this is a book on how and why workers come together almost coincident with its inception worker organisation is a central and enduring element of capitalism in the 19th and 20th centuries mobilisation by workers played a substantial role in reshaping critical elements of these societies in europe north america australasia and elsewhere including the introduction of minimum labour standards living wage rates maximum hours etc workplace safety and compensation laws and the rise of welfare state more generally notwithstanding setbacks in recent decades worker organisation represents a pivotal countervailing force to moderate the excesses of capitalism and is likely to become even more influential as the social consequences of rising global inequality become more manifest indeed instability and periodic shifts in the respective influence of capital and labour are endemic to capitalism as formal institutions have declined in some countries or unions outlawed and severely repressed in others there has been growing recognition of informal strike activity by workers and wider alliances between unions and community organisations in others while such developments are seen as new they aren't indeed understanding of worker organisation is often ahistorical and even those understandings informed by historical research are this book will argue in need of revision this book provides a new perspective on and new insights into how and why workers organise and what shapes this organisation the origins of worker mobilisation will be key reading for scholars academics and policy makers the fields of industrial relations hrm labour economics labour history and related disciplines

first published in 1975 this volume aims to direct attention at a number of aspects of the lives and occupations of village labourers in the nineteenth century that have been little examined by historians outside of agriculture some of the factors examined include the labourer's gender whether they lived in closed or open villages and what they worked at during the different seasons of the year the author examines a range of occupations that have previously been ignored as too local to show up in national statistics or too short lived to rank as occupations at all as well as sources of secondary income the analysis of all of these factors in related to the seasonal cycle of field labour and harvests the central focus is on the cottage economy and the manifold contrivances by which labouring families attempted to keep themselves afloat

shortlisted for the hwa non fiction crown award 2020 superb the economist elegant entertaining and frequently surprising new york times the fascinating story of the regency period in britain an immensely colourful and chaotic decade that marked the emergence of the modern world the regency began on 5 february 1811 when the prince of wales replaced his violently insane father george iii as the sovereign de facto it ended on 29 january 1820 when george iii died and the prince regent became king as george iv at the centre of the era is of course the regent himself who was vilified by the masses for his selfishness and corpulence around him surged a society defined by brilliant characters momentous events and stark contrasts a society forced to confront a whole range of pressing new issues that signalled a decisive break from the past and that for the first time brought our modern world clearly into view the regency revolution is the most thorough and vivid exploration of the period ever published and it reveals the remarkably diverse ways in which the cultural social technological and political revolutions of this decade continue both to inspire and haunt our world

high tension lends an entirely different dimension to the history of the great hydro electric shannon scheme of 1925 1929 hitherto the story has been told from an engineering viewpoint now historian michael mccarthy brings new perspectives to bear on the irish free state s most audacious construction project at ardnacrusha how did the german and irish workforces get on what was life like for the 5000 odd navvies and their families many of them living in barns and pigsties along the nine mile stretch of the irish klondyke how did the local farmers and householders in clare and limerick cope with the massive explosions and disruptions how did those who lost homes lands livelihoods and loved ones 53 died and hundreds were injured during construction cope with the trauma and hardship the guns of the civil war were scarcely silenced when the irish government embarked on this huge undertaking with vision and scarce resources high tension details the interdepartmental rivalry among civil servants the struggles with the labour movement and strong arm tactics of joe mcgrath the dogfights with vested interest groups and overburdened local services and the compensation battles that dragged on years after the scheme opened

on the 75th anniversary of that opening it seems fitting to tell for the first time this fascinating story
