The London Weaver's Company 1600 - 1970 2013-11-05 the battle of the plains of abraham in 1759 and the subsequent capitulation of quebec set the stage for an equally significant french british engagement in the struggle for northeastern north america the battle of sainte foy in the spring of 1760 after having suffered a brutal winter quebec garrison commander james murray s troops were vulnerable and reduced to an army of skeletal invalids due to malnutrition and scurvy trapped in hostile territory and lacking confidence in the fortifications of quebec murray planned to confront french attackers outside the walls instead of waiting at montreal for the british to attack montcalm s successor françois gaston de lévis returned to the plains for a rematch accompanied by every combatant available french regulars canadian militia and first peoples warriors the ensuing battle of sainte foy was less a battle for territory than a struggle for survival between two equally desperate adversaries if the british lost the battle they would lose quebec if the french lost the battle they would very likely lose canada both the french and the british had their backs to the wall macleod presents this historical event in riveting detail from the preparation and day by day actions during the engagement to the compelling siege of quebec by land and ship backs to the wall is an accessible and engaging account of an important episode in canadian history

**Creating the British Atlantic** 2013 this collection of essays addresses the challenge of modern nationalism to the tsarist russian empire first appearing on the empire s western periphery this challenge was most prevalent in twelve provinces extending from ukrainian lands in the south to the baltic provinces in the north as well as to the kingdom of poland at issue is whether the late russian empire entered world war i as a multiethnic state with many of its age old mechanisms run by a multiethnic elite or as a russian state predominantly managed by ethnic russians the tsarist vision of prioritizing loyalty among all

subjects over privileging ethnic russians and discriminating against non russians faced a fundamental problem as soon as the opportunity presented itself non russians would increase their demands and become increasingly separatist the authors found that although the imperial government did not really identify with popular russian nationalism it sometimes ended up implementing policies promoted by russian nationalist proponents matters addressed include native language education interconfessional rivalry the jewish question the origins of mass tourism in the western provinces as well as the emergence of russian nationalist attitudes in the aftermath of the first russian revolution

**The army list** 1820 transconstitutionalism is a concept used to describe what happens to constitutional law when it is emancipated from the state in which can be found the origins of constitutional law

transconstitutionalism does not exist because a multitude of new constitutions have appeared but because other legal orders are now implicated in resolving basic constitutional problems a transconstitutional problem entails a constitutional issue whose solution may involve national international supranational and transnational courts or arbitral tribunals as well as native local legal institutions

transconstitutionalism does not take any single legal order or type of order as a starting point or ultima ratio it rejects both nation statism and internationalism supranationalism transnationalism and localism as privileged spaces for solving constitutional problems the transconstitutional model avoids the dilemma of monism versus pluralism from the standpoint of transconstitutionalism a plurality of legal orders entails a complementary and conflicting relationship between identity and alterity constitutional identity is rearticulated on the basis of alterity rather than seeking a herculean constitution

transconstitutionalism tackles the many headed hydra of constitutionalism always looking for the blind spot in one legal system and reflecting it back against the many others found in the world s legal orders  
*J.R. McCulloch* 2013-10-16 nuclear physics deals with bohr s work on nuclear physics which began in the pre 1932 days with his thinking deeply but inconclusively about the seeming contradictions then presented by the evidence about the nucleus in 1936 bohr recognised and described the insights provided by neutron scattering experiments the excitement of this new understanding and its extension and consolidation occupied much of the subsequent years in 1939 he was again first in understanding the essential features of the newly discovered phenomenon of fission applying successfully the point of view of nuclear reactions which he had developed over the past three years later in 1949 50 he was impressed by the success of the nuclear shell model which on the face of it seemed hard to reconcile with the picture of the closely interacting nucleons which he had pioneered in 1936 bohr put much effort into clarifying this paradox
