Demand and Supply of Skills in Ghana

2014-07-03

skills development in Ghana encompasses foundational skills transferable soft skills and technical and vocational skills this report focuses on one segment of this skills development system formal and informal technical and vocational education and training tvet at the pre tertiary level tvet represents a major intersection between education youth and the labor market the government has long promised to the population that increasing technical and vocational skills training opportunities will help solve youth unemployment however market distortions and inefficiencies have led to an adverse cycle of high costs inadequate quality of supply and low demand leading to further pressures on the effectiveness and efficiency of tvet services this adverse cycle means that the political and policy promise of skills development helping to ease the unemployment problem is at risk of remaining unfulfilled the report focuses on social and economic demand for pre tertiary technical and vocational skills and maps out the supply of these skills from formal and informal private and public sectors the dual purpose has been to both carry out an institutional and policy analysis and also to establish a platform for monitoring sector performance and assisting policy and development partner harmonization

the report analyzes the economic and social demand for technical and vocational skills and the suitability of the current supply as well as the effectiveness of policy coordination and financing of technical and vocational skills development the report annex provides the summary of economic demand analyses from the key sectors reviewed and provides a full mapping of all technical and vocational programs in ghana the study offers a comprehensive set of policy recommendations for improving ghana s pre tertiary technical and vocational skills development sector which will be of interest to policy makers and development partners in ghana

Harnessing the Fourth Industrial Revolution through Skills Development in High-Growth Industries in Central and West Asia—Uzbekistan

2023-05-01

fourth industrial revolution 4ir technologies have brought about unprecedented changes to labor markets and the coronavirus disease further hastened digital transformations while the application of 4ir technologies spell opportunities for productivity growth and income gains they also create challenges including job

losses investing in skills for 4ir and incorporating 4ir technologies in the delivery of training can smoothen the transition to 4ir workplaces to provide insights on the opportunities of 4ir studies were undertaken in three countries azerbaijan pakistan and uzbekistan this report focusing on uzbekistan presents evidence from surveys of employers and training institutions as well as an analysis of job portals for the agro processing and transportation and storage sectors it lays out policy directions and actions to harness the benefits of 4ir for growth employment and inclusive development

International Handbook of Education for the Changing World of Work

2009-06-29

this book explores the key issues and problems pertaining to career development and unemployment problems that currently undersiege the hopes of malaysian graduates

New Models for Technical and Vocational Education and Training

2023-07-02

in the face of accelerated economic globalisation many of the industries in economically less developed countries have become more technology intensive skill formation processes both inside and outside firms are therefore changing this study scrutinises such transformations by comparing from the perspective of historical institutionalism the skill formation regimes of the garment industries in sri lanka and bangladesh it sheds light on the differences between the trajectories of the in

firm skill formation regimes of the two countries and reveals the important part that varying paths of educational development in both countries have played in shaping these trajectories at the same time the study shows how in both countries state led skill formation regimes have been transformed not only by market forces and the growing importance of corporate business interests but also by the social demand for educational credentials

Quality Education and International Partnership for Textile and Fashion

2015-10-21

this book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training yet revealing how youth in transition is affected by economic crises it provides essential insights into the strengths and weaknesses of the various systems and prospects of vet in contexts ranging from north america to europe e g spain germany or the uk to asia such as china thailand and india though each country examined in this volume is affected by the economic crisis in a different way the effects are especially apparent for the young generation in many countries the youth unemployment rate is still

very high and the job perspectives for young people are often limited at best the contributions in this volume demonstrate that vet alone cannot solve these problems but can be used to support a smooth transition from school to work if the quality of vet is high and the status and job expectations are good vet can help to fill the skills gap especially at the intermediate skill level furthermore vet can also offer a realistic alternative to the university track for young people in many countries

Countrywide

2005

this volume contains technical papers and panel position papers selected from the proceedings of the international symposium on information systems and technologies for network society held together with the ipsj information processing society of japan national convention in september 1997 papers were submitted from all over the world especially from japan korea and china since these countries are believed to form one of the major computer manufacturing centers in the world a panel on computer science education for the 21st century was set up a special session on the japanese project on software engineering invited representative

researchers from the project which is supported by the ministry of education japan

