Seven Days Before Richmond

2009-03-11

combining meticulous research with a unique perspective seven days before richmond examines the 1862 peninsula campaign of union general george mccllellan and the profound effects it had on the lives of mccllellan and confederate general robert e lee as well as its lasting impact on the war itself rudolph schroeders twenty five year military career and combat experience bring added depth to his analysis of the peninsula campaign offering new insight and revelation to the subject of civil war battle history schroeder analyzes this crucial campaign from its genesis to its lasting consequences on both sides featuring a detailed bibliography and a glossary of terms this work contains the most complete order of battle of the peninsula campaign ever compiled and it also includes the identification of commanders down to the regiment level in addition this groundbreaking volume includes several highly detailed maps that trace the peninsula campaign and recreate this pivotal moment in the civil war impeccably detailed and masterfully told seven days before richmond is an essential addition to civil war scholarship schroeder artfully enables us to glimpse the innermost thoughts and motivations of the combatants and makes history truly come alive

Mozart

2006-02

a concise biography of a musical genius combines a well researched life of mozard the composer with an introduction to his many works in a study of one of the few musicians in history to have written undisputed masterpieces in every genre of his time

Physics Implications of a New 1st Order PDE

2010-07

this is a book about dr david maker s new generally covariant generalization of the dirac equation $\psi = \gamma^\mu \partial_\mu \psi$ with $\gamma^\mu = \gamma^\mu + \epsilon^{\mu\nu} \partial_\nu$ with $\epsilon^{\mu\nu} = \epsilon^{\mu\nu} + \epsilon^{\mu\nu} \partial_\rho$ this new equation explicitly includes curved space $\epsilon^{\mu\nu} \neq 0$ thus includes force thus naturally explains all the forces with direct straightforward derivation for example at $\epsilon^{\mu\nu} \neq 0$ the third term in the expansion of the energy term in this new pde gives the lamb shift without the higher order diagrams doesn t require the standard pathology of adding and subtracting infinities to get the qed high precision even if the mistake is made of setting $\epsilon^{\mu\nu} = 0$ we still explain why the infinities are then needed to get this high precision if the gauges are then added thus even the qed high precision results are understood here from first principles eq 1.9 also at $\epsilon^{\mu\nu} \neq 0$ it gives a bound state $2p_3/2$ trifolium thus charge e spends $1/3$ of its time in each lobe fractionally charged lobes there are 6 p states 6 flavors the lobes can t leave asymptotic freedom p wave scattering jets explaining all the major properties of quarks giving us the strong interaction without any new assumptions the standard dirac equation on the other hand applies to flat space $\epsilon^{\mu\nu} = 0$ there which is a mistake to use except for in flat space since indeed there are forces so what do people do to try to get the experimental results after making such an egregious error they add in gauge after gauge lagrangian term after lagrangian term free parameter after free parameter when their model doesn t explain new experimental results they just fudge in a new term resulting in a big mess of a theory that confuses stops the progress of theoretical physics dead in its tracks why they ca

necessity is the mother of invention part i what is in this book details there are several different types of formal proof procedures that logicians have invented the ones we consider are 1 tableau systems 2 gentzen sequent calculi 3 natural deduction systems and 4 axiom systems we present proof procedures of each of these types for the most common normal

modal logics s5 s4 b t d k k4 d4 kb db and also g the logic that has become important in applications of modal logic to the proof theory of peano arithmetic further we present a similar variety of proof procedures for an even larger number of regular non normal modal logics many introduced by lemmon we also consider some quasi regular logics including s2 and s3 virtually all of these proof procedures are studied in both propositional and first order versions generally with and without the barcan formula finally we present the full variety of proof methods for intuitionistic logic and of course classical logic too we actually give two quite different kinds of tableau systems for the logics we consider two kinds of gentzen sequent calculi and two kinds of natural deduction systems each of the two tableau systems has its own uses each provides us with different information about the logics involved they complement each other more than they overlap of the two gentzen systems one is of the conventional sort common in the literature

Hearings Before the Committee on Agriculture, House of Representatives, Eighty-first Congress, First - Session

1949

unlike most books about the civil war which address individual battles or the war at the national level states at war a reference guide for michigan in the civil war chronicles the actions of an individual state government and its citizenry coping with the war and its ramifications from transformed race relations and gender roles to the suspension of habeas corpus to the deaths of over 10 000 michigan fathers husbands sons and brothers who had been in action the book compiles primary source material including official reports legislative journals executive speeches special orders and regional newspapers to

provide an exhaustive record of the important roles michigan and michiganders had in the war though not burdened by marching armies or military occupation like some states to the southeast michigan nevertheless had a fascinating civil war experience that was filled with acute economic anxieties intense political divisions and vital contributions on the battlefield this comprehensive volume will be the essential starting point for all future research into michigan s civil war era history

1910

this work offers a complete episode guide and comprehensive history of second city television the influential canadian sketch comedy series created dozens of memorable characters i e station president guy caballero and showbiz mogul johnny larue and featured well known performers such as john candy catherine o hara and martin short at the height of their comedic careers presenting a thorough summary and review for each of sctv s 135 episodes the author traces the initial appearance and evolution of some of comedy s best known television characters and sketches two appendices provide guides to the program s compilation shows and recently released boxed sets on dvd
