Handbook of Principles of Organizational Behavior 2011-07-15 there is a strong movement today in management to encourage management practices based on research evidence in the first volume of this handbook i asked experts in 39 areas of management to identify a central principle that summarized and integrated the core findings from their specialty area and then to explain this principle and give real business examples of the principle in action i asked them to write in non technical terms e g without a lot of statistics and almost all did so the previous handbook proved to be quite popular so i was asked to edit a second edition this new edition has been expanded to 33 topics and there are some new authors for the previously included topics the new edition also includes updated case examples updated references and practical exercises at the end of each chapter it also includes a preface on evidence based management the principles for the first edition were intended to be relatively timeless so it is no surprise that most of the principles are the same though some chapter titles include more than one principle this book could serve as a textbook in advanced undergraduate and in mba courses it could also be of use to practicing managers and not just those in human resource departments every practicing manager may not want to read the whole book but i am willing to guarantee that every one will find at least one or more chapters that will be practically useful in this time of economic crisis the need for effective management practices is more acute than ever

Globalization on the Margins (2nd Edition) 2020-01-01 reflecting on almost three decades of postsocialist transformations the second edition of globalization on the margins explores continuities and changes in central asian education development since the dissolution of the soviet union in 1991 with a particular focus on the developments that took place since the production of the first edition in 2011 rather than viewing these transformations in isolation the authors place their analyses within the global context by reflecting on the interaction between soviet legacies and global education reform pressures in the central asian countries of kazakhstan kyrgyzstan tajikistan turkmenistan and uzbekistan this new edition in addition to a revised introduction and a newly added conclusion consists of four thematic sections each reflecting a key theme in the educational life of the central asian states these thematic sections introduction and conclusion collectively update our understanding of the recent developments and challenges in education of the five central asian states they however go beyond mere information update so as to complicate re engage re form and re define the margins taking up margins a conceptual geographic cultural and geo political construct notwithstanding the diversity of local and international authors variety of theoretical perspectives methodological approaches and conceptual lenses the essays reveal the complexity and uncertainty of the post socialist education transformations instead of portraying the transition process as the influx of western ideas into the region globalization on the margins provides new lenses to critically examine education as a contested field of diverse perspectives competing forces and multidirectional flow of ideas concepts and reforms in central asia endorsements hindsight famously brings clarity and much of what happened after the fall of the berlin wall and the collapse of the soviet union has now been correctly handed over to historians nonetheless we ignore that history at our peril the contributors to this volume show that carefully textured and historically attuned education research generates deep insights into ongoing transformations and the political cultural social and economic structures relations and practices that do the work of producing margins and centers in the first place noah w sobe loyola university chicago globalization on the margins and at the epicentre of the battles of the great powers two excellent educators sarfaroz niyozov and iveta silova compiled a timely and long awaited scholarly work based on empirical research in societies which had similar history close to three decades ago all the contributors are prolific educators who know the education system from within and without who either hailed from the region or have spent a considerable amount of time to know the systems well the book contains remarkable stories of education through the ups and downs of historical evolution it is a must read primer for anyone interested in learning about high quality research in the field of education in central asia it is a huge contribution to educational research with an impact on research and teaching for years to come duishon shamatov nazarbayev university kazakhstan the challenge of moving central asia from the borders of the soviet empire to the world s center is the focus of the discussions in globalization on the margins the transition to the western models of education was happening in the context of major paradigm shift which entire humanity was experiencing and which could be described as the arrival of the new post industrial civilization during this process central asian countries have been pushed to the margins because their contribution to the wealth of the new world know how was much less pronounced than that of their western neighbours therefore investment into the research that contributes to local knowledge production seems a natural solution to the problem all the contributors to this book have a vast experience in the region and many of their observations are thought provoking this is a very insightful and much needed book elena lenskaya moscow school of social and economic sciences russia
