Sign of Pathology 2015-06-18

much of the political polarization that grips the united states is rooted in the so called culture wars and no topic defines this conflict better than the often contentious and sometimes violent debate over abortion rights in sign of pathology nathan stormer reframes our understanding of this conflict by examining the medical literature on abortion from the 1800s to the 1960s often framed as an argument over a right to choose versus a right to life our current understanding of this conflict is as a contest over who has the better position on reproductive biology against this view sign of pathology argues that as it became a medical problem abortion also became a template more generally for struggling with how to live far exceeding discussions of the merits of providing abortions or how to care for patients abortion practices and all the legal moral and ideological entanglements thereof have rested firmly at the center of debate over many fundamental institutions and concepts namely the individual the family the state human rights and indeed the human medical rhetoric then was decisive in cultivating abortion as a mode of cultural critique even weaponizing it for discursive conflict on these important subjects although the goal of the medical practice of abortion has never been to establish this kind of struggle stormer argues that the medical discourse of abortion physicians transformed the state of abortion into an indicator that the

Thinking Small 2012-01-17

sometimes achieving big things requires the ability to think small this simple concept was the driving force that propelled the volkswagen beetle to become an avatar of american style freedom a household brand and a global icon the vw bug inspired the ad men of madison avenue beguiled woodstock nation and has recently been re imagined for the hipster generation and while today it is surely one of the most recognizable cars in the world few of us know the compelling details of this car s story in thinking small journalist and cultural historian andrea hiott retraces the improbable journey of this little car that changed the world andrea hiott s wide ranging narrative stretches from the factory floors of weimar germany to the executive suites of today s automotive innovators showing how a succession of artists and engineers shepherded the beetle to market through periods of privation and war reconstruction and recovery henry ford s model t may have revolutionized the american auto industry but for years europe remained a place where only the elite drove cars that all changed with the advent of the volkswagen the product of a nazi initiative to bring driving to the masses but hitler s concept of the people s car would soon take on new meaning as germany rebuilt from the rubble of world war ii a whole generation succumbed to the charms of the world s most huggable automobile indeed the story of the volkswagen is a story about people and hiott introduces us to the men who believed in it built it and sold it ferdinand porsche the visionary austrian automobile designer whose futuristic dream of an affordable family vehicle was fatally compromised by his patron adolf hitler s monomaniacal drive toward war heinrich nordhoff the forward thinking german industrialist whose management innovations made mass production of the beetle a reality and bill bernbach the jewish american advertising executive whose team of madison avenue mavericks

dreamed up the legendary ad campaign that transformed the quintessential german compact into an outsize worldwide phenomenon thinking small is the remarkable story of an automobile and an idea hatched in an age of darkness the beetle emerged into the light of a new era as a symbol of individuality and personal mobility a triumph not of the will but of the imagination

Finding the plot: A Maternal Approach to Madness in Literature 2017-12-01

over the past fifty years feminist literary criticism has become theoretical rather than practical severing any relationship between literary analysis and the real lived experiences of women an example of this disconnect is the way in which the madwoman in feminist literature has become a lauded icon of liberation when in reality her situation would be seen as anything but empowered finding the plot takes this example to task arguing that in fact any interpretation of women s madness as subversive reinforces the very gender stereotypes that feminist literary criticism should be calling into question

unmasking the male soul is about freedom that confronts the innate and enslaving obsession for power and control in destructive ways at the core of this liberating process we must acknowledge that we cannot escape the sociocultural matrix in which every human being emerges in denying their fallen nature human beings set aside their dependency on god and become self centered and self reliant it is from their self centered hearts that human beings foster dynamics of coercion domination competition and distorted self realization at the expense of others this cycle of shame and guilt is well disguised behind a mask which enables them to enact these dynamics in subtle ways at times even in the name of religion men followed the illusion of their internal insecurities and became dependent on masks of power and control it is time to break away from the chains of exclusion and devaluation of women in christian leadership masculinities have only perpetrated a narrative of exceptionalism as the apex of humankind and often they have contrasted to subservient expectations of women in leading others each chapter responds to the implicit male silence on the issue in a multidisciplinary way with historical sociocultural theological and scriptural implications in this book i will endeavor to challenge the masks of masculinities and dismantle several mental models that foment a gender divide in christ like leadership in the twenty first century
