the czech republic and slovakia emerged as independent countries in 1993 as joint successors of the former czechoslovakia having once been a single country with a single national railway operator the change was significant although both countries and their railways still have a lot in common loco types have changed through modernization and rebuilding and both countries have retained very different narrow gauge systems that are still in daily operation both countries have invested in modern fleets and rail freight has boomed thanks to globalization and eu membership resulting in a wide variety of trains spanning three decades this book explores the history of both countries and their railways and

features over 140 pictures most of which have never been published before the book concludes by looking at the ambitious plans for new high speed networks connecting both countries and most of their neighbors by the late 2030s

this book shows how the systems approach is employed by scientists in various countries to solve specific problems concerning railway transport in particular the book describes the experiences of scientists from romania germany the czech republic the uk russia ukraine lithuania and poland for many of these countries there is a problem with the historical differences between the railways in particular there are railways with different rail gauges with different signaling and communication systems with different energy supplies and finally with different political systems which are reflected in the different approaches to the management of railway economies the book s content is divided into two main parts the first of which provides a systematic analysis of individual means of providing and maintaining rail transport in turn the second part addresses infrastructure and management development with particular attention to security issues though primarily written for professionals involved in various problems concerning railway transport the book will also benefit manufacturers railway technical staff managers and students with

transport specialties as well as a wide range of readers interested in learning more about the current state of transport in different countries
