in 1976 the bicentennial year robert penn warren told bill moyers that he was in love with america but his love for the nation was more often than not troubled and angry warren once remarked that any intelligent person is inclined to criticize his country more strongly than he will criticize anything else and he should it s a way of criticizing himself too trying to live more intelligently and more fully in the american vision of robert penn warren a noted warren scholar traces the evolution of our first poet laureate s distinctive stance toward the american experiment in democracy showing how warren sought to balance off the claims of self and society in the new world this book surveys the full six decades of warren s career combining close reading with a historian s eye for social and political context while pointedly avoiding the reductive pitfalls of the new historicism clark documents the informing role the great depression played in shaping warren s attitudes toward art and politics and he demonstrates the necessity of regarding warren s major achievements in fiction and verse as forms of public speech read in this light warren s vision offers a set of possibilities for renegotiating america s covenant with its founders on new and pragmatic terms based solidly on the best previous commentary on warren and his work clark s study represents a new approach to its subject and incorporates insights and information garnered from the warren papers at yale a wide ranging account of the interplay between an author s imagination and contemporary history this book should prove of interest to all students of american culture especially those concerned with the interrelationships of literature politics and ideology written in a lively and direct style it will appeal to specialists and general readers alike

by donald j albers ix introduction in july of 1984 the first national conference on mathematics education in two year colleges was held at menlo college the conference was funded by the alfred p sloan foundation two year colleges account for more than one third of all undergraduate enrollments in mathematics and more than one half of all college freshmen are enrolled in two year colleges these two facts alone suggest the importance of mathematics education in two year colleges particularly to secondary schools four year colleges and universities for a variety of reasons four year colleges and universities are relatively unaware of two year colleges arthur cohen who was a participant at the new directions conference warns four year colleges and universities ignore two year colleges at their own peril ross taylor another conference participant encouraged two year college faculty to be ever mindful of their main source of students secondary schools and to work hard to strengthen their ties with them there are many other reasons why it was important to examine two year college mathematics from a national perspective 1 over the last quarter century rio other sector of higher education has grown so rapidly as have two year colleges their enrollments tripled in the 60 s doubled in the 70 s and continue to increase rapidly in the 80 s x 2 twenty five years ago two year colleges accounted for only one seventh of all undergraduate mathematics enrollments today the fraction is more than one third

a great deal of uncertainty exists in the church as to what mission really is the shifts in political power away from the traditionally christian west the call for a moratorium and the other critical voices from the third world churches and the increasing self assurance and missionary consciousness among adherents of non christian religions all these have given rise to the question whether christian mission work still makes sense and if it does what form it should take is mission identical to evangelism in the sense of proclaiming eternal salvation does it include social and political involvement and if so how where does salvation take place only in the church or in the individual or in society or in the world or in the non christian religions the picture is one of change and complexity tension and urgency the answers we give to these questions must be consonant with the will of god and relevant to the situation in which we find ourselves
