Electronic String Art 2024-02-20

string art is a well known and popular activity that uses string a board and nails to produce artistic images although there are variations that use different modalities this activity is beloved because simple counting rules are used to create beautiful images that can both adorn walls and excite young minds the downside of this highly tactile activity is that it is quite time consuming and rigid by contrast electronic string art offers much more flexibility to set up or change nail locations and counting rules and the images created from those changes change instantaneously electronic string art rhythmic mathematics invites readers to use the author s digital resources available on the esa website to play with the parameters inherent in string art models while offering concise accessible explanations of the underlying mathematical principles regarding how the images were created and how they change readers will have the opportunity to create visually beautiful works of art while learning concepts from geometry number theory and modular arithmetic from approximately 200 short interdependent sections features readers are able to drill down on images in order to understand why they work using short 1 to 2 page stand alone sections sections are lessons that were created so that they could be digested in a single sitting these sections are stand alone in the sense that they need not be read sequentially but can be referred to based on images that the reader finds interesting an open ended inherently flexible teaching resource for elementary middle and high school level mathematics the most mathematically challenging sections or portions of a section are designated ma and may not be accessible to elementary and middle school readers will be appreciated by anyone interested in recreational mathematics or mathematical artworks even if the users are not interested in the underlying mathematics includes exercises solutions and many online digital resources these qr codes take you to these digital resources one takes you directly to the web version of the string art model used as a starting point for teaching the parameters of the model in section 25 5 the other takes you to the esa web page with additional links to a variety of resources

New Interchange Resource Book 3 2004-05-10

one aim of gilmer s captivating text on university pedagogy is to show that biochemistry or any science does not consist solely of facts to be learned but is a way of thinking about the world her purpose both in this book and in her classroom is to make her students into critical thinkers rather than passive learners the chapters cast a critical eye over research into enhanced education techniques such as collaborative learning gilmer describes the action research she conducted in her own biochemistry undergraduate classroom into ways of improving the learning environment she offers various perspectives on the make up of her classroom including an analysis of ethnographic data the tools gilmer employs as she hones her teaching skills include collaborative learning and technology she views the classroom through various theoretical perspectives social constructivism cultural historical activity theory and a theory that involves the dialectic between the structure of the learning environment and the agency of the learners a group among whom she includes herself she provides a wealth of autobiographical detail as well as the results of her action research which followed up on its original subjects after an interval of 11 years to see what impact her course had on their professional growth above all this volume is proof of what can be achieved in education when teachers are as interested in the process of learning as they are in their subject itself

Transforming University Biochemistry Teaching Using Collaborative Learning and Technology 2010-03-10
