1996

this book presents the proceedings of the 15th eai international conference on automation and control in theory and practice artep 2023 held in stará lesná slovakia february 8 10 2023 the aim of the conference was to meet the experts in the field of control industrial automation and ict in the industry from universities colleges and practice the conference aims to draw attention to modern trends in the field to enable experts pedagogues and scientific researchers to present the results achieved in their work to exchange experiences and establish working contacts between meeting participants the artep proceedings includes papers on automation and control and their integration of technologies such as industry 4 0 robotics and iot artep is primarily a conference for scientists and practitioners who develop and study automation management and technologies

Fiat Punto Oct 1999 to July 2003 (V Reg Onwards), Petrol

2006

this title was first published in 2000 this text concerns the transformation of class consciousness it shows that differences between trade union activists from the east and west are not inherited from the past but are socially constructed and that eastern trade unions are no longer like their western counterparts as opposed to not yet like them the study concentrates mainly on italy and poland with east and west referring to concepts and perceptions rather than as a geographical concern it discovers whether the differences in trade union consciousness are due to the meaning members give a situation or the specificity of the local work settings

Advances in Condition Monitoring of Machinery in Non-Stationary Operations

2013-10-05

the advent of internet of things offers a scalable and seamless connection of physical objects including human beings and devices this along with artificial intelligence has moved transportation towards

becoming intelligent transportation this book is a collection of eleven articles that have served as examples of the success of internet of things and artificial intelligence deployment in transportation research topics include collision avoidance for surface ships indoor localization vehicle authentication traffic signal control path planning of unmanned ships driver drowsiness and stress detection vehicle density estimation maritime vessel flow forecast and vehicle license plate recognition high performance computing services have become more affordable in recent years which triggered the adoption of deep learning based approaches to increase the performance standards of artificial intelligence models nevertheless it has been pointed out by various researchers that traditional shallow learning based approaches usually have an advantage in applications with small datasets the book can provide information to government officials researchers and practitioners in each article the authors have summarized the limitations of existing works and offered valuable information on future research directions
