Technical Paper

1979

the united nations arms trade treaty became binding international law in late 2014 and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by states parties there exists controversy as to the meaning of certain key provisions furthermore the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty but does not detail how such a body should be established and how it should effectively function the arms trade treaty a commentary explains in detail each of the treaty provisions the parameters for prohibitions or the denial of transfers international cooperation and assistance and implementation obligations and mechanisms as states ratify and implement the treaty over the next few years the commentary provides invaluable guidance to government officials commentators and scholars on the meaning of its contentious provisions this volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the arms trade treaty regulates it covers international human rights trade disarmament humanitarian law criminal law and state to state use of force as well as the application of the treaty to non state actors

Technical Paper (United States. Bureau of the Census).

1992

this book addresses how core notions of information structure topic focus and contrast are expressed in syntax the authors propose that the syntactic effects of information structure come about as a result of mapping rules that are flexible enough to allow topics and foci to be expressed in a variety of positions but strict enough to capture certain cross linguistic generalisations about their distribution in particular the papers argue that only contrastive topics and contrastive foci undergo movement and that this is because such movement has the function of marking the scope of contrast several predications are derived from this proposal such as that a focus cannot move across a topic whether the latter is in situ or not syntactic and semantic evidence in support of this proposal is presented from a wide range of languages including dutch english japanese korean and russian and theoretical consequences explored the first chapter not only outlines its theoretical aims but also provides an introduction to information structure as a consequence the book is accessible to advanced students as well as professional linguists

Working Paper 1

2023-06-01

ontology began life in ancient times as a fundamental part of philosophical enquiry concerned with the analysis and categorisation of what exists in recent years the subject has taken a practical turn with the advent of complex computerised information systems which are reliant on robust and coherent

representations of their subject matter the systematisation and elaboration of such representations and their associated reasoning techniques constitute the modern discipline of formal ontology which is now being applied to such diverse domains as artificial intelligence computational linguistics bioinformatics gis knowledge engineering information retrieval and the semantic researchers in all these areas are becoming increasingly aware of the need for serious engagement with ontology understood as a general theory of the types of entities and relations making up their respective domains of enquiry to provide a solid foundation for their work the conference series formal ontology in information systems fois provides a meeting point for researchers from these and other disciplines with an interest in formal ontology where both theoretical issues and concrete applications can be explored in a spirit of genuine interdisciplinarity this volume contains the proceedings of the sixth fois conference held in toronto canada during 11 14 may 2010 including invited talks by francis jeffrey pelletier john bateman and alan rector and the 28 peer reviewed submissions selected for presentation at the conference ranging from foundational issues to more application oriented topics ios press is an international science technical and medical publisher of high quality books for academics scientists and professionals in all fields some of the areas we publish in biomedicine oncology artificial intelligence databases and information systems maritime engineering nanotechnology geoengineering all aspects of physics e governance e commerce the knowledge economy urban studies arms control understanding and responding to terrorism medical informatics computer sciences

1990

this book describes the fundamental scientific principles underlying high quality instrumentation used for environmental measurements it discusses a wide range of in situ sensors employed in practical environmental monitoring and in particular those used in surface based measurement systems it also considers the use of weather balloons to provide a wealth of upper atmosphere data to illustrate the technologies in use it includes many examples of real atmospheric measurements in typical and unusual circumstances with a discussion of the electronic signal conditioning data acquisition considerations and data processing principles necessary for reliable measurements this also allows the long history of atmospheric measurements to be placed in the context of the requirements of modern climate science by building the physical science appreciation of the instrumental record and looking forward to new and emerging sensor and recording technologies

software has become an essential enabler for science and the economy not only does it create new markets and the possibility of a more reliable flexible and robust society it also empowers our exploration of the world in ever increasing depth however software often falls short of our expectations with current methodologies tools and techniques remaining insufficiently robust and reliable for constantly changing and evolving needs this book presents papers from the 15th international conference on new trends in intelligent software methodology tools and techniques somet 16 held in larnaca cyprus in september 2016 the somet conference focuses on exploring the innovations

