assessment tool interdisciplinary collaboration calls
attention to a serious need to study the problems and
processes of interdisciplinary inquiry to reflect on
the current state of scientific knowledge regarding
interdisciplinary collaboration and to encourage
research that studies interdisciplinary cognition in
relation to the ecological contexts in which it occurs
it contains reflections and research on
interdisciplinarity found in a number of different
contexts by practitioners and scientists from a number
of disciplines and several chapters represent attempts
by cognitive scientists to look critically at the
cognitive science enterprise itself representing all of
the seven disciplines listed in the official logo of
the cognitive science society and its journal
anthropology artificial intelligence education
linguistics neuroscience philosophy and psychology this
book is divided into three parts part i sets the stage
by providing three broad overviews of literature and
theory on interdisciplinary research and education part
ii examines varied forms of interdisciplinarity in situ
rather than the more traditional macrolevel interview
or survey approaches to studying group work part iii
consists of noted cognitive scientists who reflect on
their experiences and turn the analytical lenses of
their own disciplines to the critical examination of
cognitive science itself as a case study in
interdisciplinary collaboration interdisciplinary
collaboration is intended for scholars at the graduate
level and beyond in cognitive science and education
