things have been peaceful at the lucky devil but peace never lasts between technology and magic it s been two months since rune leveau aka anna masterson survived the machinations of the kodiak corporation chicago never sleeps especially when the masterson files the computer program with the impossible ability to cast spells is still out there the rest of the corporate overlords won t let that lie and rune is the key to that power to make matters worse the magic guild wants a word with the finder while trouble in the form of the faerie king comes calling at her bar now it seems like every faction in the city is converging on rune trapping her in a crossfire of

bullets and magic hitmen and wizards just the right moment for st benedict the deadly and handsome cyber spy to sweep back into rune s life can rune convince the saint of liars to help answer the most important question in her life where is justin masterson even with the two joining forces will rune and benedict make it out alive

every few years a dissertation comes to the area of clinical application of medical technology which carries us forward as on a magic carpet into new regions of understanding and patient care this book is such a magic carpet it brings together in a clear and incisive fashion important hemodynamic principles with a simple noninvasive method of application to a part of the cerebral vasculature which has been relatively inaccessible to the lucky and perceptive person who reads this book a feeling of excitement and hope for progress is engendered the diligent application of the potentials of transcranial doppler ultrasound brings new power to our efforts in

understanding the cerebral circulation and the causes treatment and prevention of cerebrovascular disorders merrill p spencer m d
director institute of applied physiology and medicine seattle wash july 1986 acknowledgements i am greatly indebted to prof he1ge
nornes oslo who introduced me to the fascinating study of cerebral hemodynamics in the early 1970 s and since then continually
encouraged my interest in this field it was through his pioneering work on the cerebral circulation using peroperative electromagnetic
flowmetry and doppler techniques that the basis was laid for the noninvasive trans cranial approach to the circle of willis described in
this book i also gratefully acknowledge the stimulating case discussions with prof peter huber berne at the very early introduction of
trans cranial doppler the inspiring exchange of ideas with dr merrill p
