

NovaNET

1988

Novanet is a network of networks that connects schools, colleges, and universities across the United States. It was created in 1988 by the National Science Foundation and the National Endowment for the Humanities. The network is used for a variety of purposes, including research, education, and communication.

NovaNET User Manual for C-router Instructors

1990

this work derives from a conference discussing the history of computing in education this conference is the first of hopefully a series of conferences that will take place within the international federation for information processing ifip and hence we describe it as the first conference on the history of computing in education hcel these proceedings represent a collection of works presented at the hcel conference held in association with the ifip 2004 world computer congress held in toulouse france contributions to this volume range from a wide variety of educational perspectives and represent activities from four continents the hcel conference represents a joint effort of the ifip working group 9 7 on the history of computing and the ifip technical committee 3 on education the hcel conference brings to light a broad spectrum of issues and spans four continents it illustrates topics in computing education as they occurred in the early days of computing whose ramifications or overtones remain with us today indeed many of the early challenges remain part of our educational tapestry most likely many will evolve into future challenges therefore this work provides additional value to the reader as it will reflect in part the future development of computing in education to stimulate new ideas and models in educational development