controversies and challenges facing the software engineering community bringing together theory and experience to propose and evaluate solutions to software engineering problems with an emphasis on human centric software methodologies end user development techniques and emotional reasoning for an optimally harmonized performance between the design tool and the user the book is divided into six chapters covering the following areas decision support systems software methodologies and tools requirement engineering software for biomedicine and bioinformatics software engineering models and formal techniques for software representation and intelligent software development and social networking the book explores new trends and theories which illuminate the direction of developments in the field and will be of interest to all in the software science community

The Arms Trade Treaty: A Commentary

2012-12-06

scholars turn to reproduction for its ability to illuminate the practices involved with negotiating personhood for the unborn the newborn and the already existing family members community members and the nation the scholarship in this volume draws attention to doula work as intimate and relational while highlighting the way boundaries are created maintained challenged and transformed intimate labour as a theoretical construct provides a way to think about the kind of care doulas offer women across the reproductive spectrum doulas negotiate boundaries and often blur the divisions between communities and across public and private spheres in their practice of intimate labour this book weaves together three main threads doulas and mothers doulas and their community and finally doulas and institutions the lived experience of doulas illustrates the interlacing relationships among all three of these threads the essays in this collection offer a unique perspective on doulas by bringing together voices that represent the full spectrum of doula work including the viewpoints of birth postpartum abortion community based adoption prison and radical doulas we privilege this broad representation of doula experiences to emphasize the importance of a multi vocal framing of the doula experience as doulas move between worlds and learn to live in liminal spaces they occupy space that allows them to

generate new cultural narratives about birthing bodies

the negative impacts of carbon emissions from human activities continue to dramatically reshape the environmental political and social landscape these impacts coupled with cap and trade schemes iterate the importance and need to properly measure and reduce greenhouse gas emissions carbon footprint analysis concepts methods implementation and case studies provides up to date technical information and practical guidance on measuring and reducing energy and ghg emissions presenting a comprehensive framework for carbon management this book provides definitions concepts benefits and background information regarding carbon footprint analyses discusses the ghg accounting methods outlines the general systems framework for conducting an audit features four case studies in higher education service and manufacturing organizations the book includes detailed discussions of the concepts and explains how the different concepts fit together it supplies the necessary background as well as systematic tools and procedures for organizations to measure and reduce their carbon footprints and begin to adapt to a carbon constrained world

Managing Federal assistance in the 1980's

2004-09-30

silicon is among the most abundant elements on earth it plays a key but largely unappreciated role in many biogeochemical processes including those that regulate climate and undergird marine food webs

the silicon cycle is the first book in more than 20 years to present a comprehensive overview of the silicon cycle and issues associated with it the book summarizes the major outcomes of the project land ocean interactions silica cycle initiated by the scientific community on problems of the environment scope of the international council of scientific unions icsu it tracks the pathway of silicon from land to sea and discusses its biotic and abiotic modifications in transit as well as its cycling in the coastal seas natural geological processes in combination with atmospheric and hydrological processes are discussed as well as human perturbations of the natural controls of the silicon cycle

this book focuses on the effect of minimum quantity lubrication mql on the mechanical and thermal history which will mainly determine the quality of the machined components by analyzing the details of the lubrication and cooling effects in mql machining the book provides readers with an accurate and fast way to predict the residual stress of machined components these process analyses and quality prediction will be beneficial for understanding the mql machining theory and its widespread application in industry

Use of Incentives in Performance-Based Logistics Contracting

2008-09-25

this book explores various aspects of data engineering and information processing in this second volume the authors assess the challenges and opportunities involved in doing business with information their contributions on business information processing and management reflect diverse viewpoints not only technological but also business and social as the global marketplace grows more and more complex due to the increasing availability of data the information business is steadily gaining popularity and has a huge impact on modern society thus there is a growing need for consensus on how business information can be created accessed used and managed
