VISUAL BASIC USER'S GUIDE MICROSOFT EXCEL VERSION 5.0 1994

this book is a companion to the 19th edition of the sears list and a complete course in the theory and practice of the list for practitioners teachers and learners the object of this small practical introduction is to be simple clear and illustrative assuming the reader has little prior knowledge either of the sears list or of subject headings work in general

User's Guide to Sears List of Subject Headings 2008

new and improved version of the naval surface warfare center dahlgren division aeroprediction code ap93 has been developed the new code contains new technology that allows planar aerodynamics of axisymmetric solid rocket type weapons to be computed with engineering accurately over the entire mach number range and for angles of attack to 30 deg new technology developed and included in the ap93 includes a new engineering method to compute aeroheating information at a high mach number extension of the second order shock expansion theory to include real gas effects including several new pressure prediction techniques an improved body alone nonlinear normal force method new methods for computing nonlinear aerodynamics of wing alone wing body and body wing due to angle of attack and wing body due to control deflection and a new base dmg database and improved empirical base drag estimation technique aeroprediction code ap93 planar aerodynamics high mach number
