guide by one of america s leading doctors to how digital technology enables all of us to take charge of our health a trip to the doctor is almost a guarantee of misery you ll make an appointment months in advance you ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves and your bill will be astronomical in the patient will see you now eric topol one of the nation s top physicians shows why medicine does not have to be that way instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system the change is powered by what topol calls medicine s gutenber moment much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare with smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best medicine has been digitized topol argues now it will be democratized computers will replace physicians for many

diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable massive open online medicine where diagnostics are done by facebook like comparisons of medical profiles will enable real time real world research on massive populations there s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy nevertheless the result better cheaper and more human health care will be worth it the cross language evaluation forum for the first ten years and the conference and labs of the evaluation forum since and traces its evolution over these first two decades clef s main mission is to promote research innovation and development of information retrieval ir systems by anticipating trends in information management in order to stimulate advances in the field of ir system experimentation and evaluation the book is divided into six parts parts i and ii provide background and context with the first part explaining what is meant by experimental evaluation and the underlying theory and describing how this has been interpreted in clef and in other internationally recognized evaluation initiatives part ii presents research architectures and infrastructures that have been developed to manage experimental data and to provide evaluation services in clef and elsewhere parts iii iv and v represent the core of the book presenting some of the most significant evaluation activities in clef ranging from the early multilingual text processing exercises to the later more sophisticated experiments on multimodal collections in diverse genres and media in all cases the focus is not only on describing what has been achieved but above all on what has been learnt the final part examines the impact clef has had on the research world and discusses current and future challenges both academic and industrial including the relevance of ir benchmarking in industrial settings mainly intended for researchers in academia and industry it also offers useful insights it legally and morally defensible for a liberal state to restrict immigration in order to preserve the cultural rights

of majority groups orgad proposes a liberal approach to this dilemma and explores its dimensions justifications and limitations this is a book for all faculty who are concerned with promoting the persistence of all students whom they teach most recognize that faculty play a major role in student retention and success because they typically have more direct contact with students than others on campus however little attention has been paid to role of the faculty in this specific mission or to the corresponding characteristics of teaching teacher student interactions and connection to student affairs activities that lead to students long term engagement to their academic success and ultimately to graduation at a time when the numbers of underrepresented students working adults minority first generation low income and international students is increasing this book a companion to her earlier teaching underprepared students addresses that lack of specific guidance by providing faculty with additional evidence based instructional practices geared toward reaching all the students in their classrooms including those from groups that traditionally have been the least successful while maintaining high standards and expectations recognizing that there are no easy answers kathleen gabriel offers faculty ideas that can be incorporated in or modified to align with faculty s existing teaching methods she covers topics such as creating a positive and inclusive course climate fostering a community of learners increasing engagement and students interactions activating connections with culturally relevant material reinforcing self efficacy with growth mindset and mental toughness techniques improving lectures by building in meaningful educational activities designing reading and writing assignments for stimulating deep learning and critical thinking and making grade and assessment choices that can promote learning this book provides a practical but scientifically grounded step by step approach to the adaptation of tests in linguistic and cultural contexts feedback matters for everyone committed to school improvement rather than tweaking flawed assessment tools it is experience even under emergency conditions a core study text for the att qualification pmp exam practice test and study guide ninth edition uses self study to help readers increase their chances of passing the pmp certification exam the first time this spiral bound edition includes 40 multiple choice practice questions in each of the ten knowledge areas and in the professional and social responsibilities domain it prese this book advocates that teachers should play an active role in high stakes language testing and that more weight should be given to teacher judgement this is likely to increase the formative potential of high stakes tests and provide teachers with a sense of ownership the implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices the book also considers the arguments against teacher involvement e g the contention that teacher involvement might entrench the practice of teaching to the test or that teachers should not be actively involved in high stakes language testing because their judgement is insufficiently reliable using contributions from a wide range of international educational contexts the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high stakes language testing it also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy moreover teacher involvement empowers them to play a role in reforming high stakes language testing so that it is more equitable and more likely to enhance classroom practices high stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers which ultimately benefits all their students examining the role of implicit unconscious thinking on reasoning decision making problem solving creativity and its neurocognitive basis for a genuinely psychological conception of rationality this volume contributes to a current debate within the psychology of thought that has wide implications for our ideas about creativity decision making and economic behavior the essays focus on the role of implicit unconscious thinking in creativity and problem solving the interaction of intuition and analytic thinking and the relationship between communicative heuristics and thought the analyses move beyond the conventional conception of mind informed by extra psychological theoretical models toward a genuinely psychological conception of rationality a rationality no longer limited to conscious explicit thought but able to exploit the intentional implicit level the contributors consider a new conception of human rationality that must cope with the uncertainty of the real world the implications of abandoning the normative model of classic logic and adopting a probabilistic approach instead the argumentative and linguistic aspects of reasoning and the role of implicit thought in reasoning creativity and its neurological base contributors maria bagassi linden j ball jean baratgin nordic countries during the first 1000 days of a child s life i e from the prenatal period until two years of age a total of 63 interventions and 33 tests were reviewed findings reveal that although a large number of interventions and tests are available for the target groups in the nordic countries evidence regarding their effectiveness or psychometric properties is often lacking or insufficient thus it is important that research efforts be enhanced in the nordic region to strengthen the evidence base of the interventions and instruments that practitioners rely upon in order to assess and support mental wellbeing for nordic children and families during this critical period in their lives reclaiming the teaching profession gives educators especially teachers and future teachers and their allies a clear overview of the massive effort to dismantle public education in the united states which includes a direct attack on teachers the book details and provides a systematic critique of the shaky assumptions at the foundation of the market based reform initiatives that dominate the contemporary education scene it names and exposes the motives and methods of the powerful philanthropists politicians business moguls and education entrepreneurs who are behind the reform movement it provides counter narratives that public school advocates can use to talk back to those who would destroy the teaching profession and public education it includes examples of successful acts of resistance and identifies resources for challenging reformers taken for granted primacy in the education debate it concludes with strategies educators can use to speak truth to power reclaim their professional status and reshape the education landscape in ways that serve all of america s children and preserve our democracy with this book hermann rock provides time structured core negotiation strategies that can be immediately applied in practice the author s expertise comes primarily from negotiations in the context of m a transactions and management investments however the concepts presented are equally applicable to negotiations of financing car purchase lease or service contracts and thus universally applicable three scientifically based basic strategies are presented which the reader can adapt to his or her specific negotiation situation the examples chosen for illustration are concrete cases negotiated by the author himself with the certainty of having understood the three basic strategies the reader enters the negotiation with a positive basic mood and The Patient Will See You Now 2016-10-25

