this book presents an east west dialogue of leading translation scholars responding to and developing martha cheung s pushing hands method of translation studies pushing hands was an idea martha began exploring in the last four years of her life and only had time to publish at article length in 2012 the concept of pushing hands suggests a promising line of inquiry into the problem of conflict in translation pushing hands opens a new vista for translation scholars to understand and explain how to develop an awareness of non confrontational alternative ways to handle translation problems or problems related to translation activities that are likely to give rise to tension and conflict the book is a timely contribution to celebrate martha s work and also to move the conversation forward despite being somewhat tentative and experimental it probes into how to enable and develop dynamic interaction between and reciprocal determinism of different hands involved in the process of translation

the secret to good government is a question no one in washington is asking what s the right thing to do what s wrong in washington is deeper than you think yes there s gridlock polarization and self dealing but hidden underneath is something bigger and more destructive it s a broken governing system from that comes wasteful government rising debt failing schools expensive health care and economic hardship rules have replaced leadership in america bureaucracy regulation and outmoded law tie our hands and confine policy choices nobody asks what s the right thing to do here instead they wonder what does the rule book say there s a fatal flaw in america s governing system trying to decree correctness through rigid laws will never work public paralysis is the inevitable result of the steady accretion of detailed rules america is now run by dead people by political leaders from the past who enacted mandatory programs that churn ahead regardless of waste irrelevance or new priorities america needs to radically simplify its operating system and give people officials and citizens alike the freedom to be practical rules can t accomplish our goals only humans can get things done in the rule of nobody philip k howard argues for a return to the framers vision of public law setting goals and boundaries not dictating daily choices this incendiary book explains how america went wrong and offers a guide for how to liberate human ingenuity to meet the challenges of this century

at last here is a book that shows women how to recognize the shadow negotiation in which the unspoken attitudes hidden assumptions and conflicting agendas that drive the bargaining process play out and how to use that knowledge to their advantage each time people bargain over issues a promotion a contract with a new client a bigger role in decision making a parallel negotiation unfolds beneath the surface of the formal discussion bargainers constantly maneuver to determine whose interests and needs will hold sway whose opinions will matter and how cooperative each person will be in reaching an agreement how the issues are resolved hangs on the actions people take in the shadow negotiation yet it is in this shadow negotiation that women most often run into trouble the most productive negotiations take place when strong advocates can connect with each other good results depend equally on a bargainer s positioning her ideas for a fair hearing and on being open to the other side s point of view but traditionally women have not fared well on either front often they let negotiable moments slip by and take the first no as a final answer or their efforts to be responsive to the other side s position are interpreted as accommodation as a result women can come away from negotiations with fewer dollars perks plum assignments or less say in decision making than men to negotiate effectively women must pay attention to acts of self sabotage as well as to the moves others make in the shadow negotiation by bargaining more strategically women can establish the terms of their advocacy their voice and at the same time encourage the open communication essential to a collaborative discussion in which not only acceptable but creative agreements can be worked out written by deborah m kolb and judith williams two authorities in the field the shadow negotiation shows

women a whole new way to think about the negotiation process kolb and williams identify the common stumbling blocks that women encounter and present a game plan for turning their particular strengths to their advantage based on extensive interviews with hundreds of business women the shadow negotiation provides women with a clear insightful guide to the hidden machinations that are at work in every bargaining situation

the ten volumes of handbook of pragmatics highlights focus on the most salient topics in the field of pragmatics thus dividing its wide interdisciplinary spectrum in a transparent and manageable way while other volumes select philosophical cognitive cultural social variational interactional or discursive points of view this fifth volume looks at the field of linguistic pragmatics from a primarily grammatical angle that is it asks in which particular sense a variety of older and more recent functional rather than generative models of grammar relate to the study of language in use how this affects their general outlook on language structure whether issues of language use inform the very makeup of these models or are merely included as possible research themes and how far the actual integration of pragmatics ultimately goes is it a module layer or is the model truly usage based each of the authors presenting these models has taken systematic care to highlight the relevant problems and focus on the implications of considering pragmatic phenomena from the point of view of grammar furthermore a limited number of chapters deal with traditional topics in the grammatical literature and specifically those which are called pragmatic because they either are not strictly concerned with truth semantics or receive their truth value only from an interaction with context in the introduction these theories and topics are set up against the historical background of a gradually changing attitude on the part of grammarians towards questions of linguistic knowledge and behavior and the role of learning in their relationship
