benefited from the open source sharing not only of data but of code and made technological capabilities a critical part of humanities work chapters are written by researchers from around the world bringing perspectives from diverse fields and subject areas the respective authors describe their work their research and their learning topics include semantic web for cultural heritage valorization machine learning for parody detection by classification psychological text analysis crowdsourcing imagery coding in natural disasters and creating inheritable digital codebooks designed for researchers and academics this book is suitable for those interested in methodologies and analytics that can be applied in literature history philosophy linguistics and related disciplines professionals such as librarians archivists and historians will also find the content informative and instructive

Rules and Reasoning 2019-10-23

this book constitutes the proceedings of the international joint conference on rules and reasoning ruleml rr 2018 held in luxembourg during september 2018 this is the second conference of a new series joining the efforts of two existing conference series namely ruleml international rule symposium and rr reasoning and rule systems the 10 full research papers presented together with 5 long technical communications and 7 short papers were carefully reviewed and selected from 33 submissions

Morality and Epistemic Judgment 2018-09-13

moral judgments attempt to describe a reality that does not exist so they are all false this is the moral error theory a deeply troubling yet plausible view that is now one of the canonical positions in moral philosophy the most compelling argument against it is the argument from analogy according to this the moral error theory should be rejected because it would seriously compromise our practice of making epistemic judgments judgments about how we ought to form and revise our beliefs in light of our evidence and could undermine systematic thought and reason themselves christopher cowie provides a novel assessment of the recent

attention paid to this topic in moral philosophy and epistemology he reasons that the argument from analogy fails because moral judgments are unlike judgments about how we ought to form and revise our beliefs in light of our evidence on that basis a moral error theory does not compromise the practice of making epistemic judgments the moral error theory may be true after all cowie concludes and if it is then we will simply have to live with its concerning consequences

Self-praise in the US American sitcom The Big Bang Theory 2020-05-05

seminar paper from the year 2014 in the subject english language and literature studies other grade 1 3 university of bonn language english abstract even though self praise poses a socially problematic speech act it appears that self praise is used in sitcoms quite often for comic effects this term paper deals with the question which strategies the fictional character sheldon cooper in the us american sitcom the big bang theory applies when performing self praise on that account the paper will follow the lead of daria dayter in her article self praise in microblogging the strategies for self praise found by dayter will present the framework for this specific study therefore this paper will not deal with structural characteristics of those utterance but only with the strategies applied as self praise seems to be used for comic effects in the sitcom i assume that the results conducted in this paper will not contain many mitigation devices when self praise is being performed furthermore it seems that the article by dayter is the only specific study on self praise so far hence the study of self praise poses a quite unsought area and thus provides the possibility for an individual study that will not have to rely on previous studies with a similar content as this paper deals with self praise in the us american sitcom it poses an interesting crossover between the fields of film language and self praise studies as the study of self praise increasingly gained attention among researchers since self portrayal via social media websites like twitter became possible and almost socially acceptable spreading the issue to a scripted context constitutes a completely unexplored area of research in this paper i will first give a brief overview of dayter s study on the topic in my literature review section i will also take into account some important studies on compliment responses as dayter extracted her strategies for self praise from those then there will be an elaboration on the methodology applied to this paper followed by a more detailed outline of the strategies and the data that will be investigated in this work afterwards the results will be presented and ultimately a critical discussion of the findings

in the end a conclusion will be provided to give an overview for further possible fields of research and to offer a precise summary of the results

Capitalism and Freedom in African Political Philosophy 2019-12-12

this book investigates capitalism and freedom the guiding forces of many political systems in african philosophy it builds on classical and neoliberal capitalism rooted in private property and freedom and argues for the presence of these elements in the traditional and modern african political systems the author argues that while these elements are partly imported from western capitalists they are equally traceable in african traditional political systems kayange argues that african politics is marred by a conflict between embracing capitalism and freedom individualism on the one hand and socialism founded on african communitarianism and communist ideas on the other this conflict has affected policy development and implementation and has significantly contributed towards the socio economic and ethical crises that are recurrent in most of the african countries