Career Development and Unemployment Problems in Malaysia

toward a better future provides a comprehensive analysis of education development in singapore since 1965 giving particular attention to the strategic management that has enabled singapore to transform its education and training system from one similar to that of many sub saharan african countries four decades ago into one of the world s best performing systems it is one of a pair of concurrently published books presenting materials originally developed for a 2006

study tour to singapore and vietnam for senior education officials from cameroon ethiopia ghana lesotho madagascar and mozambique the second book an african exploration of the east asian education experience presents five country studies as well as regional comparative analyses highlighting insights gained during the study tour and putting them in the context of sub saharan africa together the two books aim to foster knowledge exchange between sub saharan african and east asian countries on good practices in the design and implementation of education policies and programs by facilitating the cross country fertilization of ideas between two regions with relatively limited contact in the past these books fill a clear gap in the current literature on development practice in education

Skill Formation Regimes in South Asia

1960

communication is changing rapidly around the world particularly in africa where citizens are embracing digital technologies not only to improve not only interpersonal communication but also the state of their financial well being this book investigates these transformations in nigeria s booming communication industry the book traces communications in nigeria back to pre colonial indigenous

communications through the development of telecommunication broadcasting networks the press the nigerian film industry nollywood and on to the digital era at a time when western voices still dominate the academic literature on communication in africa this book is noteworthy in drawing almost exclusively on the expertise of nigerian based authors critiquing the discipline from their own lens and providing an important contribution to the decolonisation of communication studies the authors provide a holistic analysis of the sector encompassing print journalism broadcast journalism public relations advertising film development communication organisational communication and strategic communication analysis of the role of digital technologies is woven throughout the book concluding with a final section theorising the future of communication studies in nigeria in the light of the digital media revolution robust in its theoretical and methodological underpinnings this book will be an important reference for researchers of media and communication studies and those working on africa specifically

Reading in Unemployment

2010

this book is to expose youths educators counsellors and parents to the current

demands in the workplace and how there is an urgent need to strengthen and develop deep skills and work related competencies among youths to prepare them for a more self fulfilling career path the reader will realise the importance of eradicating some of the work related myths and recognise that matching of one s interest and passion has greater priority than salary prestige or expectations of parents the book will also expose other essential skills necessary in the transition to the job market such as the role of internship and mentors to assist youths to build their confidence as well as some personal social emotional competencies like their ability to be conscious of their thoughts and emotions as they self manage and self regulate themselves so that they are always aware of how to use their strengths to engage and relate with others as they make responsible decisions in their career plans or workplace contents introduction preparing for work equipping for the future lim boon huat why youths need to be prepared for work eden liew developing social emotional competencies for life understanding oneself through self awareness jessie ee managing and regulating emotions jessie ee developing and promoting social awareness jessie ee relationship management jessie ee making responsible decisions jessie ee developing work related competencies at home and in school knowing oneself and career counselling ian tan melvin chia getting the most out of industry internships joel lee employability skills in career preparation agnes chang networking through collaborative learning agnes chang building confidence and

resilience esther tan fostering critical communication skills for the future jeffrey mok sharpening your resume writing and interview skills adelaide chang work values through sports john tan preparing our children for tomorrow s world tan khye suan preparing future ready students a teacher s perspective brian lui nurturing primary students for the real world siah siew ling chiok hwee fen self regulation of ad h d habits chelsea chew using positive psychology to help young adults with high functioning autism transit to the workplace chelsea chew readership students parents educators and the general public key features currently there is an urgent need to publish this book in singapore and many of the third world countries so that our youths can be more purpose driven and not job hopping with no direction there are also activities in the book that help youths as well as practitioners to build on their skills and competencies keywords youths employers expectations employability skills social emotional competencies career guidance resume writing interview skills internship communication skills self regulation
