much of the conversation and concern of churches and of christian individuals is centred around christian discernment or knowing god s leading in decision making the language we use around these moments is fluid and often feels inadequate ask someone how they know what god might be saying in a given situation and they may well reach for the phrase i just

know in how do you know it s god lynn mcchlery draws on ethnographic research amongst those in different kinds of discernment processes along with theological spiritual and psychological insights to try and understand this phenomenon of insight or just knowing challenging the perception that such intuition needs to be marginalised and removed from discernment conversations mcchlery suggests that instead intuition can and should be intentionally matured both individually and in communities and that it can be verified articulated and recorded in forms appropriate to its own mode of insight it is a vital new contribution to the scholarship for all practical theologians researching ecclesiology vocation group dynamics in churches and communal decision making processes of any kind

What Did the Biblical Writers Know and When Did They Know It?

2001-05-10

for centuries the hebrew bible has been the fountainhead of the judeo christian tradition today however the entire biblical tradition including its historical veracity is being challenged leading this assault is a group of scholars described as the minimalist or revisionist school of biblical studies which charges that the hebrew bible is largely pious fiction that its writers and editors invented ancient israel as a piece of late jewish propaganda in the hellenistic era in this fascinating book noted syro palestinian archaeologist william g dever attacks the minimalist position head on showing how modern archaeology brilliantly illuminates both life in ancient palestine and the sacred scriptures as we have them today assembling a wealth of archaeological evidence dever builds the clearest most complete picture yet of the real israel that existed during the iron age of ancient palestine 1200 600 b c dever s exceptional reconstruction of this key period points up the minimalists abuse of archaeology and reveals the weakness of their revisionist histories dever shows that ancient israel far from being an invention is a reality to be discovered equally important his recovery of a reliable core history of ancient israel provides a firm foundation from which to appreciate the aesthetic value and lofty moral aspirations of the hebrew bible

medicine itself is sick we hardly understand any disease and therefore need to chronically treat symptoms but not the causes consequently drugs and other therapies help only very few patients yet we are pumping more and more money into our healthcare system without any added value thus the internationally renowned physician researcher harald schmidt predicts the end of medicine as we know it on a positive note digitization will radically change healthcare and lead to one of the greatest socioeconomic revolutions of mankind he is one of the pioneers of systems medicine a complete redefinition of what we actually call a disease how we organize medicine and how we use big data to heal rather than treat to prevent rather than cure in this book the author first proves the deep crisis of medicine but describes how medicine will become more precise more uniform safer and surprisingly also more affordable making a diagnosis will be taken over by artificial intelligence current mainly organ based medical specialists disciplines and hospital departments will disappear physicians will become patient coaches working in interdisciplinary teams with pharmacists physiotherapists nutritionists etc and relieved of their workload illnesses including cancer will be prevented or cured in a precise manner we will become 100

years and older health care spending will shift from chronic treatment of diseases to prevention and health maintenance thereby dramatically reducing overall costs health will become a common good but harald schmidt also warns that those who are not open to digitization will not benefit from these advances and will be left behind anyone who wants to benefit from the revolution of medicine must have a digital twin is this futurism no each of us can have his or her personal genome sequenced microbiome analyzed keep an electronic health record the future has begun schmidt convincingly explains the limitations in the current practice of medicine and the need for big data and a systems approach prof ferid murad md phd nobel laureate in medicine 1998 usa network medicine a new discipline that offers a network based understanding of the cell and disease is unavoidable if we wish to translate the advances in genomics into cures professor harald schmidt a prominent expert in this space offers the first coherent treatment of the topic explaining the potential of a network based perspective of human disease prof albert lászló barabási northeastern university and harvard medical school boston usa visionary provocative and full of insights professor schmidt gives a unique and authoritative perspective to the past present and future of medical science and clinical practice and all presented in such an inimitable style prof robert f w moulds mbbs phd fracp former dean royal melbourne hospital clinical school australia