Creating Economic Space for Social Innovation 2016-11-12

this book draws upon economic and sociological theory to provide a comprehensive discussion of economic space for social innovation addressing especially marginalized groups and the long term projects programmes and policies that have emerged and evolved within and across european states it approaches the explanatory and normative questions raised by this topic via a novel approach the extended social grid model esgm taking inspiration from the fields of economic sociology and ethics this model shows that social innovation processes must be structural and require change in power relations if marginalization is to be effectively dealt with via social innovation part i of the book sets out the esgm including an exposition on the model along with background chapters on innovation power and marginalization ethics and social innovation and empirical methods part ii explores the model with a focus on social innovation trajectories of social housing drinking water provision employment education and food provision it also explores the operationalization of the model with a view to agency and empowerment as well as social innovation policy in europe and the use of social impact bonds as a tool for financing social innovation part iii revisits the

esgm and considers the explanatory adequacy and fruitfulness of the model for innovation research and for theorizing social innovation addressing questions on the role and limitations of participation in social innovation for the marginalized the role of capital for creating economic space for capabilities and how we can approach the social impact of social innovation this collection of essays presents a diverse range of perspectives on understanding and addressing the key issue of marginalization and offers key recommendations for policy makers engaging with social innovation across the european union and beyond

Paradigms and Theories Influencing Policies in the South African and International Water Sectors 2022-05-05

this book presents a new way of looking at and analyzing policies programs and or plans in which research scientists have used their knowledge to develop mechanisms such as south africa s national water resource strategy second edition australian and south african climate change adaptation strategies for government entities and the undp s water and ocean governance focus area it critically assesses how science can be used in the service of society and how researchers and practitioners can bridge the gaps that arise as a result of incomplete thinking presenting a bird s eye view of how thinking and understanding operate in the policy context it offers a valuable contribution to fields of inquiry such as research methods comparative analyses political science international relations and the natural and social sciences in general this book fills a market gap providing real world solutions to the practical application of science paradigms and theories

The SAGE Handbook of Qualitative Research in the Asian Context 2019-07-29

spanning the full research process from philosophy and ethics to design and methods and through data collection management analysis and dissemination this handbook focuses specifically on the practicalities needed to conduct effective and culturally responsive research in the asian context

Utility, Publicity, and Law 2018-02-21

the essays in this volume offer a reassessment of jeremy bentham s

strikingly original legal philosophy early on bentham discovered his genius for legislation legislation included not only lawmaking and code writing but also political and social institution building and engineering of public spaces for effective control of the exercise of political power in his general philosophical work bentham sought to articulate a public philosophy to guide and direct all of his legislative efforts part i explores the philosophical foundations of his public philosophy his theory of meaning and framework for analysis and definition of key concepts his theory of human affections and motivations and his utilitarian theory of value it is argued that while concepts of pleasure and happiness play nominal roles in his theory of value concepts of publicity equality and interests emerge as the dominant concepts of his public philosophy part ii explores several dimensions of bentham s jurisprudence including his radically revised command model of law his early reflections on justice and law in adjudication his theories of judicial evidence constitutional rights the rule of law and international law the concluding essay demonstrates the centrality of the notion of publicity in his moral legal and political thought emerging from this study is a positivist legal theory and a utilitarian moral political philosophy that challenge in fundamental ways contemporary understandings of those doctrines

Policy Analysis in the United States 2023-03-07

policy analysis in the united states gathers a group of original contributions by scholars and leading practitioners of public policy analysis originating in the united states the field of public policy analysis has affected nations around the world and been enhanced by contributions of scholars and practitioners in other regions but it remains most highly developed and practiced in education and government here this volume explores the nature of policy analysis in different sectors and at different levels of government as well as by nongovernmental actors such as unions businesses ngos and the media

Metaphysics and Gender: The Normative Art of Nature and Its Human Imitations 2020-01-24

the emergent science of transgenderism and related philosophies of gender propose a full scale inversion of the understanding of god man and the created order articulated in classical metaphysics undermining and parodying both the causality and ontology voiced by genesis 1 27 god created man in his own image male and female he created them whether through subversive performative identity or by surgical sex change the

divinely made human person is now threatened with abolition and replacement by the self made man and the man made woman in metaphysics and gender michele m schumacher offers a corrective to this distorted and distorting outlook calling for the recovery of an anthropological vision rooted in recognition of the normative divine art of nature and of the likeness and far greater unlikeness between divine and human causality surveying contemporary transgender trends schumacher identifies and excavates their conceptual and ideological foundations in the gender theory of judith butler the existentialist feminism of simone de beauvoir and the atheistic existentialism of jean paul sartre to the erroneous philosophical presuppositions of these thinkers schumacher contrasts the metaphysically grounded thought of aristotle and thomas aquinas advancing their positive account of the good of creation and of the meaning of ethical norms human freedom and natural inclinations and embodiment and mounting a timely and trenchant defense of the divinely created human person

