this book brings together the study of self reflective fiction and the contemporary 4e theories of cognition in order to challenge existing cognitive theoretical models and approaches to literary phenomena polvinen presents reflective attention on artifice as an integral part of engagement with fictional narratives rather than as an external viewpoint that would obscure immersive experiences the detailed analyses included are both of traditionally metafictional texts by john barth a s byatt dave eggers and ali smith as well as of speculative fictions by ted chiang china miéville christopher priest and catherynne m valente each of the chapters focuses on a specific issue of fictional cognition on metaphorical representation spatiality temporality and fictionality as a whole the book argues that by combining a literary and theoretically complex view of artifice with the enactive paradigm of perception and imagination practitioners of cognitive literary studies can further sharpen their own conceptual and terminological apparatus and continue to generate fruitful hermeneutic circulation around the study of the imagination in both the sciences and the humanities this book will appeal to students and scholars interested in cognitive approaches to literary studies speculative fiction metafiction and narrative studies
