Quantitative Chemical Analysis

2013-04-26

this book covers both fundamental and practical aspects of chemical analysis data process and analysis chemical equilibria and volumetric titrations gravimetry spectrophotometry sample preparation and separation methods in quantitative analysis it was written with the rich tradition of teaching at peking university college of chemistry and edited by an american professor who was personally sensitive to the needs of students learning science from traditional chemistry textbooks written in english many examples and illustrative problems in this text have been taken from previous textbooks by the peking university team teaching program the book can be used as a starter in analytical chemistry which is fundamental and the base upon which chemistry is built traditional chapters of initial learning in analytical chemistry are included such as volumetric gravimetric and separation methods the book also includes key chapters on problem solving relating to recent progress in analytical chemistry

excerpt from elements of qualitative and quantitative chemical analysis an examination of this table shows at once that all normal nitrates and acetates and all the salts of the alkaline metals potassium sodium are soluble other similar general conclusions can be deduced by the student himself which once familiarly learned will be very useful in working out equations about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