The Sartrean Mind 2016-11-18

jean paul sartre was one of the most important philosophers of the twentieth century his influence extends beyond academic philosophy to areas as diverse as anti colonial movements youth culture literary criticism and artistic developments around the world beginning with an introduction and biography of jean paul sartre by matthew c eshleman 42 chapters by a team of international contributors cover all the major aspects of sartre s thought in the following key areas sartre s philosophical and historical context sartre and phenomenology sartre existentialism and ontology sartre and ethics sartre and political theory aesthetics literature and biography sartre s engagements with other thinkers the sartrean mind is the most comprehensive collection on sartre published to date it is essential reading for students and researchers in philosophy as well as for those in related disciplines where sartre s work has continuing importance such as literature french studies and politics

The Routledge Companion to Digital Journalism Studies 2017-05-24

the routledge companion to digital journalism studies offers an unprecedented collection of essays addressing the key issues and debates shaping the field of digital journalism studies today across the last decade journalism has undergone many changes which have driven scholars to reassess its most fundamental questions and in the face of digital

change to ask again who is a journalist and what is journalism this companion explores a developing scholarly agenda committed to understanding digital journalism and brings together the work of key scholars seeking to address key theoretical concerns and solve unique methodological riddles compiled of 58 original essays from distinguished academics across the globe this companion draws together the work of those making sense of this fundamental reconceptualization of journalism and assesses its impacts on journalism's products its practices resources and its relationship with audiences it also outlines the challenge presented by studying digital journalism and more importantly offers a first set of answers this collection is the very first of its kind to attempt to distinguish this emerging field as a unique area of academic inquiry through identifying its core questions and presenting its fundamental debates this companion sets the agenda for years to come in defining this new field of study as digital journalism studies making it an essential point of reference for students and scholars of journalism

Biological Individuality 2019-01-08

Critical Rhythm 2024-04-25

this book shows how rhythm constitutes an untapped resource for

understanding poetry intervening in recent debates over formalism historicism and poetics the authors show how rhythm is at once a defamiliarizing aesthetic force and an unstable concept distinct from the related terms to which it is often assimilated scansion prosody meter rhythm makes legible a range of ways poetry affects us that cannot be parsed through the traditional resources of poetic theory rhythm has rich but also problematic roots in still lingering nineteenth century notions of primitive oral communal and sometimes racialized poetics but there are reasons to understand and even embrace its seductions including its resistance to lyrical voice and even identity through exploration of rhythm's genealogies and present critical debates the essays consistently warn against taking rhythm to be a given form offering ready made resources for interpretation pressing beyond poetry handbooks isolated descriptions of technique or inductive declarations of what rhythm is the essays ask what it means to think rhythm rhythm the contributors show happens relative to the body on the one hand and to language on the other two categories that are distinct from the literary the mode through which poetics has tended to be analyzed beyond articulating what rhythm does to poetry the contributors undertake a genealogical and theoretical analysis of how rhythm as a human experience has come to be articulated through poetry and poetics the resulting work helps us better understand poetry both on its own terms and in its continuities with other experiences and other arts contributors derek attridge tom cable jonathan culler natalie gerber ben glaser virginia jackson simon jarvis ewan jones erin kappeler meredith martin david nowell smith yopie prins haun saussy

The Epistemology of Desire and the Problem of Nihilism

most people have wondered whether anything really matters some have temporarily thought that nothing really matters and some philosophers have defended the view that nothing really matters however if someone thinks that nothing matters if they are a nihilist about value then it seems that it is irrational for them to care about anything it seems that nihilism about value mandates total indifference this is the problem of nihilism allan hazlett addresses in the epistemology of desire and the problem of nihilism hazlett argues that the problem of nihilism arises because desire and thus caring is a species of evaluation that admits of irrationality this contradicts the influential humane view that desire does not admit of irrationality which has a ready solution to the problem of nihilism since desire does not admit of irrationality it cannot be irrational to care about something that you

believe does not matter however following g e anscombe hazlett argues that desire has the same relationship to goodness as belief has to truth just as truth is the accuracy condition for belief goodness is the accuracy condition for desire this reveals desire as an appropriate target of epistemological inquiry in the same way that belief is an appropriate target of epistemological inquiry desires can amount to knowledge in the same way that beliefs can amount to knowledge and crucially for the problem of nihilism desire admits of irrationality in the same way that belief admits of irrationality nevertheless although it is obviously irrational to believe something that you believe is not true hazlett argues that it is not irrational to desire something you believe is not good despite the fact that goodness is the accuracy condition for desire this provides a solution to the problem of nihilism and shows that nihilism about value can coherently be combined with the anti humean view that desire is a species of evaluation
