excerpt this collection of scattered thoughts and observations has little order or continuity it was begun to give pleasure to a good mother who thinks for herself my first idea was to write a tract a few pages long but i was carried away by my subject and before i knew what i was doing my tract had become a kind of book too large indeed for the matter contained in it but too small for the subject of which it treats for a long time i hesitated whether to publish it or not and i have often felt when at work upon it that it is one thing to publish a few pamphlets and another to write a book after vain attempts to improve it i have decided that it is my duty to publish it as it stands i consider that public attention requires to be directed to this subject and even if my own ideas are mistaken my time will not have been wasted if i stir up others to form right ideas a solitary who casts his writings before the public without any one to advertise them without any party ready to defend them one who does not even know what is thought and said about those writings is at least free from one anxiety if he is mistaken no one will take his errors for gospel i shall say very little about the value of a good education nor shall i stop to prove that the customary method of education is bad this has been done again and again and i do not wish to fill my book with things which everyone knows i will merely state that go as far back as you will you will find a continual outcry against the established method but no attempt to suggest a better the literature and science of our day tend rather to destroy than to build up we find fault after the manner of a master to suggest we must adopt another style a style less in accordance with the pride of the philosopher in spite of all those books whose only aim so they say is public utility the most useful of all arts the art of training men is still neglected even after locke s book was written the subject remained almost untouched and i fear that my book will leave it pretty much as it found it we know nothing of childhood and with our mistaken notions the further we advance the further we go astray the wisest writers devote themselves to what a man ought to know without asking what a child is capable of learning they are always looking for the man in the child without considering what he is before he becomes a man it is to this study that i have chiefly devoted myself so that if my method is fanciful and unsound my observations may still be of service i may be greatly mistaken as to what ought to be done but i think i have clearly perceived the material which is to be worked upon begin

thus by making a more careful study of your scholars for it is clear that you know nothing about them yet if you read this book with that end in view i think you will find that it is not entirely useless with regard to what will be called the systematic portion of the book which is nothing more than the course of nature it is here that the reader will probably go wrong and no doubt i shall be attacked on this side and perhaps my critics may be right you will tell me this is not so much a treatise on education as the visions of a dreamer with regard to education what can i do i have not written about other people s ideas of education but about my own my thoughts are not those of others this reproach has been brought against me again and again but is it within my power to furnish myself with other eyes or to adopt other ideas it is within my power to refuse to be wedded to my own opinions and to refuse to think myself wiser than others i cannot change my mind i can distrust myself this is all i can do and this i have done if i sometimes adopt a confident tone it is not to impress the reader it is to make my meaning plain to him

Rousseau Today 2023-05-30

this book demonstrates that rousseau offers a distinctive critical voice which is worthy of listening to rousseau is shown to target not merely social injustices but the very dynamics central to the form of life itself as such we are able to contemplate and engage in a more foundational form of social critique we contend that by returning to rousseau both as a theorist in his own right and as an interlocutor with the contemporary literature within radical political and social philosophy we can see both the circumscribed nature of contemporary discussion and the true importance of rousseau s thought in summary rousseau remains a figure of vital importance across disciplines and it is high time for an edited volume which connects insights centring his thought and impact today

Emile Durkheim: Selected Writings 1972-06

emile or on education is a treatise on the nature of education and on the nature of man written by jean jacques rousseau who considered it to be the best and most important of all his writings jean jacques rousseau born june 28 1712 geneva switzerland died july 2 1778 ermenonville france swiss born philosopher writer and political theorist whose treatises and novels inspired the leaders of the french revolution and the romantic generation rousseau was the least academic of modern philosophers and in many ways was the most influential his thought marked the end of the age of reason he propelled political and ethical thinking into new channels his reforms revolutionized taste first in music then in the other arts he had a profound impact on people s way of life he taught parents to take a new interest in their children and to educate them differently he furthered the expression of emotion rather than polite restraint in friendship and love he introduced the cult of religious sentiment among people who had discarded religious dogma he opened people s eyes to the beauties of nature and he made liberty an object of almost universal aspiration rousseau s mother died in childbirth and he was brought up by his father who taught him to believe that the city of his birth was a republic as splendid as sparta or ancient rome rousseau senior had an equally glorious image of his own importance after marrying above his modest station as a watchmaker he got into trouble with the civil authorities by brandishing the sword that his upper class pretensions prompted him to wear and he had to leave geneva to avoid imprisonment rousseau the son then lived for six years as a poor relation in his mother s family patronized and humiliated until he too at the age of 16 fled from geneva to live the life of an adventurer and a roman catholic convert in the kingdoms of sardinia and france mme de warens who thus transformed the adventurer into a philosopher was herself an adventuress a swiss convert to catholicism who had stripped her husband of his money before fleeing to savoy with the gardener s son to set herself up as a catholic missionary specializing in the conversion of young male protestants her morals distressed rousseau even when he became her lover but she was a woman of taste intelligence and energy who

brought out in rousseau just the talents that were needed to conquer paris at a time when voltaire had made radical ideas fashionable rousseau reached paris when he was 30 and was lucky enough to meet another young man from the provinces seeking literary fame in the capital denis diderot the two soon became immensely successful as the centre of a group of intellectuals or philosophes who gathered round the great french encyclopédie of which diderot was appointed editor the encyclopédie was an important organ of radical and anticlerical opinion and its contributors were as much reforming and even iconoclastic pamphleteers as they were philosophers rousseau the most original of them all in his thinking and the most forceful and eloquent in his style of writing was soon also the most conspicuous he wrote music as well as prose and one of his operas le devin du village 1752 the village soothsayer attracted so much admiration from the king louis xv and the court that he might have enjoyed an easy life as a fashionable composer but something in his calvinist blood rejected that type of worldly glory indeed at the age of 37 r

Instilling Ethics 2000-06-21

what is the self the question has preoccupied people in many times and places but nowhere more than in the modern west where it has spawned debates that still resound today in this 2005 book jerrold seigel provides an original and penetrating narrative of how major western european thinkers and writers have confronted the self since the time of descartes leibniz and locke from an approach that is at once theoretical and contextual he examines the way figures in britain france and germany have understood whether and how far individuals can achieve coherence and consistency in the face of the inner tensions and external pressures that threaten to divide or overwhelm them he makes clear that recent postmodernist accounts of the self belong firmly to the tradition of western thinking they have sought to supersede and provides an open ended and persuasive alternative to claims that the modern self is typically egocentric or disengaged
