excerpt from the goulstonian lectures on the sensibility of the alimentary canal delivered at the royal college of physicians on march 14 16 21 1911 with the exception of a short addition to the chapter on hunger made in accordance with a suggestion of sir william allchin and the references to the work of weber steinhauser gliicksmann and kast and meltzer this book is a reprint of the goulstonian lectures as they were delivered in march 1911 before the royal college of physicians and published in the lancet in april and may 1911 a division into chapters has been substituted for the original division into lectures a preliminary

account of some of the observations recorded in these lectures was published in the journal of physiology xxxvii 481 1908 and in a somewhat fuller form in the Guy's Hospital Reports ixiv 393 1910 I desire to offer my sincere thanks to the authorities of the Royal College of Physicians for the honour they conferred upon me by their invitation to deliver these lectures I also desire to express my gratitude to my co-workers whose names appear in the text as without their help the investigations upon which these lectures are based could never have been carried out and to Dr C H Rippmann for reading the manuscript and for many helpful criticisms about the publisher Forgotten Books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state-of-the-art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy

excerpt from the student s handbook of the surgery of the alimentary canal being an abridged and amended edition of the author s treatise on the same subject tn present work is an abridged and amended edition of my treatise on the same subject published in 1896 so far as space would permit and commensurate with the object in view of placing the material at my disposal in a form that would commend itself alike to the student and general practitioner i have endeavoured to introduce such additional information on the subject as has been gleaned through personal experience during the last four years the abridgment has been mainly

effected by the elimination of detailed reports of illustrative cases and of many references both of which while they materially assist in elucidating and amplifying the text tend to add very much to the bulk and expense of a book about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
