Castle Peak and Eightmile Flat Oil and Gas Expansion Project, Inland Resources Inc 2005 during world war ii japanese fighters such as the famed zero were among the most respected and feared combat aircraft in the world but for decades following the defeat of japan in 1945 a variety of political and economic factors prevented japan from developing its own modern national fighter this changed in the 1980s japan began independently developing its first world class fighter since world war ii after several years of contentious negotiations the japanese agreed to work with the united states to cooperatively develop a minimally modified f 16 the fs x the new fighter however has evolved into a world class aircraft developed largely by japanese industry primarily due to errors committed by the u s side by the fall of 1995 fifty years after the end of world war ii the zero for the 1990s will have made its first flight catapulting japan into the elite ranks of nations capable of developing the most advanced weapon systems in troubled partnership mark lorell traces the evolution of the fs x disclosing the conflicting economic and security objectives advanced by u s officials the flawed u s policy of technology reciprocity and the challenges of international collaboration its deep intimacy with the interplay of policy and economy will make this volume of intense interest to political scientists military studies specialists historians and government officials

Business Policy and Strategic Management 2003 caribbean nations in particular sids have been traditionally vulnerable to the entry of potentially harmful unregistered and unregulated pesticides in many of these countries the legislation and regulations for managing pesticides are fragmented and at various stages of development under the overall objective to promote sound management of pesticides in the caribbean the project kick started various activities covering pesticide life cycle management in the region drafted a regional model pesticide legislation and facilitated different vital elements it specifically contributed to the collection and shipment of obsolete pesticides 319 tonnes from all 11 project countries and polychlorinated biphenyls 54 tonnes from four countries however it has not been able to successfully replicate scale up nationally and build capacities with government stakeholders evenly across all countries further follow up and support are required to ensure sustainability and impact in the region and the project countries and thus the engagement of the private sector and civil society organizations will be critical

FCC Record 1999 following world war ii the onset of nuclear weapons long range jet bombers and ballistic missiles radically changed american foreign policy and military strategy the united states air force led by men of far sighted vision and uncommon dedication accepted the challenge of organizing and leading a massive research and development effort to build ballistic missiles in the quarter of the century since these weapons have constituted one of the tree legs of the strategic triad the basis of

america's strategy of deterring nuclear war yet they have received less attention from the public and within the air force than the more glamorous manned bombers of the strategic air command or the missile launching submarines of the u s navy this volume attempts to correct the imbalance by telling the story of development of air force ballistic missiles it concentrates on the first generation of ballistic missiles the intercontinental atlas and titan and the intermediate range thor although the effort to develop rockets has a longer history than commonly assumed the modern history spans the relatively short era from 1945 to 1960 during this brief interval missiles advanced from drawing board to alert status where the next generation now remains poised to deter war