the essential guide by one of america s leading doctors to how digital technology enables all of us to take charge of our health a trip to the doctor is almost a guarantee of misery you ll make an appointment months in advance you ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves and your bill will be astronomical in the patient will see you now eric topol one of the nation s top physicians shows why medicine does not have to be that way instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system the change is powered by what topol calls medicine s guttenberg moment much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare with smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best medicine has been digitized topol argues now it will be democratized computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable massive open online medicine where diagnostics are done by facebook like comparisons of medical profiles will enable real time real world

research on massive populations there is no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy nevertheless the result better cheaper and more human health care will be worth it provocative and engrossing the patient will see you now is essential reading for anyone who thinks they deserve better health care that is for all of us

this book advocates that teachers should play an active role in high stakes language testing and that more weight should be given to teacher judgement this is likely to increase the formative potential of high stakes tests and provide teachers with a sense of ownership the implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices the book also considers the arguments against teacher involvement e g the contention that teacher involvement might entrench the practice of teaching to the test or that teachers should not be actively involved in high stakes language testing because their judgement is insufficiently reliable using contributions from a wide range of international educational contexts the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high stakes language testing it also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy moreover teacher involvement empowers them to play a role in reforming high stakes language testing so that it is more equitable and more likely to enhance classroom practices high stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers which ultimately benefits all their students

examining the role of implicit unconscious thinking on reasoning decision making problem solving creativity and its neurocognitive basis for a genuinely psychological conception of rationality this volume contributes to a current debate within the psychology of thought that has wide implications for our ideas about creativity decision

making and economic behavior the essays focus on the role of implicit unconscious thinking in creativity and problem solving the interaction of intuition and analytic thinking and the relationship between communicative heuristics and thought the analyses move beyond the conventional conception of mind informed by extra psychological theoretical models toward a genuinely psychological conception of rationality a rationality no longer limited to conscious explicit thought but able to exploit the intentional implicit level the contributors consider a new conception of human rationality that must cope with the uncertainty of the real world the implications of abandoning the normative model of classic logic and adopting a probabilistic approach instead the argumentative and linguistic aspects of reasoning and the role of implicit thought in reasoning creativity and its neurological base contributors maria bagassi linden j ball jean baratgin aron k barbey tilmann betsch eric billaut jean françois bonnefon pierre bonnier shira elqayam keith frankish gerd gigerenzer ken gilhooly denis hilton anna lang stefanie lindow laura macchi hugo mercier giuseppe mosconi ian r newman mike oaksford david over guy politzer johannes ritte steven a sloman edward j n stuppel ron sun nicole h therriault valerie a thompson emmanuel trouche raymond riccardo viale
