Word Scrambles That Make You Think

2011-05-24

these word scrambles have a unique twist some of the letters are paired together for example the word verbal could be written by combining v er b and al together in the form v er b al pairing some

letters in this way we made word scrambles with 4 to 8 symbols one symbol being either a single letter or a pair of letters which consist of 4 to 16 letters many word scramble books consist mostly of words with 4 to 5 letters which are often too easy to solve however a word scramble that consists of 4 to 5 symbols rather than letters makes use of a vocabulary of longer words and is therefore somewhat more challenging for example nature would ordinarily be a 6 letter word but n at u re is a 4 symbol word the difference is that the a and t and similarly the r and e can be split when writing nature with letters but not in the symbolic version n at u re our goal with this word scramble book was to create word scrambles that would require more thought than traditional word scrambles yet still involve common words and be reasonable to solve this book starts out easy to allow puzzlers to get the hang of it and becomes progressively more thought provoking here are some examples with the unscrambled answers in parentheses k in th think ge ra n ar arrange u mo li ne si limousine u n o ce n pr o pronounce k er tc u n ra c nutcracker we hope that you enjoy solving these puzzles as much as we enjoyed making them

Chemical Word Scrambles Anyone Can Do

(Medium)

2011-04-01

chemical word scrambles are an exciting new form of word puzzles you don't need to know any chemistry these chemical word scrambles will appeal to all word puzzle lovers whether or not they also enjoy science each word is composed of symbols from the periodic table instead of letters but you don't need to be familiar with the periodic table to solve the word scrambles here is an example the words brain power are composed of the following symbols for chemical elements b for boron ra for radium in for indium po for polonium w for tungsten and er for erbium in chemical word scrambles the words have been scrambled by rearranging the symbols not the letters symbols that have two letters like he for helium and nd for neodymium can't be split or have their letters reordered this creates a significant distinction between ordinary word scrambles and chemical word scrambles for example the symbols er v s and es may be combined to form the word serves but not the word severs because symbols would have

to be split to form several neat differences between ordinary word scrambles and chemical word scrambles is that chemical word scrambles allow us to make use of a vocabulary of longer words without effectively increasing the difficulty of the puzzle for example the word verbal is a 6 letter word but only a 4 symbol word when trying to rearrange the symbols al er b and v to form the word verbal there are fewer permutations to consider compared to rearranging the 6 letters a l e r b and v to form the word verbal we saw this as an excellent opportunity to make word scramble puzzles that involve a vocabulary of longer words the level of difficulty of this chemical word scrambles puzzle book is medium this book involves words that mostly have 5 to 6 symbols and therefore 5 to 12 letters all of the challenge words of this medium book have 6 symbols there is also an easy book with 4 to 5 symbol words and a hard book with 7 to 9 symbols puzzlers who can solve harder word scrambles may want to begin with the easy volume to get the hang of unscrambling words in terms of chemical symbols before moving onto medium or hard each puzzle features a challenge word made by rearranging the first symbol of each word a unique feature of this book is that there is a hints section at the back separate from the answers section for puzzlers who may

be stuck and want to check just the first letter of the solution
